FUNK'S G HYBRID SEED CORN

Always Reliable

Famed for Standability and High Yields

Resists Drouth, Insects, Disease

"This is about the way hybrid corn on good soil and under good management beats the Tennessee state average. County Commissioner O. B. Ellis (left), Manager of the Shelby County Penal farm expects better than 75 bushels to the acre from 1,150 acres of hybrid corn while the state average last year was only 25 bushels. Dr. J. R. Holbert (right), breeder and manager for Funk Bros., seems to take pride in the comparison between the Penal Farm and the state average."

The above photograph and article appeared on page 5 of the Dec. issue of the Progressive Farmer.

The yield of FUNK'S G HYBRID CORN produced on outstanding farms in Tennessee checks closely with that of similar farms in Arkansas and northern Mississippi when well adapted modern hybrids have been used on land where soil fertility is maintained at a high level.

Modern hybrid corn breeding is raising the ceiling on corn production for our southern farmers so that it is possible to plan for yields year in and year out that will average 15 to 40 per cent more corn than it has been possible to harvest from open pollinated fields.

READ CAREFULLY

TO YOU: January 1946, marks the beginning of my 50th year selling seed in Memphis and through these years I have tried to furnish my customers nothing but the best obtainable in seeds, bulbs, insecticides, etc. Seed is the smallest expense in producing a crop and we urge you to consider the quality rather than the cost. As soon as new, improved strains and varieties have proved their merits, we offer them for your benefit.

ORDER EARLY—Due to unsettled world conditions the supply of many items is very limited. In the case of seed production, we are glad to state that with the exception of a few items the supply this season is more plentiful. In view of this fact you will note many price reductions in this catalogue. It is, however, advisable to order early due to transportation conditions.

PRICES—The prices quoted in this catalog are those prevailing Jan. 1, 1946. Some vegetable and field seeds, as well as other items in this catalog, are under OPA ceiling prices and in each instance our prices are the ceiling prices or less. Due to extremely unsettled conditions, we reserve the right to change prices, without notice, on items not under OPA regulation.

CASH WITH ORDER—Please send money with order sufficient to cover the whole bill and remit by express, postal money order or check. We advise against C. O. D. orders because of delays and high collection charges, which are unsatisfactory to the customer and expensive to us if uncalled for and returned at our expense. We accept C. O. D. orders when 25 per cent of the order amount is paid in advance.

We do **NOT** ship plants, onion sets, potatoes, baby chicks or nursery stock C.O.D.

FREE DELIVERY BY MAIL—We pay postage on all items quoted postpaid in this catalogue. The prices on the Yellow Price List are F. O. B. Memphis. Study the parcel post map, figure your postage and save money. Sending coins, bills, or stamps through the mail is safe and convenient.

NON-WARRANTY—R. B. Buchanan Seed Company, Inc., gives no warranty express or implied as to the productiveness or efficiency of any seeds, bulbs, plants, fertilizers, insecticides or other goods it sends out and will not in any way be responsible for the crop or results. Its liability in all instances is limited to the purchase price of such goods. This condition forms part of the contract of sale when the goods are delivered and accepted and if not accepted on these terms they are to be returned at once and the purchase price will be refunded.

SAVE MONEY—This Parcel Post Map and Rate Table will help you to save money. Study it carefully—also study page 4. It is easy to figure Parcel Post. After studying these pages get the Yellow Price List enclosed and many times you can save money for yourself and friends by combining your orders and having those orders sent together in one package.

SAVE MONEY—By reading the instructions, studying and referring to the Rate Table below, you can easily figure your postage on any amount up to 70 pounds. See our **Yellow Price List**, enclosed, showing prices Not Prepaid. Charges on parcel post shipments must be paid in advance. Add the amount for postage to the cost of merchandise and include it in your remittance when using yellow price list. We always return every penny you send over actual postage.

FLOWER SEED PLANTING TABLE

This table is for middle South climate and conditions. Allowances must be made. It is only a general guide. Abbreviations: T, tender; H, hardy; H H, half hardy; A, annual; B, biennial; P, perennial. Months are numbered: 1, January; 2, February; etc.

AN ANNUAL PLANT—The seed must be shown each year and after producing its blossom and seed the plant will perish. Examples: Asters, Salvia, Sweet Peas and Zinnias.

A BIENNIAL PLANT—Is one that maintains its vitality for two years or more, producing roots and leaves the first

year and fruit or blossoms the second season. Examples: Canterbury Bells, Digitalis and Sweet Williams.

A PERENNIAL PLANT—Is one that lives indefinitely and usually has a dormant season in which it loses its leaves and which puts on new growth the following growing seasons. Examples: Geranium, Carnation, Hollyhock and Delphinium.

BUCHANAN'S VEGETABLE PLANTS

BUCHANAN'S GENUINE FROST-PROOF CABBAGE PLANTS

They are the genuine open field Frost-Proof Plants. Set cabbage in rows 30 inches apart, 15 to 20 inches in row, 10,000 to 14,000 to acre. All prices on cabbage plants are subject to crop conditions and market changes. Varieties: Early Jersey and Large Charleston Wakefield, Succession and Early Flat Dutch.

Prices—100, 50c; 200, 90c; 500, \$1.95; 1,000, \$3.50, post paid

BUCHANAN'S BERMUDA ONION PLANTS

We begin shipping about January 1 and continue through March. Set in rows 24 inches apart; plants 6 to 8 inches apart in row; requires about 44,100 plants to acre. They are not expensive and may be used as small green onions or will produce large onions.

YELLOW BERMUDA—The original Bermuda Onion. Skin straw-colored, flesh white, tender and mild. Medium size, flat, early maturing.

CRYSTAL WHITE WAX BERMUDA—No other onion has such clear, white skin, such mildness of flavor. It is deliciously tender and crisp. Especially desirable for salads. The most popular of all onions.

Price, Either Variety—100, 30c; 200, 50c; 500, \$1.00; 1,000, \$1.75; post paid

BUCHANAN'S STATE CERTIFIED SWEET POTATO SLIPS

Set in rows 3 feet apart; plants 12 inches apart. It takes about 10,000 plants for each acre. For a home garden 1,000 slips will make you a nice patch. We begin shipping Sweet Potato Slips April 10, weather permitting.

NANCY HALL—Maintains its popularity because of large yields and unsurpassed keeping and shipping qualities. One of the earliest maturing sweet potatoes.

PORTO RICO YAMS—It is fine-grained, juicy, and deliciously sweet. Its golden red color and excellent flavor make it the most desirable sweet potato for home use and it brings a premium on all markets.

Price, Either Variety—200, 95c; 500, \$2.00; 1,000, \$3.75; post paid

BUCHANAN'S ROOTS

WASHINGTON ASPARAGUS ROOTS—Plant these extra large roots and save 1½ to 2 years' time in having your bed ready for cutting. Set the roots in permanent beds, using rich soil thoroughly prepared and worked very deep. Set 6 inches deep and 24 inches apart in rows 4 to 6 feet apart.

Post paid—Doz., 85c; 25, \$1.50; 50, \$2.50; 100, \$4.50

RHUBARB ROOTS—Should be set in well-enriched moist soil at least 4 feet apart each way. Our variety best adapted to the South.

Post Paid—Each, 25c; 3, 55c; 6, 95c; doz., \$1.75; 25, \$3.35

HORSE RADISH ROOTS—Set the roots, small end down, with tops 2 inches below surface, about 18 inches apart in rows 3 feet apart. Cultivate well until leaves cover the ground.

Post paid—Doz., 75c; 25, \$1.25; 50, \$2.25; 100, \$4.25

GARDEN SEED

5—ASPAGUS, MARY WASHINGTON—Rust resistant, giant size, highest yielding, most tender.

Sow seed in February or March in rows 15 inches apart. Transplant when 1 or 2 years old.

Post paid—Pkt., 5c; oz., 20c; ¼ lb., 50c; lb., \$1.50

9—BROCCOLI, GREEN SPROUTING (90 days)—Head is a compact cluster of bluish green flower buds, one of the choicest green vegetables and should be in every garden. Grown and cooked like cauliflower. Plant either spring or fall.

Post paid—Pkt., 10c; ½ oz., 20c; oz., 30c; 2 ozs., 50c; ¼ lb., 85c

8—BRUSSELS SPROUTS (125 days)—Small shoots, like miniature cabbages clustered around a stem, are the edible part of this unique vegetable, delicious, delicate cabbage flavor. Plant and cultivate same as cabbage.

Pkt., 10c; ½ oz., 30c; oz., 50c; 2 ozs., 90c; ¼ lb., \$1.60

420 TAMPALA—The so different in flavor to other vegetables used as greens, cooked and prepared like spinach but better in many respects. Retains its tenderness for a long time, has more flavor, body and food value than spinach or chard.

Pkt., 15c; ¼ oz., 40c; ½ oz., 70c; 1 oz., \$1.25

Streamliner

Beans are sensitive to both cold and wet, so do not plant till the ground is warm. To have a continuous supply, plant every two weeks until September; further South they may be planted even later. Make the rows 24 to 30 inches apart, drop the beans 2 inches apart and cover 1½ to 2 inches deep. Give frequent but shallow cultivation up to blossoming time, not afterward, and never when the plants are wet. Plant in a light, loamy soil that warms up quickly. One pound plants 100 feet.

FIELD PLANTING—In rows 2 feet apart; 1 bushel (60 lbs.) to acre. Ready in 6 or 7 weeks.

70—STREAMLINER (55 days)—This is among the most productive of the bush types, a large bush of upright growth, bearing an extra heavy crop of long, straight semi-flat pods, 7 in. long, ½ to 9/16 in. wide and fleshy. It will continue bearing when others have ceased. The quality is excellent; stringless, nearly fiberless. Seed clear white, kidney shape, excellent as dry bean. Does well in medium heavy soil.

Postpaid—Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75; 10 lbs., \$3.25

73—FLORIDA BELLE (60 days)—All America Bronze medal, 1945. Bred especially for resistance to disease in high temperatures and humidity. Produces flat pods longer than Bountiful, entirely stringless and free from fiber. It matures crop evenly over short period. Good for home gardens and market.

Postpaid—Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75; 10 lbs., \$3.25

37—IMPROVED EXTRA EARLY RED VALENTINE (47 days)—A standard variety, extra early. The pods are produced in large clusters on erect plants. It is very prolific and reliable. The pods are of medium length, and about 4½ inches long, medium green color, curved, cylindrical, with crease in back, very fleshy, crisp and tender. When the young plants have to contend with adverse weather conditions, no other dwarf bean is more certain than the Red Valentine is to set pods.

40—BURPEE'S STRINGLESS GREEN POD—Our Stock Truly an Improved Strain—(47 days)—This special strain stringless and fiberless from the first pods until full grown. The pods are longer, straighter, meatier and of better flavor than the average Burpee beans on the market. It is also a heavier yielder and due to its excellent quality it is unsurpassed for canning.

41—STRINGLESS BLACK VALENTINE (43 days)—Definitely stringless. It is perfect for the home gardener or trucker. The attractive green pods are nearly round, long, straight, very tender, and of good flavor. This bean is early, a vigorous grower, and one of the most prolific; splendid shipper. Due to its hardiness can be planted earlier in the spring and later in the fall than most other beans.

42—NEW STRINGLESS GREEN POD OR TENDERGREEN—Similar to Full Measure, but hardier, and a more dependable cropper. Plant medium large, erect, somewhat thick stemmed, heavily productive. Pods nearly straight, dark green, round, meaty, succulent; absolutely stringless, totally without fiber, of outstanding quality. Good variety for canning or shipping.

44—GIANT STRINGLESS GREEN POD (54 days)—This is a very desirable green-podded variety for the home garden, and also for truckers. The handsome round pods are 6 to 7 inches long, dark green in color, brittle and perfectly stringless. It is one of the most productive sorts and can be picked in one-third the time of any other variety. This bean is excellent for near or distant markets.

45—FULL MEASURE (55 days)—Has every qualification required of a really first class bean. It has earliness; it is one of the most abundant bearers, and bears for a long season; it is entirely stringless, and the round 6 inch pods are very fleshy, firm and tender. For the home garden, as well as for market, it is hard to imagine a finer bean. A good variety for canning.

38—TENNESSEE GREEN POD (52 days)—A very hardy and healthy bean. Desirable for local market and is resistant to adversity. A good yielder of large, long, flat pods. Very thick meat with texture and flavor almost equal to pole beans. Not entirely stringless, but a very desirable all-purpose bean.

DWARF WAX BEANS

58—IMPROVED GOLDEN WAX (49 days)—One of the best wax beans, golden yellow pod, excellent flavor. Pods are medium length, straight and oval. Strictly stringless, rust-resistant, fleshy, very brittle and tender.

Postpaid—Pkt., 10c; ½ lb., 25c; 1 lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75; 10 lbs., \$3.25.

57—PENCIL POD BLACK WAX (55 days)—A most desirable wax bean for home and market garden. Plant large, stocky, vigorous and highly productive. Pods round, slightly curved, fleshy, golden yellow, tender, entirely stringless, without fiber, brittle and of finest quality.

Postpaid—Pkt., 10c; ½ lb., 25c; 1 lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75; 10 lbs., \$3.25.

PRICES ON ALL THE ABOVE BEANS EXCEPT WHERE OTHERWISE PRICED

Post Paid—Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75.

POLE SNAP BEANS

Pole Beans produce a greater supply of beans in a smaller space as compared with Bush Beans. They are even more tender than most bush varieties.

CULTURE—Set 6- to 8-foot poles every 3 feet in 3-foot rows, and plant 4 to 5 beans, about 2 inches deep, around each pole. When well started, thin to three strongest. A packet plants 40 hills; 1 pound to 150 hills; 30 pounds ($\frac{1}{2}$ bushel) to an acre. May also be planted thicker in rows and supported by a wire fence. For this method plant seed 2 feet apart sowing 300 feet with a pound of seed. Top dress with good fertilizer or manure; work it in as you cultivate. Save time, labor and space by planting pole beans in all corn, when the corn is about 1 foot high.

69—DECATUR (60 days)—Early Maturing—All America Silver Medal Winner for 1942. Plant vigorous, hardy and resistant to disease, therefore, bears over a long period. Pods about 6 inches long, almost round, straight, beautiful dark green color, stringless, and superlative quality. When mature, the pure white dried beans prove their excellence for baking and soups because of their tenderness and appetizing flavor.

Postpaid—Pkt., 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75; 10 lbs., \$3.25

67—KENTUCKY WONDER—Improved Strain—(65 days)—Pods thicker, more nearly round, meaty, tender, practically stringless and grow 8 to 10 inches long. Very hardy, a strong climber and is the most prolific pole, snap bean to plant any time from April to August; if closely picked will continue bearing until frost. No bean surpasses it in general quality and flavor.

64—KENTUCKY WONDER WAX—(68 days)—The most popular wax podded pole variety. Plant vigorous, good climber, productive. Pods waxy yellow, flat, nearly stringless, meaty.

Postpaid—Pkt., 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75; 10 lbs., \$3.25

65—McCASLAN—(65 days)—An astonishing yielder of large, rich, deep green pods 8 to 10 inches in length, stringless, meaty, and of delicious flavor. If kept closely picked, vines continue to bear until frost. When allowed to ripen the white shell beans are excellent for winter use.

66—STRIPED SCOTIA OR CORNFIELD—(72 days)—A superb green bean, succeeding better when planted in corn than any other variety because of its vigor and free climbing habits. The handsome green pods average 8 or 9 beans to the pod, grow very uniform, about 7 inches long, thick meated, rich and buttery. It continues in bearing so long it might be called "Everbearing." Specially adapted to growing on corn, thus economizing space on valuable land.

68—WHITE CREASEBACK OR SOUTHERN CORNFIELD—(68 days)—Splendid snap beans for home garden and early market. Good climber, heavily productive. Pods light green, round, 6 inches long, nearly stringless, very fleshy, brittle, tender. The mature white beans are excellent for baking.

71—KENTUCKY WONDER WHITE SEEDED (Green Pod)—(64 days)—The pods are large and fill perfectly, and in the "snap" stage are deep green in color, meaty, stringless and of the finest flavor. It is resistant to rust and bears over a long time. When allowed to ripen the shell beans of pure white are most excellent for winter use.

72—IDEAL MARKET—(58 days)—Especially desirable for Southern planting, being the earliest pole bean yet developed. Plant is hardy, vigorous and a good climber. Pods about 6 in. long, round, meaty and tender. Stringless when young. Good for home gardens and long distance shipping.

PRICES ON ALL THE ABOVE BEANS EXCEPT OTHERWISE PRICED

Post Paid—Pkt., 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

Ideal Market

Kentucky Wonder

SHELL OR SOUP BEANS

These are grown to use as dried beans during the winter, for baking and making soup. Plant in May and June, using 30 to 60 pounds to the acre. Plant in 3-foot rows and cultivate well. One pound drills 150 to 200 feet of row.

62—GREAT NORTHERN BEANS (Pole)—Well suited to heavy soils. Beans slightly larger than the Navy Bean; snow white and of splendid cooking quality.

63—RED KIDNEY BEANS (Bush)—Pods 6 inches long, filled with large, kidney-shaped red beans of the richest flavor.

61—WHITE NAVY (Bush)—An improved strain, more resistant to disease, more vigorous and a better producer. The bean that made "Pork and Beans" famous.

81—PINTO BEANS (Bush)—Probably best adapted soup bean for the South. Grown extensively for dry shell beans for winter use. Plant these and save on your grocery bill.

Postpaid—Either Variety—Pkt., 10c; $\frac{1}{2}$ lb., 20c; 1 lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25; 10 lbs., \$2.25

EDIBLE SOY BEANS

CULTURE—After danger of frost, plant in rows approximately 3 feet apart. When 6 to 8 inches high thin to 1 plant, every 3 to 5 inches. Give clean, shallow cultivation as you would snap beans. One pound plants about 200 feet.

AODA—(110 days)—A large green seeded bean with delicate, pleasing flavor. Very desirable used green, dried or canned. Plants medium tall, very productive.

55—BANSEI (90 days)—Plants erect and of medium height, very prolific, well adapted for short season areas. Beans glossy yellow, oblong with rounded ends, of mild, pleasing flavor.

Postpaid—Either Variety—Pkt., 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50

BUSH LIMA or BUTTER BEANS

CULTURE—Pound will plant 200 feet. Bush Limas require the same cultivation as Pole Limas, except that the rows should be 2 feet apart and 6 to 12 inches of space between each plant.
FIELD PLANTING—In rows 2½ feet apart and 6 inches apart in rows; about 60 pounds to the acre.

Prices Post Paid. Quantity Prices—See Yellow Price List

53—CANGREEN BUSH LIMA—(72 days)—All-America Winner. Plant breeders have been working to obtain a lima bean of the Henderson Bush type with green seed, it cooks and cans green which is a distinct advantage for canning and freezing and preferred by many whose preference is for the baby butter-lima beans for eating fresh or as dry beans. Plants are dwarf, bearing continuously throughout the season. Flat pods with 3 or 4 green beans of good quality.

Postpaid—Pkt. 10c; ½ lb., 25c; 1 lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75; 10 lbs., \$3.25

52—BURPEE'S IMPROVED BUSH LIMA—(75 days)—An improvement over the old Burpee's Bush Lima, slightly earlier and larger. Plant sturdy, vigorous and very productive. Pods 5 inches long, contain three to four beans, flat but thicker than Burpee's Bush.

Postpaid—Pkt. 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

50—BABY POTATO BUSH LIMA BEAN—(70 days)—Silver Medal Winner 1939. Twelve to 16 inches high, or like a very sturdy Henderson Bush Lima Bean in growth. It is early and prolific, and here at last is a small, thick-seeded butter bean with a most delicious flavor. This new Baby Potato Lima has proven itself a certain producer in our Southern climate. Pods are large for a Baby Lima, seeds are an attractive bright green in its green or eating stage and creamy white when dry. The variety is adapted for produce markets, canning and quick freezing, as well as home gardens.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

49—HENDERSON'S BUSH LIMA—(65 days)—Our special strain has been bred particularly for uniformity in development of green shelled beans. Plant dark green, erect, bushy, very early. Pods flat, containing 3 to 4 beans. Green beans flat, small, and with that tasty freshness so much sought in green vegetables. Dry beans creamy white; unexcelled for canning and local market.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

46—JACKSON WONDER BUSH LIMA (or Florida Speckled Bush Butter Bean)—(65 days)—Originated in the South where many gardeners prefer it to other bush limas since it has proven more drought resistant and bears heavily over a long period. This is a sure cropper and a rich, distinctly flavored bean.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

48—FORDHOOK 242. BUSH LIMA BEAN—(75 days)—All America Bronze Medal, 1945. State and national experiment stations cooperated in developing this variety of the popular large seeded bush lima bean. It has pods as large and beans as numerous as the original Fordhook, and the plants grow as tall, but spread more. A distinct improvement is the ability to set basal pods in hot, dry weather, and to thrive in temperatures as high as 102 degrees. Early and total yields are heavier than the original.

Pkt. 10c; ½ lb., 25c; 1 lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75; 10 lbs., \$3.25

POLE LIMA OR BUTTER BEANS

CULTURE—Lima Beans are not as hardy as Snap Beans and should not be planted before the ground is warm and frost is over. For the tall varieties, set 6- to 8-foot poles firmly in the center of the hills 3 feet apart in 4-foot rows before the seeds are planted. Cover the beans 1½ inches deep; cultivate only when the vines are dry. One pound of the large seeded varieties plants about 70 hills; 60 pounds to the acre. One pound of the small seeded varieties plants about 150 hills; 30 pounds to the acre.

78—CAROLINA SIEVA OR SMALL LIMA—(77 days)—Grown extensively in the South where it is known as "Butter Bean." The plants are vigorous, productive, and bear very early. A continuous bearer, furnishing the most tender and delicious beans, and is very drouth resistant. The most popular pole butter bean for the South.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

79—FLORIDA SPECKLED BUTTER BEANS (Calico Lima)—(80 days)—This true pole lima is more certain to set pods under adverse conditions and bears profusely all through the season. It is more resistant to drouth than any other lima bean. The beans are medium size, beautifully blotched dark red, which is not apparent in the early green stage. A very desirable green and dried bean.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

80—BUCHANAN'S MONSTROUS OR LARGE WHITE LIMA—(88 days)—The pods are very large, often 6 inches long, and containing green beans of the most excellent quality. Fine flavored and nutritious when dried.

Pkt., 10c; ½ lb., 25c; 1 lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75; 10 lbs., \$3.25

77—LARGE SPECKLED OR CHRISTMAS LIMA—(90 days)—So named because of its unusual and beautiful color contrast. The very large beans are greenish white with vivid narrow red stripes; flavor rich and delicious either green or dried. The newest introduction to the large lima bean family.

Pkt., 10c; ½ lb., 25c; 1 lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75; 10 lbs., \$3.25

Carolina or Small Lima

GARDEN BEETS

For the earliest beets, plant in a hot bed and transplant. For early outdoor crop, plant in March and make successive plantings till the end of August; the late plantings are to make beets for winter use and the seeds should be well soaked before planting. Beets thrive best in a light, clean, deeply worked soil that has been previously well manured; smooth roots cannot be had if fresh manure is used. Plant in rows 16 to 20 inches apart, cover 1 inch and thin to 4 inches apart. One ounce will plant 50 feet of row, 8 to 10 pounds, 1 acre.

All Prices on This Page Post Paid

Quantity Prices—Not Prepaid—See Yellow Price List Enclosed

24—CROSBY'S EGYPTIAN (48 days)—We recommend Crosby's Egyptian as a combination of earliness, good shape, good color and good quality. The color is bright red, with bright vermilion-red flesh, very sweet and tender. A standard early variety, very popular with market gardeners, as the tops bunch well and it makes a good appearance with dark red, turnip shaped roots.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.25; 2 lbs., \$2.25

18—EARLY WONDER (45 days)—If earliness is desired, you have it in Early Wonder, but you have most excellent quality as well. It is of the blood turnip type, uniform in size, shape and color, always smooth, never stringy, and a good keeper. The flesh is a deep rich red, sweet, crisp and tender. Although bred primarily for market growers, its many fine qualities commend it highly to the home gardener.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.25; 2 lbs., \$2.25

19—CRIMSON GLOBE (50 days)—A rich, deep crimson beet of perfect globe shape, smooth and clean. Matures early, is of a most attractive appearance, and in quality is not surpassed by any other variety. We recommend it not only for market gardeners and truckers, but for the home garden as well.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.25; 2 lbs., \$2.25

21—EARLY BLOOD TURNIP (50 days)—An extra selected, smooth, dark red beet of uniform size and first-class quality. One of the best for main crop, also for planting in May or June to make late beets for winter storage.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.25; 2 lbs., \$2.25

23—DETROIT DARK RED (50 days)—A beet you will like, whether you grow it for home use or market. Almost globe shaped with small tops and taproot skin, very smooth and of dark blood-red color. Flesh maroon red without light rings, free of fibre, tender, sweet and superb quality at all stages of growth. A good beet for both early and late planting.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.25; 2 lbs., \$2.25

27—RHUBARB CHARD (60 days)—A new Swiss Rhubarb. The leaf-stalks are bright but delicate, translucent crimson; the rich color extends out through the veins into the dark green, heavily crumpled leaves. You will enjoy its different, tasty, delicious flavor. Plants are so beautiful they may be used in flower borders. Leaves and stalks are nice in flower arrangements.

Pkt., 10c; oz., 35c; $\frac{1}{4}$ lb., \$1.00

26—SWISS CHARD (Spinach Beet or Sea Kale) (40 days)—A real cut-and-come-again salad, for after cutting outer leaves it quickly makes a new growth from the center. The leaf is boiled like spinach or turnip greens. Since it produces so abundantly during hot, dry summer months it is often planted for chickens.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.25; 2 lbs., \$2.25

STOCK BEETS OR MANGELS

CULTURE—Plantings should be made beginning at corn planting time till the middle of June, soaking the seeds for 24 hours before planting. Make the rows 2 to 2½ feet apart, the drills 1 inch deep on lands that have plenty of moisture in the subsoil; on dry and sandy soil they should be planted deeper. Thin out to stand 8 inches apart in the row; young plants may be transplanted to fill up vacancies. One ounce will sow 75 feet of drill; 6 pounds to acre.

28—GIANT HALF SUGAR MANGEL (90 days)—Produces not only a very large crop, much easier to harvest than other sorts, but also has a higher nutritive value, being especially rich in sugar. This excellent, heavy yielding variety makes dairy cattle produce more milk and beef cattle gain weight more rapidly.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.25; 2 lbs., \$2.25; 5 lbs., \$5.25

30—MAMMOTH PRIZE LONG RED (110 days)—No other mangel can compare with this variety in yield. Crops of 30 to 40 tons per acre have been made on good land and under proper cultivation. The roots often weigh 20 to 25 pounds each. It grows well above ground; is easily pulled; the long red roots are straight, well-formed and solid. A fine keeper and, at a low cost, will supply an abundance of succulent green food for stock of all kinds and for poultry. Especially adapted to deep soils.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.25; 2 lbs., \$2.25; 5 lbs., \$5.25

CAULIFLOWER

CULTURE—Cultivate like cabbage. Sow in January or February for early crop; May or June for late. Transplant to rich, moist soil; manure heavily and water freely. When heading begins, fasten leaves over top of head to whiten; 1 ounce of seed makes 1,000 plants.

109—EXTRA EARLY SNOWBALL (55 days)—There is no better cauliflower for Southern growers, and our strain is as fine as can be had at any price. It is not only the earliest to head, but a remarkably sure header, making large, solid, perfect pure white heads of the finest quality.

Pkt., 15c; $\frac{1}{4}$ oz., 45c; $\frac{1}{2}$ oz., 70c; 1 oz., \$1.25; $\frac{1}{4}$ lb., \$4.50

Detroit Dark Red

Swiss Chard

Long Red Stock Beets

CARROTS

Plant in a light, rich, deeply-worked soil as early as you can work the ground, in drills 12 inches apart and ½ inch deep; press the soil firmly after planting and when well up, thin out to 3 or 4 inches apart in the row. For field culture, make the drills 18 to 24 inches apart; later plantings should be made in July and August for a late crop to store for winter. To store for winter, pack in dry earth or sand in the cellar or put them outside on a well-drained situation, covering with a few inches of straw and 6 to 8 inches of earth to protect from frost. One ounce will plant 100 feet of drill; 3 to 4 pounds to the acre.

All Prices on This Page Post Paid

Quantity Prices—Not Prepaid—See Yellow Price List Enclosed

104—IMPERATOR (77 days)—An outstanding variety which meets the demand of the home garden for a smooth, handsome, coreless carrot. The commercial growers favorite for local and distant markets since its rounded, sloping shoulders, tapering, half blunt ends and medium strong tops make it the perfect bunching and shipping carrot. The tapering roots, about 8 inches long and 1½ inches across top are a deep, rich orange, fine grained, tender and of excellent quality.

Pkt., 5c; oz., 15c; 2 ozs., 25c; ¼ lb., 45c; ½ lb., 80c; lb., \$1.45; 3 lbs., \$4.00

105—DANVERS HALF-LONG (75 days)—This handsome, half-long, orange carrot is adaptable to all soils. Its roots are smooth and longer than the Chantenay; the tops are medium size. The mature roots are 6 to 7 inches long, tapering uniformly to a blunt end. Its flesh is a deep, rich orange color, tender, sweet and crisp. It outyields any other variety.

Pkt., 5c; oz., 15c; 2 ozs., 25c; ¼ lb., 45c; ½ lb., 80c; lb., \$1.45; 3 lbs., \$4.00

106—LONG ORANGE (88 days)—Especially fine on light soils, making long, smooth, tapering roots of a deep orange color, free from side roots and a good all-purpose carrot. A fine winter sort for table, market and stock.

Pkt., 5c; oz., 15c; 2 ozs., 25c; ¼ lb., 45c; ½ lb., 80c; lb., \$1.45; 3 lbs., \$4.00

108—CHANTENAY (72 days)—Very popular because of its beautiful appearance and excellent table quality. Its length will average 5½ inches; its color is a rich, bright orange-red. The roots are the half-long type, smooth, free from side rootlets, and unusually uniform. The crisp, tender and fine flavor makes it very desirable. A splendid carrot for home garden, local market and distant shipping.

Pkt., 5c; oz., 15c; 2 ozs., 25c; ¼ lb., 45c; ½ lb., 80c; lb., \$1.45; 3 lbs., \$4.00

Imperator

SOUTHERN COLLARDS

An old-time standby for winter greens all over the South. Not in its best condition until touched by frost. Seed can be sown here from early spring up to August 1st. When plants are 6 inches high transplant to open ground, setting 2 feet apart. Cultivate like cabbage. One ounce of seed sows 200 feet of row, or makes about 1,000 plants.

127—GEORGIA WHITE CABBAGE (48 days)—Produces large, loose headed cabbage-like plants, the leaves of which make excellent greens. Very hardy and grows on poorer soil than cabbage.

Pkt., 5c; oz., 10c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 55c; 5 lbs. \$2.25

125—GEORGIA or SOUTHERN (48 days)—Stands cold weather and adverse conditions splendidly, and grows on land too poor to make a crop of cabbage. Southern gardeners would not feel that their garden was complete without it.

Pkt., 5c; oz., 10c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 55c; 5 lbs. \$2.25

EGG PLANT

CULTURE—Sow in hotbed in February or March. When 4 inches high, transplant after danger of frost to 3-foot rows in deep, rich loam. One ounce of seed will produce 1,000 plants.

183—BLACK BEAUTY (81 days)—The lustrous, purplish-black fruits, which are tender and tasty are set freely on the plant. Holds color and firmness well after picking. A continuous and consistent bearer.

The most desirable of all the egg plants for home use, local market and shipping.

Pkt., 10c; ½ oz., 25c; oz., 40c; 2 ozs., 75c; ¼ lb., \$1.35; ½ lb., \$2.55; lb., \$4.95.

Black Beauty Egg Plant

CELERY

CULTURE—Sow in beds in February or March and keep them well watered. Transplant to moist, rich soil; 8 inches apart in 20-inch rows. Earth up two or three times. Cover with straw for protection from severe weather. One ounce of seed produces 4,000 plants.

121—IMPROVED WHITE PLUME (112 days)—Earliest and most easily blanched to a snow white. Stalks tender, crisp and free of fibre.

122—GOLDEN SELF BLANCHING (118 days)—Plants medium in height, stocky and compact, blanch readily. Stalk and heart are crisp, solid, quite stringless and of excellent flavor.

Price, either variety—Pkt., 10c; ½ oz., 30c; oz., 55c; 2 ozs., 95c; ¼ lb., \$1.75

CHICKORY, ENDIVE AND KOHL-RABI

119—CHICORY WITLOOF (75 days)—Witloof is used principally as a winter salad, and is most delicious served with French dressing and eaten like lettuce.

Pkt., 10c; ½ oz., 20c; 1 oz., 30c; 2 ozs., 55c; ¼ lb., 95c

175—ENDIVE—CURLED (95 days)—The finely curled leaves, broad ribs, form a dense crowded foliage which blanches into a delicious crispness.

176—ENDIVE—BROAD LEAVED (95 days)—The broad twisted thick ribbed leaves form a compact heart which bleaches creamy white.

Price either Endive—Pkt., 5c; oz., 15c; 2 ozs., 25c; ¼ lb., 40c

178—KOHL-RABI WHITE VIENNA—The turnip shaped bulb formed above the ground combines the flavors of cabbage and turnip; truly a delicious vegetable.

Price—Pkt., 10c; ½ oz., 20c; oz., 35c; 2 ozs., 60c; ¼ lb., \$1.10

LEEK

CULTURE—Sow early in the spring one-half inch deep in rows 12 to 24 inches apart and thin to 4 to 6 inches in the row. Cultivate and draw the earth to them as they grow.

180—LONDON FLAG (85 days)—Stems 10 inches long, 1½ inches thick; leaves large, broad and dark green.

Pkt., 10c; ½ oz., 25c; oz., 45c; 2 ozs., 75c; ¼ lb., \$1.35

CABBAGE SEED

CULTURE—When started in hot-beds, sow thinly broadcast, covering seed about $\frac{1}{2}$ inch. When 4 to 6 inches high, transplant. Give frequent cultivation, drawing the earth to the plants at each working. Set the early varieties at intervals of 18 inches in rows $2\frac{1}{2}$ feet apart; the larger and later sorts, 2 feet apart in 3-foot rows. Cabbage should be grown rapidly. It is a heavy feeder, and a rich well-prepared soil will produce the best crop. The maturity dates indicated are the average number of days required to produce heads ready for market from the time the young plants are set in the field. An ounce of seed will produce at least 1,000 strong plants; one pound is sufficient to sow an acre.

All Cabbage Prices Post Paid

Quantity Prices—Not Prepaid—See Yellow Price List Enclosed

EARLY VARIETIES

86—EARLY JERSEY WAKEFIELD (62 days)—Extremely early variety, very valuable for home and market garden as well as for shipment. Plants small and compact, allowing very close planting; stem short. Heads conical, usually 7 in. long, 5 in. thick near base; firm and weigh 2-3 lbs.

Pkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c; 2 ozs., 40c; $\frac{1}{4}$ lb., 75c; $\frac{1}{2}$ lb., \$1.35; 1 lb., \$2.50.

87—CHARLESTON OR LARGE WAKEFIELD (71 days)—Desirable for home and market garden. Head broad, heart-shaped, 8 in. long, 7 in. broad at base, firm, commonly 4-5 lbs. A heavy yielding extremely hardy cabbage adapted to early fall planting for winter use and for early spring planting. A good shipper and market gardener variety.

Pkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c; 2 ozs., 40c; $\frac{1}{4}$ lb., 75c; $\frac{1}{2}$ lb., \$1.35; 1 lb., \$2.50.

94—COPENHAGEN MARKET (66 days)—Dependably early and uniform. Splendid for home garden and shipment, proving valuable as early kraut variety. Plant small, compact, allowing very close planting; stem short; heads uniformly round; firm; 6-7 in. diameter and weight $3\frac{1}{2}$ -4 lbs. Interior clear white and of excellent quality. Its earliness and fine size and shape of head have made it the popular market gardener's favorite.

Pkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c; 2 ozs., 45c; $\frac{1}{4}$ lb., 80c; $\frac{1}{2}$ lb., \$1.45; 1 lb., \$2.75.

84—GOLDEN ACRE (62-64)—The earliest round headed cabbage; especially valuable for early market and shipping. Plants very small and compact; stem short; heads uniformly round; firm, commonly 6 in. in diameter and weigh 3 lb. It is practically as early as Early Jersey Wakefield.

Pkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c; 2 ozs., 45c; $\frac{1}{4}$ lb., 80c; $\frac{1}{2}$ lb., \$1.45; 1 lb., \$2.75.

SECOND EARLY AND LATE VARIETIES

101—EARLY DWARF FLAT DUTCH (90 days)—Splendid for home, local market and long distance shipping. Plant medium size, vigorous, with very large, solid, flat heads, weighing 10 to 12 lbs. Remain crisp and tender long after mature. The most desirable large, early cabbage.

85—ALL SEASONS (90 days)—Splendid general purpose cabbage; good winter keeper; widely used for kraut; remarkably thrifty in hot dry weather. Heads large; commonly 8-10 in. across, 7 in. deep and weigh 8-9 lbs.; of splendid quality.

91—SUCCESSION (87 days)—Very dependable for late summer and fall use; good keeper. Plants large but compact; stem short. Heads large and flat but deep; 8-10 in. across, 7-8 in. deep and weigh 8-9 lbs.

93—LATE FLAT DUTCH (105 days)—The best very large, late cabbage; popular for home and market garden and for fall shipment; a good keeper. Heads very large, flat and solid, 10 to 11 in. across, 7 in. deep and weigh 11 to 12 lbs.; firm and of good quality.

100—DRUMHEAD SAVOY (90 days)—(Winter Cabbage)—Very popular because of its tasty flavor. The deep green, crinkled outer leaves enclose the tender, light green heart. Planted in the fall it will provide the perfect green vegetable for your winter garden. Pkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c; 2 ozs., 45c; $\frac{1}{4}$ lb., 80c; $\frac{1}{2}$ lb., \$1.45; 1 lb., \$2.75.

83—CELERY CABBAGE (70 days)—Chinese or Chihli. A most unusual mildly flavored cabbage producing long firm heads. Cut up like cabbage and served with mayonnaise or French dressing, it makes a splendid cole-slaw. Can be boiled like cabbage if cooked quickly, but is without the strong flavor. The hearts blanch to a crystalline white; whiter than lettuce and more beautiful than cabbage. Plant and cultivate like any other cabbage.

Pkt., 5c; $\frac{1}{2}$ oz., 10c; oz., 15c; 2 ozs., 25c; $\frac{1}{4}$ lb., 45c; $\frac{1}{2}$ lb., 80c; 1 lb., \$1.50.

Except where otherwise priced—Pkt., 5c; $\frac{1}{2}$ oz., 15c; oz., 25c; 2 ozs., 40c; $\frac{1}{4}$ lb., 75c; $\frac{1}{2}$ lb., \$1.35; 1 lb., \$2.50.

Early Jersey Wakefield

Charleston Wakefield

Early Flat Dutch

Chinese Chihli or Celery Cabbage

BUCHANAN'S CANTALOUPE

CULTURE—Melons thrive best in light, rich soil. Plant just as soon as the ground is warm, in hills 4 to 6 feet apart, according to the variety. Plant about 8 seeds to each hill, covering with about 1 inch of fine soil firmly pressed down. As plants develop cultivate well. Gradually thin out to two plants to the hill. When the vines begin to run freely, stop cultivation, except after a heavy rain.

All Prices on This Page Post Paid.

210—QUEEN OF COLORADO OR PRIDE OF WISCONSIN (85 days)—Oval in shape with tough, heavily netted rind with faint ribs. The flesh color is totally unlike other cantaloupes, being a deep, sparkling, golden orange. The seed cavity is small and closely packed. The flesh is thick, juicy and sweet, edible almost to the rind, and has no superior in eating qualities. Size 6 by 6½ inches, weight 5 pounds. It is one of the finest cantaloupes for both shipping and for home gardening yet introduced. Pkt., 5c; oz., 25c; 2 ozs., 45c; ¼ lb., 65c; ½ lb., \$1.15; 1 lb., \$2.25; 3 lbs., \$6.45.

Cranshaw

Gold Lined Rocky Ford

Queen of Colorado

214—BANANA (100 days)—Shaped somewhat as name indicates; grows about 2 feet long; flesh deep salmon colored and of a delicious banana-like flavor.

Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$1.95; 3 lbs., \$5.55.

220—IMPERIAL No. 45 (80 days)—**FORMERLY LISTED HALES BEST No. 45**—This medium size, slightly oblong, mildew resistant melon approaches perfection in its class. Its outstanding advantages are its very heavy cropping even in the hottest driest season and it almost never shows spoilage in the field even when quite ripe. It also may be vine-ripened and still shipped long distances because it remains firm and in good edible condition longer than almost any other cantaloupe. The seed cavity is small and tightly packed with seed. The salmon-orange flesh is firm but not tough or stringy, and has a sweet, luscious, melting and superb flavor. Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$1.95; 3 lbs., \$5.55.

211—HALES BEST, JUMBO STRAIN (87 days)—Large fruited strain of the leading Hale variety, unexcelled for home use and local market. Melons oval, heavily netted, very uniform; flesh thick, salmon-orange, sweet and of excellent quality. The perfect melon for markets. Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$1.95; 3 lbs., \$5.55.

219—ROCKY FORD (92 days)—The Improved Rust Resistant Strain continues to be a leader in its class. It has enjoyed wide use for many years and is well known everywhere that melons are produced. It is popular chiefly because of its extraordinary flavor. The spicy flavor of the green-fleshed Rocky Ford is difficult to improve upon. Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$1.95; 3 lbs., \$5.55.

212—HONEY DEW MELON (100 days)—This melon is unlike the ordinary muskmelon or cantaloupe, both in appearance and flavor, the outer skin being smooth, hard and nearly white. The melons are large, round to oval in shape, extremely thick-meated and have a very small seed cavity; flesh is light green, very solid and of a rich honey-like flavor, luscious and juicy. Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$1.95; 3 lbs., \$5.55.

213—CRANSHAW (90 days)—The most unusual and delicious cantaloupe introduced to date. Egg-shaped and for exquisite sweetness and flavor it is distinctive and its quality has never been approached by any other melon. Medium large about 5 pounds, color green before mature, and distinctly mottled orange and green when ripe. Thus you never pick an immature melon.

Price—Pkt., 10c; oz., 25c; 2 ozs., 40c; ¼ lb., 65c; ½ lb., \$1.15; 1 lb., \$2.25; 3 lbs., \$6.45.

209—GOLD LINED ROCKY FORD (92 days)—Our type of improved Rocky Ford is the finest gold lined strain and if you are growing for home use or nearby markets you will find this melon especially satisfactory. The flesh is thick and solid with a deep gold lining next to the seed cavity, shading to light green toward the rind. For sweetness and spiciness this popular variety is unexcelled.

Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$1.95; 3 lbs., \$5.55.

222—BUCK BRAND (Surprise) (85 days)—The nearest thing to the old-fashioned muskmelon that you can get. Fruit slightly oblong, with a very thin, nearly smooth gray-green skin, distinctly ribbed; flesh thick and of deep salmon color. For flavor and size combined this is the king of all melons. Too large to be profitable except for local market—they often weigh 10 to 12 pounds—they are ideal for home use; one melon is enough for a family. Continues bearing till cold weather and holds its splendid quality up to the very last. Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$1.95; 3 lbs., \$5.55.

CUCUMBER SEEDS

CULTURE—One ounce will plant 50 hills; 1 to 2 pounds will plant 1 acre. Cucumbers succeed best in warm, rich, sandy loam, and should not be planted in open air until warm weather. Plant in hills about 4 feet apart each way, and when early insect injury is past, thin out the plants, leaving 3 or 4 of the strongest to each hill.

All Prices on This Page Post Paid. Quantity Prices—Not Prepaid—See Yellow List.

Early Green Cluster

163—EARLY GREEN CLUSTER (55 days)—A short, blunt, cylindrical pickling sort, does not taper at the ends, fruits borne close in on the vines in clusters. On account of its earliness, perfect shape and firmness, it is probably the most popular of the smaller pickling cucumbers. If kept gathered close it will continue to set fruit through a long season.

Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.05; lb., \$1.95.

158—STRAIGHT 8 (60 days)—All American Selection, 1935—This outstanding variety produces symmetrical, cylindrical fruits about 8 inches in length and about 2¼ inches in diameter. The fruits are well rounded at the end and when ready for use are deep green and free from objectionable striping or tipping. Although its characteristics make it an ideal shipping variety, it is also equally desirable for the home or local market.

Pkt., 5c; oz., 25c; 2 ozs., 40c; ¼ lb., 70c; ½ lb., \$1.20; lb., \$2.25.

160—CHICAGO PICKLE (59 days)—Since introduced this 6 to 6½ inch pickling cucumber has been the most popular of the larger pickling varieties. It is extremely early and when fully developed is excellent for slicing. A very hardy, vigorous, prolific producer of uniform medium green fruits, blunt at both ends.

Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.05; lb., \$1.95.

164—EARLY FORTUNE (64 days)—An especially fine, medium length White Spine Cucumber much planted in the South for shipment to the Northern markets. It has a fine, dark green color which it holds for a long time after picking. Fruits slightly tapering, flesh firm and crisp.

Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.05; lb., \$1.95.

166—IMPROVED LONG GREEN (70 days)—The vines are vigorous and productive; the fruit (12 inches long) is formed almost as early as on the short sorts. The flesh is very firm and crisp and has a distinctive flavor; they make excellent medium large pickles, and when yellow and ripe the best sweet pickles. It enjoys the distinction of being the standard cucumber for home garden.

Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.05; lb., \$1.95.

Colorado or A & C

Marketer

168—MARKETER (65 days)—Highest award of Merit All America trials in 1942. Fruits about 8 inches long, strikingly uniform, dark green even to blossom end. Vine growth vigorous and a prolific bearer of ideal size cucumbers for the home garden and local markets. This new cucumber in both appearance and slicing texture is regarded as nearly perfect as cucumbers come.

Pkt., 5c; oz., 25c; 2 ozs., 40c; ¼ lb., 70c; ½ lb., \$1.20; lb., \$2.25.

161—COLORADO (IMPROVED A & C) (65 days)—The outstanding cucumber for home garden, near or distant market. Vigorous grower, resistant to disease, and produces an abundance of uniformly slender cucumbers, 9 to 10 inches long, with deep green color which it retains well after harvesting. It is gently tapered at both ends; flesh crisp, firm and of superior eating quality with small seed area.

Pkt., 5c; oz., 25c; 2 ozs., 40c; ¼ lb., 70c; ½ lb., \$1.20; lb., \$2.25.

165—IMPROVED WHITE SPINE (60 days)—It is early, crisp and tender, excellent for slicing, pickles well when gathered young. For the home garden it is one of the best as it can be used for all purposes.

Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.05; lb., \$1.95.

159—STAYS GREEN (60 days)—It is one of the earliest and most prolific white spine varieties for home or market. The extremely dark green color is retained well into the mature stage. It has rounded ends, with thick pearly white crisp flesh, which makes it ideal for slicing.

Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.05; lb., \$1.95.

169—CUBIT CUCUMBER (60 days) 1944 WINNER—White spine. A real blue ribbon winner ideal for slicing for the home table, or early market. Cubit is uniformly smooth and very deep green produced on strong, vigorous vines. The flesh is crisp, firm and tender.

Pkt., 10c; oz., 35c; 2 ozs., 60c; ¼ lb., \$1.10

Cubit Cucumber

KALE or BORECOLE

CULTURE—One ounce to 100 feet of row; 4 pounds to the acre. Kale is extensively grown in the South during the fall, winter and spring. Seed may be sown any time from August to October, and again during February and March, broadcast or in drills, 18 inches apart.

187—DWARF CURLED SIBERIAN (65 days)—A very vigorous and rapid growing variety producing an abundance of long large leaves beautifully curled, and frilled at the edges. Very hardy, enduring zero weather without protection. It is even more crisp and tender after subjected to severe weather. The most desirable greens to plant for mid-winter use. Certainly the best variety of Kale.

Pkt., 5c; oz., 10c; 2 ozs., 20c; ¼ lb., 35c; ½ lb., 60c; lb., \$1.00; 5 lbs., \$4.50.

Plant HYBRID SUGAR CORNS for Yield and Quality

All Prices on This Page Post Paid

Quantity Prices—Not Prepaid—See Yellow Price List Enclosed

CULTURE—Same as other Garden Corn (see next page) except that it is planted 2 grains every 12 inches in fertile soil and thinned to 1 stalk per hill.

The varieties we quote have been thoroughly tested in experiment stations and have proven beyond doubt that they are better adapted in the Mid-South than any other hybrid Sugar Corns.

Hybrid Sugar Corns have proved bigger and more uniform yielders and of better quality than open pollinated types. The ears are better filled, of more even size and shape, and two good ears are usually borne to the stalk. In actual tests increased yields of from 10 to 100 per cent have been secured. This is because of better root growth, sturdier stalks and greater disease resistance. If you have been disappointed in Sugar Corn yields in the past be sure to plant Hybrid this year.

142—GOLDEN HYBRID NO. 2439 (87 days)—An exclusive Asgrow development from crossing inbred lines Asgrow 24xP39. Exceptionally valuable to truckers and cannery men and an ideal corn for the home garden. Plant tall, vigorous, uniform, comparatively free from suckers; leaves wide, dark green and numerous. Ears cylindrical, 12-16 rowed, 7¾ in. in length, with long husks affording considerable resistance to ear worm. Kernels lustrous golden yellow, medium-narrow and deep, with tender hull; sweet and of excellent quality. Highly resistant to bacterial wilt.

Price—Pkt., 15c; ½ lb., 35c; 1 lb., 60c; 2 lbs., \$1.10; and 5 lbs., \$2.50; 10 lbs., \$4.75.

133—STOWELL'S EVERGREEN HYBRID (90 days)—Introduced in 1930. Received All-American Special Mention for 1934. Highly valuable to market gardeners, home gardens and canning. It makes an attractive ear of good size and fine quality; the grains are a lustrous pearly white, plump, juicy, sweet and tender. If you take pride in serving something that is really choice and that will attract immediate attention to its quality serve Stowell's Hybrid Evergreen Corn. Stalk sturdy with close growing upright ears, 4 feet from ground; foliage medium green. Ears very slightly tapered, uniform, with 16 to 18 rows. Kernels medium wide and deep.

Price—Pkt., 15c; ½ lb., 35c; 1 lb., 60c; 2 lbs., \$1.10; and 5 lbs., \$2.50; 10 lbs., \$4.75.

139—GOLDEN CROSS BANTAM HYBRID (85 days)—Introduced jointly by the United States Department of Agriculture and Purdue University Agricultural Experiment Station. It is replacing other main crop yellow varieties. Stalk sturdy, with exceptionally broad, vigorous leaves. Ears 10 to 14 rowed, slightly lighter yellow than Golden Bantam. Kernels medium in width and depth. This hybrid is extremely uniform in plant and ear characteristics and in maturity. If you want a yellow corn with a larger ear, that is more productive, and if you want the best and sweetest for your table, plant Hybrid Golden Cross Bantam. Its color is a glistening pale gold and its flavor is unequalled.

Price—Pkt., 15c; ½ lb., 35c; 1 lb., 60c; 2 lbs., \$1.10; 5 lbs., \$2.50; 10 lbs., \$4.75.

CORN EAR WORM CONTROL

The corn ear worm is one of the greatest problems confronting the sweet corn growers. This insect is present in virtually every area of the country where sweet corn is grown, and may be expected as an annual problem to both the large and small grower. The object of Ogen's Corn Ear Worm Drops is to destroy the ear worm larvae that might be present in the interior silk mass before they reach the kernels and also to set up a barrier which will prevent the penetration of larvae that may develop between the time of the treatment and the harvesting of the ears. Ogen's Corn Ear Worm Drops are easy to use. Simply insert the tip of the applicator about ¼ in. into the ear tip and permit several drops to enter into the silk. Being slowly volatile Ogen's Corn Ear Worm control is effective over a long period of time—and giving satisfactory results. Price 2 oz. bottle with applicator 45c postpaid.

CORN EAR WORM DROPS

Larger Sizes

Dow Spray No. 9—½ Pt., 70c; 1 Pt., \$1.05 Postpaid. Applicators, \$1.00 postpaid.

Golden Hybrid No. 2439

Be sure to treat all sweet corn with
SEMESAN, JR.

Golden Cross Bantam Hybrid Sweet Corn

CULTURE

The grains of sugar corn are shriveled and rather tender and cannot be planted until the ground is warm. Make hills 20 to 24 inches apart each way, dropping 5 or 6 grains in each hill, thinning out afterward to 2 or 3 stalks to the hill. A continuous supply can be kept by planting early, medium and late varieties at one time, or by making several plantings at intervals of 15 days. One pound to 200 hills; 10 pounds per acre.

GARDEN, SWEET AND SUGAR CORNS

All Prices on This Page Post Paid
Quantity Prices—Not Prepaid—See Yellow Price List Enclosed

Adams Early Sweet Corn

136—ADAMS LARGE (White Sweet) (75 days)—One of the most popular roasting ear corns. Matures about 10 days later than the Extra Early Adams but the ears are larger and more desirable. The stalks are vigorous, averaging 7 feet in height, and well bladed. This and the Adams Extra Early are very hardy and can be planted earlier than sugar corns. Pkt., 10c; ½ lb., 20c; 1 lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$1.75.

135—EXTRA EARLY ADAMS (White Sweet) (65 days)—Owing to its extreme earliness it is used for a first early table corn in the South. The stalks are about 5 feet high. The ears are short, very full, 12- to 14-rowed, tender, sweet, ends well protected by long, fitting shucks. Pkt., 10c; ½ lb., 20c; 1 lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$1.75.

141—EARLY SURPRISE (White) (75 days)—A wonderful roasting ear corn, especially bred for market gardeners' use; when planted at the same time as Large Adams it is ready for use just when the Large Adams is giving out; it is the best corn to use for successive plantings all through the season. This corn is slightly sweeter than field corn. Average height of stalk about 7 feet; the ear is thick, well grained to the end of the cob; rows of grain straight and uniform. When cut green for market the ears average from 8 to 10 inches in length. It is very productive, producing two good ears to the stalk. Also a splendid early maturing field corn.

Pkt., 10c; ½ lb., 20c; 1 lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$1.75.

Early Surprise

137—TRUCKER'S FAVORITE (White Sweet) (75 days)—For a second early, to follow Early Adams, this is unquestionably one of the best; or for planting late to mature quickly it is equally valuable. It is a white corn, with good depth of grain, tender and sweet, and a most desirable size for roasting ears. Besides being a fine garden corn, it is a splendid field corn to follow potatoes and other early crops. The ears are medium size and well filled.

Pkt., 10c; ½ lb., 20c; 1 lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00; 10 lbs., \$1.75.

134—GOLDEN BANTAM (Yellow Sugar) (80 days)—Very sweet and most delicious extra early corn for the home garden, and very productive. The stalks grow only 5 feet high and, where space is limited, the hills can be as close as 20 inches apart. Each stalk bears 2 or 3 well-filled ears, 6 to 7 inches in length. The kernels are of a beautiful yellow color, very milky, tender and sweet.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75.

138—STOWELL'S EVERGREEN (White Sugar) (85 days)—A standard main crop variety, much used for the home garden, market, and canning. It is hardy and productive, very tender and sugary, remaining a long time in condition suitable for boiling. The ears are about 9 inches long, 16- to 20-rowed, with very white grain. The stalks are about 7½ feet high.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75.

140—COUNTRY GENTLEMAN (White Sugar) (82 days)—One of the best known of the mid-season varieties. Kernels very deep, slender, sweet with tender hull and set irregularly without row formation. It is a good yielder, producing 2 to 3 good-sized ears to the stalk.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75.

132—WHIPPELL'S EARLY YELLOW (Yellow Sugar) (84 days)—A medium early yellow Sugar Corn. Larger than Golden Bantam. Stalks grow 6 to 7 feet, and many produce two large ears. Kernels bright yellow, tender, sweet, and finest quality for table use. Probably the most popular commercial yellow Sugar Corn in the Mid-South.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75.

LETTUCE SEED

Imperial No. 847

203—IMPERIAL No. 847 (H) (80 days)—Well adapted to Southern conditions, producing excellent heads under higher temperature than ordinary heading varieties. Vigorous and resistant to disease. Heads medium large, well formed, compact, crumpled, well covered by inner leaves; exterior light green, interior white, crisp, tender and sweet.

Pkt., 5c; ½ oz., 20c; oz., 30c; 2 ozs., 50c; ¼ lb., 85c; ½ lb., \$1.50; 1 lb., \$2.95.

205—NEW YORK No. 12 OR WONDERFUL—An Improved Early Strain (H) (75 days)—Immense heads, often 10 and 12 inches across, solid as a cabbage; blanches beautifully; crisp, tender; free from bitterness and with few outer leaves. Well adapted to the Mid-South, rooting deeply and resistant to the hot, dry weather.

Pkt., 5c; ½ oz., 20c; oz., 30c; 2 ozs., 50c; ¼ lb., 85c; ½ lb., \$1.50; 1 lb., \$2.95.

MUSTARD SEED

CULTURE—One ounce will sow about 80 feet of drill. For early salad, sow rather thick in February, and at intervals through the spring and fall, in rows 12 inches apart, or in well prepared fertile beds.

243-A—SOUTHERN GIANT CURLED (Long Standing) (30 days)—By careful selection this strain was developed, which will stand 15 to 20 days longer before going to seed. It is equal, or better in every respect, to the old type, and on account of its long standing characteristics is more desirable. Plant large and upright in growth, leaves large, long, curled and fringed on the margin; bright medium light green in color.

Pkt., 5c; oz., 10c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.50.

243—SOUTHERN GIANT CURLED (30 days)—Same as above except does not stand so long before going to seed.

Pkt., 5c; oz., 10c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.50.

244—NEW CHINESE OR ELEPHANT EAR (40 days)—These two popular smooth leaf mustards have always been the same since New Chinese is an improved strain of the long popular Elephant Ear variety. The leaves are medium dark green, smooth, very large and tender. Easily prepared for cooking and very desirable for local market.

Pkt., 5c; oz., 10c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.50.

245—FLORIDA BROADLEAF (40 days)—Large, tall, upright growing plant with exceptionally large, thick bright green leaves, with pale green tender mid rib. Fast growing, very productive and deliciously mild.

Pkt., 5c; oz., 10c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.50.

265—TENDERGREEN OR MUSTARD-SPINACH (25 days)—It is lice resisting. A mild mustard with a delicate pungent flavor that can be grown in three to four weeks, and in almost any season of the year, even during hot summer weather, and makes an abundance of greens. Make a planting every two weeks.

Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c; 5 lbs., \$3.00.

CULTURE—Sow in rich, well prepared soil, as soon as cold winter is past, or start in beds or frames for transplanting in early spring 6 to 12 inches apart, in rows 18 to 20 inches apart. Cover seed ½ inch in beds or outdoors. Seed germinates quickly and growth is best in cool weather. Good heads depend on good seed, keeping a steady growth with fertilization, moisture and cultivation. Light feeding, as with nitrate of soda, after plants have some size, is beneficial. Loose-leaf types may be thinned and used as they become crowded. Those marked "H" are heading; those marked "LL" are loose-leaf. Ounce plants 200 feet of row; use 3 pounds per acre or 1 pound for transplanting. Days given are average from seed to market size.

198—GREAT LAKES (H) (75 days)—All American Winner. Especially valuable as a summer lettuce as it stands the heat and sun. Heads are small, flattened and oblong to triangular in shape. The leaves fold completely over the heads, which are solid even before they attain full size.

Postpaid—Pkt. 10c; ½ oz., 30c; oz., 50c; 2 ozs., 90c; ¼ lb., \$1.65; ½ lb., \$3.10; 1 lb., \$6.00.

196—BIG BOSTON (H) (76 days)—Plants are medium large, very hardy, vigorous and sure heading. Heads medium size, globe shaped, well formed, compact, crisp, tender with buttery-like golden yellow heart. An excellent variety for hot bed and cold frame forcing, and as an outdoor variety withstands much adverse weather.

Pkt., 5c; ½ oz., 15c; oz., 25c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.00; 1 lb., \$1.95.

204—EARLY CURLED SIMPSON (L. L.) (50 days)—A leading early, loose heading variety of fairly large size; leaves form in a compact bunch, crumpled and frilled at the edges.

Pkt., 5c; ½ oz., 15c; oz., 25c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.00; 1 lb., \$1.95.

202—GRAND RAPIDS (L. L.) (45 days)—This is probably the earliest and best of the loose-leaved varieties. It forms no head, but produces an abundant crop of pale green leaves closely crumpled, which, even when old, retain their delicious characteristic sweetness and delicate tenderness.

Pkt., 5c; ½ oz., 15c; oz., 25c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.00; 1 lb., \$1.95.

207—ICEBERG (H) (84 Days)—A large, late, crisp cabbage-heading variety; heads very firm, with the most delicious crisp, tender hearts blanched to a silvery white.

Pkt., 5c; ½ oz., 15c; oz., 25c; 2 ozs., 45c; ¼ lb., 70c; ½ lb., \$1.20; 1 lb., \$2.25.

206—BIBB LETTUCE (65 days)—Truly a lettuce for connoisseurs. Quickly makes loose heads, as big as your fist, dark green, tender brittle and of unsurpassed quality and flavor. Most attractive for individual servings.

Pkt., 10c; ½ oz., 20c; oz., 30c; 2 ozs., 50c; ¼ lb., 85c; ½ lb., \$1.50; 1 lb., \$2.75.

201—CHICKEN LETTUCE (55 days)—Unlike any you have ever grown. Three to four feet high, loaded with leaves that may be pulled like kale. After cutting it keeps on growing. Yields more chicken greens than any other plant.

Pkt., 5c; ½ oz., 10c; oz., 20c; 2 ozs., 30c; ¼ lb., 55c; ½ lb., 95c; 1 lb., \$1.75.

OKRA or GUMBO

CULTURE—Planting should be delayed until after soil is warm. Sow thinly in rows 2½ feet apart, and cover seed about 1 inch deep. When established, thin plants to 12 to 15 inches apart, and cultivate thoroughly. Should be gathered every other day, otherwise the pods become too hard and the young plants discontinue bearing. One ounce will sow 100 feet of row.

251—CLEMSON SPINELESS (55 days)—All American Silver Medal Winner. An okra the commercial and home gardener have long wished for. A smooth podded, spineless strain of large green okra developed at Clemson College after many years of intensive breeding. Being absolutely free of spines there is no discomfort experienced in picking and preparing even large quantities. It is early, very prolific, uniform, of excellent quality and does not bruise easily. Should replace all other green varieties.
Pkt., 5c; 1 oz., 10c; ¼ lb., 30c; ½ lb., 50c; lb., 85c; 2 lbs., \$1.60; 5 lbs., \$3.75.

249—WHITE VELVET (60 days)—Long popular throughout the South for home and local markets. Pods round, white and smooth. Prolific and bears throughout the summer.
Pkt., 5c; 1 oz., 10c; ¼ lb., 30c; ½ lb., 45c; lb., 75c; 2 lbs., \$1.40; 5 lbs., \$3.25.

250—EARLY DWARF GREEN LONG POD (50 days)—Stalk rather dwarf, pods good size which begin to form early and bear freely; tender and of the best quality. An old variety but still unsurpassed for home gardens and local markets.
Pkt., 5c; 1 oz., 10c; ¼ lb., 30c; ½ lb., 45c; lb., 75c; 2 lbs., \$1.40; 5 lbs., \$3.25

248—TALL OR LONG GREEN (56 days)—Pods dark green, very large and long. Yields heavily over a long period if pods are picked regularly; meaty and very tender.
Pkt., 5c; 1 oz., 10c; ¼ lb., 30c; ½ lb., 45c; lb., 75c; 2 lbs., \$1.40; 5 lbs., \$3.25

Clemson
Spineless Okra

247—WHITE LIGHTNING SPINELESS (50 days)—An excellent development of the White Velvet type for the home garden and local market. It is an extra early, smooth and exceptionally long, tapering round, white-podded okra bearing 7 to 10 days ahead of White Velvet. The meaty pods stay tender to much larger size than other varieties. The only White okra that is free of the undesirable and annoying spines.

Pkt., 5c; 1 oz., 10c; ¼ lb., 30c; ½ lb., 45c; lb., 75c; 2 lbs., \$1.40; 5 lbs., \$3.25

ONION SEED

CULTURE—In February, March and April plant thickly ½ inch deep in hotbeds or plant outside later. When the size of a goose quill transplant 3 to 4 inches apart in 15- to 18-inch rows. Plantings may also be made where the onions are to grow, thinning out to stand 3 to 4 inches apart, but the transplanting method saves seed, at least two weedings, and gives larger yields.

ONION SETS

Red-White-Yellow

1 lb., 30c; 4 lbs., 85c; 8 lbs., \$1.50

GARLIC SETS

¼ lb., 25c; ½ lb., 45c; 1 lb., 75c;
5 lbs., \$3.25

262—WHITE BERMUDA CRYSTAL WAX (92 days from seed)—Early maturing, therefore, easily produced from seed. Bulbs flat, medium size, clear, waxy white; of mild, sweet flavor. Deserves its popularity.
Pkt., 10c; ½ oz., 20c; oz., 35c; 2 ozs., 60c; ¼ lb., \$1.10; ½ lb., \$2.05; lb., \$3.95

278—YELLOW BERMUDA (92 days from seed)—Bulbs are a light straw-yellow color, medium sized, flat. Flesh is extremely mild and sweet. Try growing onions from seed. You will find they keep much better.
Pkt., 10c; ½ oz., 20c; oz., 30c; 2 ozs., 55c; ¼ lb., \$1.00; ½ lb., \$1.85; lb., \$3.50

257—YELLOW SWEET SPANISH—Large and distinctly globe shaped, with golden yellow skin; flesh white, mild, very sweet and of pleasing flavor, desirable for shipping and fall storage.
Pkt., 10c; ½ oz., 30c; oz., 50c; 2 ozs., 85c; ¼ lb., \$1.60; ½ lb., \$3.05; lb., \$5.95

258—YELLOW GLOBE DANVERS (112 days from seed)—Handsome, pale yellow globe onion, medium large; flesh white, fine flavor, mild; a good keeper.
Pkt., 10c; ½ oz., 25c; oz., 40c; 2 ozs., 70c; ¼ lb., \$1.25; ½ lb., \$2.25; lb., \$4.25

263—PRIZETAKER (102 days from seed)—Bulbs large, globe shaped; straw colored skin thin and glossy. Flesh pure white and mild. Stores well. One of the best globe shaped onion for local market.
Pkt., 10c; ½ oz., 30c; oz., 50c; 2 ozs., 85c; ¼ lb., \$1.60; ½ lb., \$3.05; lb., \$5.95

273—EBENEZER (Japanese) (90 days from seed)—The onions are large, somewhat flattened, have attractive yellow skin and firm white flesh of delicate flavor. Keeps better than any other good quality onion.
Pkt., 10c; ½ oz., 30c; oz., 50c; 2 ozs., 85c; ¼ lb., \$1.60; ½ lb., \$3.05; lb., \$5.95

PARSLEY

CULTURE—As the seed is slow to germinate, soak in water a few hours before planting. Sow in rows 12 inches apart, covering not more than ¼ inch with fine soil firmly pressed down. When well up, thin to 4 to 6 inches apart in the rows. One ounce will sow 150 feet of row; 5 to 6 pounds, an acre. There are about 17,000 Parsley Seed in one ounce.

274—DOUBLE CURLED—Compact growth, leaves dark green, finely cut and frilled. Without a doubt the most attractive garnishing and widely used for flavoring soups and stews. A cut and come-again plant.
Pkt., 5c; 1 oz., 15c; 2 ozs., 25c; ¼ lb., 40c; ½ lb., 70c; lb., \$1.25

PARSNIPS

CULTURE—Sow early in rows 1½ to 2 feet apart; cover with ¼ inch of soil. When well up, thin to 6 inches apart. Seed germinates slowly. Keep ground moist. One ounce will sow 100 feet of row; 3 to 5 pounds, an acre. There are about 2,000 Parsnip seed in one ounce.

280—SUGAR OR HOLLOW CROWN (100 days)—The standard variety, making long, smooth, white roots, uniform in shape, tender and well flavored.

Pkt., 5c; 1 oz., 15c; 2 ozs., 25c; ¼ lb., 40c; ½ lb., 70c; lb., \$1.25

Mammoth Yellow Prizetaker Onion

BUCK BRAND TESTED SEEDS

BUCHANAN'S GARDEN PEAS

All Wrinkled Varieties Are Marked (*)

CULTURE—The pea endures cold well, either in or above the ground. It is best to sow the earliest varieties as soon as possible (February), wrinkled varieties should be planted later, in warm, light soil, prepared the previous autumn or winter. The main crop may be sown about two weeks later. Sow peas in drills about 2 to 3 inches deep in rows 2½ to 3 feet apart. Pound sows 100 feet of drill, 75 pounds to an acre.

DWARF EARLY VARIETIES

284—ALASKA—(52 days; height 28 inches) Fully Wilt Resistant.—Our stock noted for its pod size and productivity. Pods 3 inches, blunt, light green, plump; seed smooth, green, used for extra early planting for home or shipping. Of excellent flavor, and a favorite of the South.

Pkt., 10c; ½ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25; 10 lbs., \$2.25

283—LAXTONIAN* (55 days; height 18 inches)—A fine combination of earliness, productiveness and extra fine quality. Produces large dark green pods 4½ inches long, containing 6 to 8 large, delicious peas.

Pkt., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

297—LAXTON'S PROGRESS* (55 days; height 15 inches)—Largest podded and heaviest yielder of the extra early wrinkled peas. Pods 4½ to 5 inches, are well filled with 7 to 9 sweet, luscious peas. For home use they have no superior. They retain their dark green color well for shipping or local market.

Pkt., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

286—FIRST AND BEST OR JOHN L. (54 days; height 28 inches)—Very hardy so can be planted early. A good early producer bearing pods well filled with tender good quality peas—One of the better early peas for home use.

Pkt., 10c; ½ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25; 10 lbs., \$2.25

SECOND EARLY

295—THOMAS LAXTON* (60 days; height 2½ feet)—Exceptionally fine wrinkled pea with dark green pods nearly 4 inches long that are packed with peas, often 7 to 8 to the pod. Quite hardy and very prolific. Flavor is pleasing and peas retain their tenderness. Unquestionably the best second early variety for professional growers, home use and freezing.

Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

287—AMERICAN WONDER* (58 days; height 12 inches)—Very dwarf, sturdy vines which need no sticking—An abundant producer of medium length pods of 5 or 6 peas of excellent quality.

Pkt., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

288—AMEER OR LARGE ALASKA (58 days; height 30 inches)—Pods 3½ inches. Wilt resistant. Taller, larger pods than Early Alaska and more productive. Hardiness permits early planting. Sure cropper.

Pkt., 10c; ½ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25; 10 lbs., \$2.25

290—PREMIUM GEM* (60 days; height 22 inches)—An excellent, medium early, wilt resistant home garden variety. An old variety still popular because of its exceptional quality and yield.

Pkt., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

MAIN CROP

293—TALL TELEPHONE* (Improved Wilt Resistant) (74 days; height 48 inches)—Pod 5½ inches long. Our improved Telephones are longer, larger podded, much darker green and more deliciously flavored. The broad, plump, pods contain 8 to 10 peas of highest quality. This heavy producing strain is the standard by which other tall peas are judged.

Pkt., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

294—LARGE WHITE MARROWFAT (Wilt Resistant) (80 days; height 55 inches)—Pods 3½ inches, large, light green, blunt. Better adapted than other varieties for late planting. Not as sweet as the wrinkled varieties, but the most productive of all garden peas. Will out-yield all others on poor ground.

Pkt., 10c; ½ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25; 10 lbs., \$2.25

298—BLISS EVERBEARING* (Wilt Resistant) (70 days; height 32 inches)—Pods 3 inches. Vines branch successively, thus making it a heavy and prolonged bearer. Peas of good size and sweet marrowy flavor. No home garden should be without it.

Pkt., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

285—DWARF TELEPHONE* (Wilt Resistant) (72 days; height 24 inches)—A dwarf type of Tall Telephone; the best main crop, dwarf pea which produces well without sticking. Plant stocky and branching, bearing abundant long pods (about 4½ inches) that frequently contain 7 to 8 big, luscious, sweet peas.

Pkt., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75

BUCK BRAND TESTED SEEDS

BUCHANAN'S SOUTHERN GROWN TABLE PEAS

The prices on Cowpeas, Field Beans and Edible Cowpeas are constantly changing, and it is impossible to quote prices on quantities when this catalogue is printed, but in season we will quote prices promptly upon receipt of your inquiry asking for same.

PEAS—For field planting it requires 2 to 3 gallons drilled to the acre; broadcast, 1 to 2 bushels per acre—60 pounds to bushel; all peas are legume plants and should be inoculated before planting. Please give second choice when ordering table peas. Some varieties are very scarce.

Prices on This Page Post Paid Through Third Zone

Quantity Prices—See Yellow Price List Enclosed

Many of these peas are grown for seed in limited areas only and due to localized adverse weather conditions some varieties are always scarce. Please send or bring samples of any peas quoted here that you have for sale.

1241—WHITE OR CREAM CROWDER (Semi-Dwarf)—Seed have brown eye, very sweet. Considered best of the Crowders for home or market. Planted with corn, one row corn one row peas (one peck to acre), will produce usual amount corn and 10 to 20 bushels peas; thrive on clay or on sandy loam land. Mature green peas in 85 to 90 days; dry peas, 100 to 110 days. About 2,200 seed to pound.

Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75

1242—RICE OR CREAM (Semi-Dwarf)—Early. Similar to Gallivant or Lady, but larger, very popular, better flavor than Blackeye; fine to eat during winter; kidney shaped with pale white eye. Green peas, 80 days; mature peas in 95 days. Seed usually scarce. About 2,400 seed to each pound.

Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75

1243—EXTRA EARLY BLACKEYE (Dwarf)—Often called Small or Six Weeks Blackeye. This is the earliest of all Blackeye Peas. It is a prolific bearer of sweet, tender, delicious green peas. For dried winter use plant in early August. About 3,100 peas in one pound.

Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75

1244—PURPLE HULL (Semi-Dwarf)—A most desirable all purpose pea, produces green peas in 75 days, dried peas in 90 days. Plant stocky, supporting itself well, producing an abundance of long, well filled pods which are easily picked. A prolific bearer of sweet, tender, delicious green peas and are also excellent for dried peas. About 3,000 peas in pound.

Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75

1246—GALLIVANT OR LADY (Running)—Small white pea with pale white eye. There are more of these peas sold on the Southern markets than any other of the small white peas. Fine flavor; superior to Blackeye peas and very prolific. Green peas in 90 days, dried peas in 105 days. About 5,800 seed per pound.

Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75

1247—CALICO (Running)—White pea with red splotches, known in some sections as Coat and Jacket, Joseph Coat, Pole Cat, Arkansas Traveler, and World Wonder, and Wild Goose. If planted in April or May in corn, dropping peas same time as corn they will make a pod 12 to 14 inches long, filled with large peas. You can pick them all through the summer as they ripen, as they will bear until frost kills the vines; good flavor and not as strong as most dark peas. About 2,900 peas in one pound.

Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75

1248—BROWN SUGAR CROWDER (Semi-Dwarf)—Will bunch on poor ground, make some vine on good soil, earlier and sometimes larger than the White or Cream Crowder; very prolific. More certain to produce than any other Crowder. Green peas, 80 days, and dried peas in 100 days. There are about 2,000 peas in one pound.

Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75

1245—CALIFORNIA OR LARGE BLACKEYE (Running). —Pods contain from 10 to 14 seed. Plant is vigorous and is highly resistant to cow pea wilt. Since Blackeyes are the most popular peas planted for dried winter use, it will pay you to plant this superior strain. About 2,000 peas in a pound.

Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75

1250—CONCH OR ACRE (Running)—Seed small white with pale white eye. They are early, a shy seeder but superior in quality, and when green can be snapped and cooked like beans. Green peas in about 80 days, dried peas about 95 days. There are about 3,500 seed in one pound.

Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75

1251—GREY OR SILVER CROWDER (Semi-Dwarf)—Seed are grayish brown and have a silver cast like some Whip-poor-wills. Produce very large, fine flavored green peas. Most always scarce; make green peas in about 90 days, dried peas about 100 days. There are about 1,500 peas in one pound.

Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75

1255—RAMSHORN BLACKEYE WILT RESISTANT (Semi-dwarf)—Produces green peas in about 70 days; dried peas in 85 days. The peas are much larger than the average California Blackeye and have a very delicious, tasty flavor green or dried. This new variety has leaped into popularity on account of its large peas, extremely long pods, its heavy yields and resistance to disease. Don't fail to plant this sure cropper.

Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75

1253—SMALL CREAM CROWDER (Bunch); also called Six Weeks or Two Crop.—Will produce green table peas in six weeks; while we do not consider it superior to large cream crowder, it is equally as good and its earliness makes it more desirable to plant for early market. Matures dried peas in about 65 days; will make two crops on good land in one season. There are about 5,300 seed in one pound.

Pkt., 10c; ½ lb., 30c; lb., 50c; 2 lbs., 90c; 5 lbs., \$2.00

1254—TAYLOR OR BLUE GOOSE (Running)—Also known as Grey Goose.—A very prolific yielder, and fine flavored, producing green peas in about 70 days and dried peas 80 to 85 days. Seeds large speckled and produce long pods, said by many to be the largest of all Southern table peas when green. There are about 1,800 seed in one pound.

Pkt., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75

EDIBLE SOY BEANS

See page 7

ALMOST MEAT WITHOUT A BONE

SWEET AND HOT PEPPERS

CULTURE—One ounce will produce about 1,000 plants. For early plants, sow in hotbeds the latter part of January, and transplant to open ground after all danger of frost is over, in rows 3 feet apart, 18 to 24 inches apart in the rows. Practice clean, shallow cultivation and apply a side dressing of complete fertilizer when plants are 6 to 8 inches tall.

All Prices on This Page Post Paid
Quantity Prices—See Yellow Price List Enclosed

Days Given Below Are From Time of Transplanting

296—CALIFORNIA WONDER (Extra Select) (Sweet) (70 days)—Plants are stocky and sturdy, vigorous and prolific over a long season. Fruits are borne upright, averaging 4 inches long and 3½ inches wide, with only a very slight taper to mostly 4 points. The outside of the fruits is very smooth. Color bright, dark green changing to brilliant crimson. The flesh is extremely thick and firm, sweet throughout and distinct flavor. One of the finest for stuffing. Extra Select California Wonder differs from regular California Wonder in being earlier in maturity, and with heavier yields. The finest green pepper grown by the oldest seed house in the United States. It packs well, ships well, holds up well.

Pkt., 15c; ½ oz., 50c; oz., 85c; ¼ lb., \$2.90; ½ lb., \$5.50; 1 lb., \$10.00.

300—CALIFORNIA WONDER (Not Certified) (75 days)—Almost as large as Chinese Giant, short, blocky and square ended, splendid for stuffing, baking or serving with salad filling. Very mild, sweet, thick walled and an excellent shipper.

Pkt., 10c; ½ oz., 30c; oz., 50c; ¼ lb., \$1.75; ½ lb., \$3.35; 1 lb., \$6.50

305—WORLD BEATER (73 days)—Vigorous, sure cropper and very prolific. Fruits large, glossy, dark green, exceedingly mild; mostly four-lobed, flesh thick, firm and an excellent shipper.

Pkt., 10c; ½ oz., 25c; oz., 45c; ¼ lb., \$1.50; ½ lb., \$2.85; 1 lb., \$5.50

301—ROYAL KING (Sweet) (73 days)—It grows to a large size, is very mild, is of a bright green color changing to scarlet. The flesh is thick, meaty and fine flavored. Very prolific and one of the most desirable sweet peppers.

Pt., 10c; ½ oz., 25c; oz., 45c; ¼ lb., \$1.50; ½ lb., \$2.85; 1 lb., \$5.50

303—CHINESE GIANT (Sweet) (80 days)—The ideal home garden pepper. The stocky, vigorous plants produce enormous fruits 4 to 5 inches in diameter and equally as long, and the color is a glistening dark green turning to a rich scarlet; flesh is deliciously sweet, mild, crisp, and of excellent quality.

Pkt., 10c; ½ oz., 30c; oz., 50c; ¼ lb., \$1.75; ½ lb., \$3.35; 1 lb., \$6.50.

302—BELL OR BULL NOSE (Sweet) (66 days)—Ripens early and uniformly; large fruits with thick, mild flesh of excellent quality. Very productive. A splendid variety for home use and early market.

Pt., 10c; ½ oz., 25c; oz., 45c; ¼ lb., \$1.50; ½ lb., \$2.85; 1 lb., \$5.50

304—LONG RED CAYENNE (65 days)—The most desirable long, hot pepper. It is a medium early sort having a slender, twisted and pointed pod about 5 inches long. A bright red color when ripe. Equally splendid for seasoning when green as when dried for winter use.

Pt., 10c; ½ oz., 25c; oz., 45c; ¼ lb., \$1.50; ½ lb., \$2.85; 1 lb., \$5.50

312—PIMENTO (Sweet) (70 days)—Mostly used for canning, for seasoning and flavoring, also garnishing, but can be stuffed and baked. It has the most delicate, mild sweet flavor of any pepper. It is very smooth, heart-shaped tapering to a single point; dark green turning to a bright crimson.

Pt., 10c; ½ oz., 25c; oz., 45c; ¼ lb., \$1.50; ½ lb., \$2.85; 1 lb., \$5.50

308—RED CHILI PEPPER (80 days)—A very hot, pungent, bright red pepper used for flavoring. Dwarf growing, with slender, pointed fruits about one inch long; very prolific.

Pkt., 10c; ½ oz., 30c; oz., 55c; 2 ozs., \$1.00; ¼ lb., \$1.85

PUMPKIN SEED

CULTURE—One ounce will plant 20 hills; 3 pounds will plant 1 acre. Plant in hills 8 to 10 feet apart each way; 4 seeds to the hill. For a good crop the soil should be rich. Cultivate same as cucumbers or melons. Pumpkins should not be planted in the garden, as they will readily mix with squash. Plant in corn, about 15 feet apart.

All Prices on This Page Post Paid

316—KING OF THE MAMMOTH (115 days)—A giant among pumpkins. Used largely for stock feeding and exhibition purposes. Fruits occasionally weigh 100 pounds. Flesh solid; thick and deep orange in color; good keeper.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 50c; $\frac{1}{2}$ lb., 85c; 1 lb., \$1.50; 5 lbs., \$7.00

314—KENTUCKY FIELD (110 days)—Our stock especially grown for seed purposes. Fruit large, slightly ribbed, dull orange, flattened to round. Deep yellow, of good flavor. Excellent for pies, canning and stock feed. Vigorous, prolific, good keeper, about 20 pounds.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 50c; 5 lbs., \$2.50

315—CUSHAW (Green Striped) (110 days)—The fruits are crooknecked. The rind is cream mottled with irregular green stripes. Weight about 12 pounds. A fine table pumpkin and equally good for stock. Large and very productive; meat is rich, yellow, tender, of the best flavor, very sweet and good keeper.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.25; 5 lbs., \$5.75

313—SMALL SUGAR (100 days)—Not large, but one of the sweetest and best for pies; fine grained, deliciously sweet and a good keeper; flesh rich, deep orange-yellow.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.25; 5 lbs., \$5.75

318—DICKINSON—The finest pumpkin for canning and feeding; the flesh is extraordinarily thick, being twice or three times as thick as other pumpkins. It has an unusual, brilliant, deep gold color that is unique. It is one of the few pumpkins that can be canned without the addition of sugar.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 50c; $\frac{1}{2}$ lb., 85c; 1 lb., \$1.50; 5 lbs., \$7.00

317—TENNESSEE SWEET POTATO (110 days)—Fruits are pear-shaped. The creamy yellow flesh is very thick, fine grained, very sweet and delicious and like the sweet potato in flavor. A first class keeper and good yielder. Weight about 15 pounds.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.25; 5 lbs., \$5.75

BUCHANAN'S RADISH SEEDS

CULTURE—Sow in open ground in spring, as soon as the soil can be worked. Sow in rich sandy loam, in drills 18 inches apart; thin plants to prevent crowding. Keep the soil loose and apply a little nitrate of soda. Successive plantings should be made every 10 days or 2 weeks to keep up a continuous supply of crisp and tender radishes. For early use plant the round or button radishes and olive shaped. For later use plant the long and half-long varieties. Sow one ounce of seed to 100 feet of row.

344—SPARKLER (New Perfection Half White) (25 days)—The perfected white tip. The white portion extends farther up than on ordinary white tip. The brilliant scarlet red affords a distinct contrast to the large white portion. It is turnip shape, very uniform, with crisp, tender, sparkling flesh. Ideal for home garden and marketing, as it retains superb crispness over a long period.

339—EARLY SCARLET TURNIP (White Tipped) (25 days)—The long used standard white tip. Roots nearly round with small tap root; bright red with small white tip. Flesh white crisp and mild.

351—EARLY SCARLET GLOBE (23 days)—Slightly olive-shaped, with white, tender, crisp flesh and rich, bright scarlet-red skin. Excellent for home use and especially recommended for gardeners because of its earliness, uniformity of size and short top which is strong enough to bunch well.

350—FRENCH BREAKFAST (25 days)—Early, half long, deep scarlet radish with white bottoms. Flesh white, crisp. Best of the half long type.

346—WHITE ICICLE (27 days)—Best early long white variety. Adapted to early spring plantings since it remains crisp and tender longer than any other radish. Its hardiness makes it popular for fall planting also. Roots 5 to 5½ inches long, snowy white outside with brittle, tender, glistening white flesh of mild, inviting flavor.

343—LONG SCARLET SHORT TOP (27 days)—Roots smooth, uniform, 5 to 6 inches, tapering, dark scarlet with small tops and white, crisp flesh. Best long red type.

353—MIXED RADISHES (26 to 30 days)—Assorted, giving a succession of crisp, tender radishes over a long period.

349—LONG BLACK SPANISH (50 days)—One of the hardiest and best winter keeping varieties. Large firm; jet black skin, flesh snow white; exceedingly crisp and free of pithiness.

348—CHINA ROSE WINTER (50 days)—Skin in deep rose color, flesh pure white, firm and crisp. Good keeper. The most popular winter radish.

Prices on All Above Varieties Radishes

Pkt., 5c; oz., 10c; 2 ozs., 15c; $\frac{1}{4}$ lb., 25c; $\frac{1}{2}$ lb., 45c; 1 lb., 80c; 5 lbs., \$3.50

Dickinson

Buchanan's French Breakfast Radish

Sparkler

SPINACH SEED

CULTURE—One ounce to 60 feet to drill. For an early crop, sow early in the spring, in drills, 1 foot apart, and thin out to 2 inches in the row. For winter and early spring crop, sow either broadcast or in drills about the first of September to November.

FOR FIELDS—Plant in drills, 10 pounds per acre. Produces enormously and is one of the South's best quick money crops.

Bloomsdale Spinach

354—RESELECTED BLOOMSDALE SAVOY (42 days)—Leaves well rounded, much crumpled and blistered, glossy, and of a deep green color. Early, vigorous and good shipper. Recommended for planting in the fall and early spring. It is used extensively by both market and home gardeners, and is of high quality.

Pkt., 5c; 1 oz., 10c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.50

358—LONG STANDING BLOOMSDALE (Savoy Leaved) (45 days)—Very long standing. Leaves are intensely crumpled and blistered, glossy, of a dark green color, and well rounded. Plant large, very uniformly compact, erect, sturdy and will remain in good condition from 12 to 14 days longer before running to seed. Especially desirable for spring planting.

Pkt., 5c; 1 oz., 10c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.50

361—NEW ZEALAND (60 days)—Does well on almost any type soil and thrives in hot, dry weather, when most greens are scarce, if spaced about 18 inches in the row. Cut and come again variety that bears until frost.

Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 75c; 1 lb., \$1.45

357—GIANT NOBEL (45 days)—Plant large, spreading and upright in growth. Slow to form seed stalks and an extremely heavy yielder. Leaves very large, thick, smooth, and tender with rounded tips. The best of the smooth leaf varieties for market, home use; decidedly superior for canning.

Pkt., 5c; 1 oz., 10c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.50

SQUASH SEED

Summer Squash, 1 ounce plants 35 hills; 4 to 5 pounds an acre

Winter Squash, 1 ounce plants 35 hills; 3 to 4 pounds an acre.

CULTURE—After danger of frost is past, plant in a warm, well-pulverized rich soil, mixing well-rotted manure in each hill. Plant about 1 inch deep, 6 to 8 seeds to the hill, the summer varieties 3 to 4 feet apart, the winter sorts 8 to 10 feet. When well established, thin out, leaving 3 of the strongest plants in each hill.

Golden Custard

White Bush Squash

Dust pumpkin and squash, when young, with Dutox to control beetle injury.

Golden Summer Crookneck Squash

363—EARLY PROLIFIC STRAIGHTNECK (50 days)—Winner 1938 All America Award. New, high yielding summer squash, earlier than Giant Straightneck, which it replaces. Fruits straight, smooth and of bright, deep lemon yellow color. Its rich, buttery flavor is unsurpassed in squash. It is firm with a pronounced flavor when young and remains tender until very large.

Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25; 5 lbs., \$5.75

367—GOLDEN CUSTARD (58 days)—Like White Bush except its golden color and richer flavor.

Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25; 5 lbs., \$5.75

374—HUBBARD (100 days)—One of the best winter squashes; flesh bright orange-yellow, fine-grained; very dry and sweet.

Pkt., 5c; oz., 20c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50; 5 lbs., \$7.00

368—EARLY WHITE BUSH (53 days)—The well known White Scalloped Squash. One of the earliest; very productive; skin and flesh a light cream color, tender and of the highest quality. Cooks quickly.

Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25; 5 lbs., \$5.75

371—EARLY GOLDEN SUMMER CROOKNECK (52 days)—Bush variety, early, profuse and prolonged bearer; golden yellow, with a pronounced, true, rich squash flavor.

Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25; 5 lbs., \$5.75

372—GIANT YELLOW CROOKNECK (58 days)—Fruit is large, bright yellow, thick flesh. This squash offers unusual size without sacrificing good quality.

Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25; 5 lbs., \$5.75

BUCHANAN'S TURNIP SEEDS

CULTURE—One ounce will sow 100 feet in drill; 2 to 3 pounds for an acre. For early use, sow seed in open ground in spring, in drills 1 foot or more apart, using seed sparingly. Thin to 3 or 4 inches apart. For succession sow every two weeks until May. For fall and winter, sow in August and until November. A good crop may be grown by scattering seed in corn field at last cultivation.

408—SHOGGIN (Louse-Resistant)—Resists heat, dry weather, and insect attacks. Quickly produces an enormous yield of upright-growing, succulent foliage, which is crisp, tender, and of superb mild flavor. The "greens" are ready for use in 25 days. Roots are large, pure white, semi-globular, and of a most excellent quality. A great dual purpose turnip.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; $\frac{1}{2}$ lb., 40c; 1 lb., 70c; 5 lbs., \$3.25

401—PURPLE TOP WHITE GLOBE—An all-purpose variety, extensively used for home and market gardens and for shipping. Our purebred strain is noted for its uniformity and productivity. Tops dark green, large, erect. Roots large, globe shaped, very smooth, upper part purple, white below. Flesh white, sweet, crisp and tender.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 30c; 1 lb., 50c; 5 lbs., \$2.25

395—LARGE WHITE GLOBE—Skin and flesh pure white. An excellent producer of good quality greens and turnips.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 30c; 1 lb., 50c; 5 lbs., \$2.25

399—PURPLE TOP FLAT STRAP LEAF—A desirable early, flat, sweet, tender turnip for spring planting.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 30c; 1 lb., 50c; 5 lbs., \$2.25

400—SEVEN TOP—Used exclusively for greens; will grow all winter. Can be planted spring or fall.

Most resistant to cold and will supply an abundance of greens throughout the fall and winter.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 15c; $\frac{1}{2}$ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75

404—SOUTHERN PRIZE—Very desirable for winter and spring greens. Similar to Seven Top, but the leaves grow more upright and larger. Not quite so hardy as Seven Top, but a heavy producer of delicious salad.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 30c; 1 lb., 50c; 5 lbs., \$2.25

405—BUCHANAN'S MIXED TURNIP—Mixture of all sorts, giving a variety of turnips, roots and tops, from fall to spring, from one sowing.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 15c; $\frac{1}{2}$ lb., 25c; 1 lb., 45c; 5 lbs., \$2.00

411—PURPLE TOP YELLOW ABERDEEN—A yellow-fleshed late turnip; sweet, tender, good keeper.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c; 5 lbs., \$2.75

413—AMBER GLOBE—The best yellow fleshed turnip. Very hardy fine grained, tender and sweet.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c; 5 lbs., \$2.75

414—LONG WHITE COW HORN—A purple top long white variety, growing in shape similar to a cow's horn.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c; 5 lbs., \$2.75

406—EARLY WHITE EGG (55-60 days)—Splendid home and market sort. Tops erect, fairly compact, cut-leaved. Roots egg shaped, white, smooth, grow one-half above ground. Flesh white, firm, fine grained, sweet and tender.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c; 5 lbs., \$2.75

SALSIFY—THE VEGETABLE OYSTER

364—MAMMOTH SANDWICH ISLAND—Plant seed in early spring in rich, loamy, deep soil and thin to 3 inches apart. Cultivate cleanly all summer and dig as needed through fall and winter. This is a large and vigorous strain with long, white tapering roots, less likely to branch, with flavor resembling oysters. Fine for home garden or market.

Pkt., 10c; oz., 40c; 2 ozs., 70c; $\frac{1}{4}$ lb., \$1.25; $\frac{1}{2}$ lb., \$2.35; 1 lb., \$4.50.

Rutabagas

418—RUTABAGA—IMPROVED PURPLE TOP YELLOW—Grows the same shape and size as Purple Top Globe Turnips. Color of skin, yellow with purple crown. Flesh deep yellow, fine grain and of excellent quality. It is an excellent keeper.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c; 5 lbs., \$2.75

Purple Top Globe

TOBACCO

CULTURE—The seed should be sown as soon as possible after danger of frost is over. When the plants are 6 inches high, transplant into rows 3 feet apart each way.

365—WHITE BURLEY—Heavy yielding. Rich broad leaves. Easy to cure. Desirable for cut or plug tobacco.

366—HAVANA—Large, long leaves. Of fine texture and delightful flavor. One of the earliest.

Price, either variety—Pkt., 10c; $\frac{1}{2}$ oz., 35c; 1 oz., 60c; 2 oz., \$1.00.

Certified Master Marglobe

384—CERTIFIED MASTER MARGLOBE (Bright Deep Red) (Wilt and Rust Resistant) (80 days)—Master Marglobe has been perfected by individual plant selection. We believe this strain is without doubt the most perfect all-purpose Tomato thus far. Its large, nearly round, smooth, solid fruits are ideal for home use and local market. It also ranks first as a green wrapped shipper. The flavor will please the most discriminating taste. The partitions which divide the small seed cavities and the outer wall are thick, meaty and firm. Vine is sturdy, carrying the fruit well, with sufficient foliage to protect its fruit. In Master Marglobe we offer a tomato, probably the most resistant to wilt, rust and blight.

Pkt., 10c; ½ oz., 30c; 1 oz., 50c; ¼ lb., \$1.60; ½ lb., \$3.05; 1 lb., \$5.95.

Certified Greater Baltimore

376—CERTIFIED RUTGERS (Rich Red) (Wilt and Rust Resistant) (72 days)—Rutgers produces a rather large plant, so strong that it withstands wind and rain better than any other variety, supporting its abundant crop perfectly. On good, rich land, heavy applications of nitrogen should not be made. Abundance of foliage serves as ample protection from sunscald of the fruits. The fruits being larger than Marglobe, tend to flatten out more. The internal structure is as good as our Marglobe, having thick outer and inner walls, and very small seed cavities. The internal color is darker red than Marglobe. Rutgers makes juice of low acidity and fine flavor, intermediate between the sweet Marglobe and the very tart late varieties. It is a good canning tomato. Rutgers will yield as well as Marglobe, and on light, sandy soil will surpass this variety.

Pkt., 10c; ½ oz., 25c; 1 oz., 40c; ¼ lb., \$1.25; ½ lb., \$2.35; 1 lb., \$4.50.

396—CERTIFIED BREAK O'DAY (Deep Scarlet) (Wilt and Rust Resistant) (70 days)—Its outstanding features are earliness and productiveness. It resembles Marglobe in shape, depth of fruit, thickness of wall and color, both inside and outside. The fruits are of medium size, deep, solid and almost seedless.

Pkt., 10c; ½ oz., 30c; 1 oz., 50c; ¼ lb., \$1.60; ½ lb., \$3.05; 1 lb., \$5.95.

BUCHANAN'S TOMATO SEEDS

CULTURE—Six or eight weeks before frost is over, sow ¼ inch deep in hot-beds, in pots or shallow boxes in the house, and when they have made 4 leaves, transplant to boxes or pots to promote root growth. Expose as much as possible to harden them so that, when set out in the open ground, they will be strong and stocky, but do not allow the growth to be checked. Transplant 3 to 4 feet apart in a light, warm soil, and shade them a few days until they are well rooted. One ounce makes about 1,000 strong plants; 4 ounces will make plants for an acre.

FOR FIELD PLANTING—Set plants 3 feet apart in rows 4 feet apart; require 3,600 plants to acre.

Maturity estimated from time plants set in field.

All Prices on Tomatoes Post Paid. Quantity Prices—See Yellow Price List Enclosed

392—CERTIFIED GREATER BALTIMORE (Scarlet Fruit) (83 days)—Mid-season variety of great merit; very heavy, due to extreme firmness and very thick meat. The fruit ripens evenly and is free from ridges and cracks, making it one of the best canning tomatoes. It is dependable, producing heavily under bad weather and soil conditions where many would fail. It is considered more certain to produce a heavy fall crop than any other tomato. It is also very well suited for home gardens and markets because of its attractive appearance. Our special certified seed insures to you the very finest crops your soil and season will allow.

Pkt., 10c; ½ oz., 25c; 1 oz., 40c; ¼ lb., \$1.25; ½ lb., \$2.35; 1 lb., \$4.50

380—CERTIFIED MARGLOBE (Deep Red) (79 days)—Our certified Marglobe was field inspected and certified as being uniformly true to type and disease resistant. A heavy producing strain of large smooth, beautiful globe shaped fruits most desirable for table use, canning, juicing and marketing. The fruits have thick, firm walls and partitions with small seed pockets; flavor mild.

Pkt., 10c; ½ oz., 25c; 1 oz., 40c; ¼ lb., \$1.25; ½ lb., \$2.35; 1 lb., \$4.50

393—MARGLOBE (Wilt-Resistant) (Red) (79 days)—Fruits are of medium size, smooth, solid and deep from stem to blossom ends. They are set in clusters of 5 to 7 on vines with medium to heavy growth. Cell structure is irregular. It is wilt resistant; the popular Globe shape, scarlet color; good cropper, marketer and shipper. Marglobe simply leaped into popularity for the main tomato in wilt territories—the best all-round variety.

Pkt., 5c; ½ oz., 20c; 1 oz., 30c; ¼ lb., \$1.00; ½ lb., \$1.85; 1 lb., \$3.50.

377—BUCHANAN'S BEEFSTEAK (Scarlet) (90 days)—The plants are healthy and luxurious, quite blight-resistant and continuous and abundant bearers. Fruits are very large, semi-flat, very meaty, with a solid center and an inviting, tasty flavor. Because of its desirable qualities it is popular for the home garden.

Pkt., 10c; ½ oz., 25c; 1 oz., 45c; ¼ lb., \$1.50; ½ lb., \$2.85; 1 lb., \$5.50.

378—EARLIANA IMPROVED STRAIN (Bright Red) (66 days)—Don't fail to plant for your early Tomatoes this much improved strain developed by Pennsylvania State University. Fruits thicker, smoother, of better quality than the old strain of Earliana.

Pkt., 10c; ½ oz., 30c; 1 oz., 50c; ¼ lb., \$1.60; ½ lb., \$3.05; 1 lb., \$5.95.

397—BUCHANAN'S BRIMMER TOMATO (Dark Pink) (90 days)—The largest of all tomatoes. Single tomatoes weighing 3 pounds and 18 inches around have been grown by training to a single stem. It must be staked. In quality and size there is no tomato that can compare with Brimmer and it is the most productive of all large tomatoes; deliciously mild and free of excess acidity. Brimmer has a very large, solid, meaty center and only a few small outer seed cavities. Even though so large, fruits are well shaped and make the finest slicing tomato for home use.

Pkt., 15c; ½ oz., 40c; 1 oz., 70c; ¼ lb., \$2.35; ½ lb., \$4.50

We especially urge you to plant Certified Tomato Seed when available since it is certified as to excellency of stock, trueness to type and freedom from disease. However, we offer non-certified seed of the following varieties which are described elsewhere in Certified Seed.

390—RUTGERS 391—GREATER BALTIMORE
Pkt., 5c; ½ oz., 20c; oz., 30c; ¼ lb., \$1.00; ½ lb., \$1.85; 1 lb., \$3.50.

387—BREAK O'DAY

Pkt., 5c; ½ oz., 25c; oz., 45c; ¼ lb., \$1.50; ½ lb., \$2.85; 1 lb., \$5.50.

**R.B. BUCHANAN SEED CO.****MEMPHIS, TENNESSEE.****BUCK BRAND TESTED SEEDS**

BUCHANAN'S TOMATO SEEDS

381—PONDEROSA (Purplish Crimson) (88 days)—Fruits are very large, solid, meaty, and very sweet; deep, but flat; very fleshy, with few seeds; of very mild flavor. Our selected strain of Ponderosa is less rough and ribbed than the ordinary Ponderosa and is quite popular. It makes fine slices and is suited only to home use and local market.

Pkt., 15c; ½ oz., 40c; 1 oz., 70c; ¼ lb., \$2.35; ½ lb., \$4.50

382—NEW STONE (Deep Red) (86 days)—The standard and general favorite with truckers and canners; always dependable, very vigorous and productive, fruits round, large, solid, smooth, and possess the color, size, flavor and uniformity so desirable for canning.

Pkt., 5c; ½ oz., 20c; 1 oz., 30c; ¼ lb., \$1.00; ½ lb., \$1.85; 1 lb., \$3.50.

388—OXHEART (Pink) (90 days)—Shaped like a beef heart and when grown under favorable conditions it produces enormous fruits with probably less seed and more meat than any other Tomato. Its attractive, novel appearance, mild flavor and firmness have won for it popularity in the home garden and local market where it commands a premium.

Pkt., 15c; ½ oz., 60c; 1 oz., \$1.10; ¼ lb., \$3.95

394—GULF STATE MARKET WILT RESISTANT (Purplish Pink) (82 days)—We believe the Gulf State Market to be the chief purplish-pink fruited market variety grown in the Gulf States. The vines are very vigorous and withstand blight exceptionally well. The fruits are large, true globe shaped, show but little depression about the stem and are smooth and free from cracks. It ripens uniformly well up to the stem. Very productive and an excellent commercial shipper.

Pkt., 10c; ½ oz., 30c; 1 oz., 50c; ¼ lb., \$1.60; ½ lb., \$3.05; 1 lb., \$5.95.

385—GOLDEN PONDEROSA (89 days)—A very large mild flavored, yellow fruited tomato, desirable for home gardens. Plants are large, spreading and strongly resistant to wilt. Fruits are similar in size and shape to the red Ponderosa and are quite solid with small seed cells. Its rich golden color emphasizes its individuality in salads and it satisfies the demand of those who do not like the acidity found in most of the red varieties.

Pkt., 15c; ½ oz., 35c; 1 oz., 65c; ¼ lb., \$2.10; ½ lb., \$4.00.

SMALL FRUITED TOMATOES

Popular miniature fruited tomatoes for preserving and pickling. Particularly attractive and unique to serve whole in salads and with cocktails. They mature early and continue to bear profusely until late in the season.

RED PEAR (75 days)—Fruits 2 inches long; pear shaped. The red flesh is tender, sweet and of fine flavor. Excellent for preserves and canning.

YELLOW PEAR (75 days)—Fruits 2 inches long; pear shaped. Has bright yellow, sweet flesh. Mild and unexcelled for preserves.

RED PLUM (75 days)—Fruits oval, 2 inches long; rich deep red. Fine for pickling or salads.

Either variety—Pkt., 15c; ½ oz., 35c; 1 oz., 60c

FRUITONE

REG. U. S. PAT. OFF.

stronger concentration (two level teaspoons of Fruitone to one gallon of water) is used for the spray, most of the TOMATOES will be SEEDLESS.

BUCHANAN'S WATERMELON SEEDS

HOW TO GROW MELONS—Rich, sandy loam soils are considered best for Watermelons, but good crops are grown on any type of well-drained, fertile soil. The adding of well-rotted manure to soil will give the plants a good start, and to commercial growers we recommend an application of 600 to 800 pounds of mixed fertilizer to the acre. The best yields are procured when the hills are spaced at least 10 feet apart. This method will give about 360 hills to the acre. When the soil has become warm, drop 6 to 8 seeds in each hill and cover about 1 inch deep. Later thin to 2 or 3 of the largest plants. Earlier crops may be obtained by protecting the young plants with Hot-kaps. Give shallow cultivation every 10 days. One ounce will plant 25 hills; 2 to 3 pounds per acre.

All Prices on this Page Post Paid.

Florida Giant

232—FLORIDA GIANT (92 days)—This melon has suddenly become very popular throughout the South. It makes vigorous vine growth, does not sunburn as easily as many varieties and develops attractive fruits of enormous size that commonly weigh 50 to 75 pounds, and under ideal growing conditions may attain a weight of 100 pounds. It is oval-round; skin color dark green and the rind is thick, making it an excellent shipper even though large. The flesh is a rich red, firm and unusually sweet. It is a prolific bearer and ideally suited to our Southern soils and climate.

Pkt., 10c; oz., 25c; 2 ozs., 45c; ¼ lb., 80c; ½ lb., \$1.45; 1 lb., \$2.75

255—NEW STONE MOUNTAIN (Select Strain) (90 days)—One of the finest, sweetest, largest medium early Watermelons. Under favorable conditions, fruits weigh from 40 to 60 pounds. The fruit is almost round or square-shaped with rich, dark green, medium thick rind, and dazzling scarlet flesh of luscious sweetness. It has few seeds, is firm and solid, almost all heart, and truly an unsurpassed table delicacy. The rind is sufficiently tough to stand considerable handling, making it an excellent shipper. It is very prolific, withstands drouth, and will produce a fine crop of good melons when other varieties fail. It is the most popular round-type Watermelon for the home garden or market.

Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00

Early Kansas

241—EARLY KANSAS (Originator's Strain) (80 days)—The Early Kansas has finest texture, sweet flavor and melting, bright red meat, solid to the rind, which is about one-half inch thick. Nearly round, light green with broad bands of wavy stripes, growing 30 to 50 pound melons. It is a vigorous grower producing equal to or better than any other melon; under normal conditions 800 to 1,000 melons per acre, weighing 30 pounds each, is not unusual, and every melon a good one, and a wonderful shipper.

Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00

228—DIXIE QUEEN (85 days)—Almost round or square-shaped fruits, light green, veined with darker green; medium but tough, thin rind; richest scarlet flesh. Average weight 35 pounds, although under favorable conditions many will attain a weight of 60 pounds. Its quality, convenient size and shape make it very popular, more especially in certain markets that are now demanding smaller Watermelons. It is juicy and sweet. The small white seeds are very few. A splendid shipper and unsurpassed for the home melon patch.

Pkt., 10c; oz., 25c; 2 ozs., 45c; ¼ lb., 80c; ½ lb., \$1.45; 1 lb., \$2.75

235—HALBERT HONEY (85 days)—Similar to Kleckley Sweet, but earlier, and slightly larger. The flesh is a most beautiful crimson, with the rich coloring and luscious quality extending to the thin rind. It is unusually sweet and free of stringiness. Melons are oblong, dark green, very uniform in shape and size. Fine for home use and nearby market.

Pkt., 5c; oz., 20c; 2 ozs., 30c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50; 5 lbs., \$7.00.

237—GEORGIA RATTLESNAKE (90 days)—A very productive main crop home garden and shipping variety that has been an old favorite in the South for many years. The melons are large, long, gray green with irregular dark green stripes and with very tough rind. Flesh is bright scarlet, very sweet and of fine quality. Its attractive coloring makes it a popular market melon.

Pkt., 5c; oz., 20c; 2 ozs., 30c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50; 5 lbs., \$7.00.

234—WINONA (90 days)—The fruits are medium size, oblong, weighing 25 to 35 pounds. Color very dark green, flesh crimson-red, crisp, sweet and fine texture. A vigorous and prolific melon of delicious flavor for home gardens and local markets.

Pkt., 5c; oz., 30c; 2 ozs., 50c; ¼ lb., 95c—Seed Very Scarce

Dixie Queen

BUCHANAN'S WATERMELON SEEDS

227—BLACKLEE (87 days)—Originated at the Florida Agricultural Experiment Station, and after many and varied tests has proven of superior quality and to be almost completely resistant to wilt. Shape is long oval, very symmetrical and smooth. Color, dark, rich green. Flesh brilliant red, very sweet and crisp; seed black—a most attractive and pleasing color combination. Cuts solid, free from stringiness and has a delicate inviting aroma and distinctive flavor. Try this unusual melon. Seed supply limited.

Pkt., 10c; oz., 30c; 2 ozs., 50c; ¼ lb., 95c; ½ lb., \$1.75; 1 lb., \$3.25

231—LEESBURG (Wilt Resistant) (85 days)—It is almost immune to wilt. This desirable strain was developed from Kleckley's Sweet and retains its outstanding, delicious flavor. However, it has better shape, uniformity, and on account of its thin, hard, tough rind, is an ideal commercial melon. It is vigorous and productive and because of its deep root system continues to bear under adverse weather conditions. The flesh is a rich reddish pink with no trace of white hearts; sweet and tender.

Pkt., 5c; oz., 20c; 2 ozs., 35c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00

240—BUCHANAN'S IMPROVED CUT RED TOM WATSON WATERMELON (90 days)—The real red meated Tom Watson. Its tough, medium thick, elastic rind makes it the finest shipper. Our seed are selected from the largest, finest melons in the field and is bred to eliminate hard, white centers. Flesh deep red, juicy and sweet, weigh 40 to 60 pounds.

Pkt., 5c; oz., 20c; 2 ozs., 30c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50 5 lbs., \$7.00

233—IMPROVED KLECKLEY'S SWEET OR WONDERMELON (87 days)—Those who think they know Watermelons will tell you that until you have eaten a slice of Improved Kleckley's or Wondermelon, you haven't really tasted the finest flavor to be found in Watermelons. All of the sparkling, crisp, bright crimson meat is deliciously sweet right up to the thin rind. For the home garden we recommend it without reserve; it carries well for short distances, for the rind, though thin, is very tough. It is not unusual to have them weigh 50 pounds or more.

Pkt., 5c; oz., 20c; 2 ozs., 30c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50 5 lbs., \$7.00

226—HAWKESBURY WILT RESISTANT (85 days)—Probably the best all purpose gray watermelon introduced to date. Because of its wilt resistance and superior qualities it should replace all other gray melons. Hawkesbury is a long melon, slightly tapering to either end, medium to large in size. Flesh is bright watermelon red with a minimum of stringiness or coarseness and of excellent flavor. Its tough rind makes it an ideal shipping melon and it is equally desirable for home use.

Pkt., 5c; oz., 20c; 2 ozs., 30c; ¼ lb., 55c; ½ lb., 95c; 1 lb., \$1.75

Each HOTKAP is a small hothouse, to speed development as well as protect. HOTKAPS mean stronger, healthier plants, with larger and earlier yields—and premium price result! Crops protected with HOTKAPS get to market 2 to 3 weeks earlier, sometimes more. Their slight cost is returned many times in higher prices.

HOTKAPS are patented wax paper cones, placed over the seed or plant. They maintain perfect mulch around each plant, by preventing drying and crusting of the ground. They are easy to set out.

HOTKAPS ARE INEXPENSIVE

Germaco HOTKAPS come in rolls of 1,000 each, and in smaller special trial or garden packages. For field use, use the steel HOTKAP setter.

BUCHANAN'S FLOWER SEEDS

CULTURAL DIRECTIONS are printed on the packets. By following them almost any person will have fair success in the culture of flowers. While some seeds need special treatment, the following general rules will apply to all: Make the surface of the soil as fine, smooth and level as possible; do not plant when the ground is wet; cover each lot of seeds to a uniform depth, which should not be more than four or six times the diameter of the seed; press the soil firmly over the seed; plant in rows so that the starting plants can be seen easily, thin out the young plants to prevent crowding and keep entirely free from weeds. Never allow the seedlings to suffer from drouth.

BUCHANAN'S ZINNIAS

The seeds may be sown in a hot bed or sunny window and transplanted, or sown later in the open ground. If sown in the open ground in April, thin out as soon as the plants are well up, leaving at least 1½ feet each way, as they are robust growers and require a large amount of space to attain maximum size. The plants come into flower early in the summer and keep on blooming until hard frost.

ROOTONE

Reg. U. S. Pat. Off.

Makes cuttings easy to root. Dip cuttings in Rootone before planting to give faster and better rooting. Stimulates root growth on cuttings; quickens germination of seed and bulbs; reduces damping-off and wards off fungus attack. $\frac{1}{4}$ oz. pkg. (treats 400 cuttings) 25c; 2-oz. jar \$1.00; post paid.

BUCHANAN'S ROSES—FINEST VARIETIES

All two-year field grown vigorous plants

Transplant roses in early spring or late fall for best results, in a well prepared bed. Sandy, clay soil is preferable and good drainage is essential. Apply Vigoro fertilizer early in spring and again in August and a generous application of bone meal in October or November will feed them through the winter.

Any Variety—Each, \$1.10; 3 for \$3.00; 6 for \$5.50; 12 for \$10.00, postpaid.

PINK BUSH ROSES

- LOS ANGELES** Rich, flaming pink shaded with golden yellow at base of petals.
DAME EDITH HELEN Very large, perfectly shaped, clear pink buds.
BRIARCLIFF Brilliant rose pink, very fragrant; finest large pointed buds.
COLUMBIA Vivid silvery pink, sweetly scented and free flowering.
J. L. MOCK Bright rich pink faced with carmine; gigantic buds, stiff stems.
EDITOR McFARLAND ... Long, pointed buds. Flowers very large and double.
MRS. CHAS. BELL Shell pink, lovely buds, blooms as freely as Radiance.
PAUL NEYRON Clear pink, shading to rose. Immense size, very double, fragrant.
RADIANCE, PINK Rose pink with silver reflections. Blooms most profusely.
PINK KILLARNEY Sparkling dark pink. Long pointed bud, immense flowers.

RED BUSH ROSES

- ETOILE DE HOLLAND** ... A sparkling, brilliant red. Very fragrant healthy and free flowering. Color holds and doesn't blue, as does other reds.
AMI QUINARD Dark, velvety crimson. Very dark buds opening into flowers of unfading crimson maroon. Strong, Vigorous grower.
ETOILE DE FRANCE Bright vivid crimson, cerise centers, heavy bronze green foliage.
CHAS. K. DOUGLAS Crimson-scarlet. Fine long pointed buds. Unfading color.
McGREDY'S SCARLET ... Large, rich scarlet buds, opening to show orange base.
RED RADIANCE Even clear red. America's most popular rose. Constant bloomer.
AMERICAN BEAUTY Brilliant rose carmine. Immense flowers, delightfully fragrant.
SENSATION Very double, scarlet crimson overlaid with glossy maroon.
E. G. HILL Massive bloom of rich maroon.
HADLEY Deep, dark red. Flowers double with well formed buds.

YELLOW BUSH ROSES

- LUXEMBOURG** Apricot yellow shaded orange. Fragrant, exquisitely shaped.
JOANNA HILL Soft yellow with gleaming gold heart. Pointed bud.
LADY HILLINGDON Saffron yellow. Color deepens daily after being cut.
SUNBURST Deep golden yellow of intense shade. A favorite everywhere.

WHITE BUSH ROSES

- FRAU KARL DRUSCHKI** . Snow white, very large, truly the White American Beauty.
K. A. VICTORIA Pure white with creamy tinge at base of petals.
CALEDONIA Pure white with exquisitely curved petals.

TWO-TONED BUSH ROSES

- PRES. HERBERT HOOVER** A blending of pink, flame, scarlet and yellow.
BETTY UPRICHARD Coppery, red buds, flowers large, orange, carmine.
TALISMAN Bright apricot, gold and deep pink, very popular.
EDITH NELLIE PERKINS . Coppery outer petals with orange-gold centers.
GOLDEN OPHELIA Yellow. Cream-yellow and pale pink with golden glints in petal folds; very fragrant. Vigorous grower and profuse bloomer.

A ROSE STORY IN PICTURES

BUCHANAN'S ROSES—FINEST VARIETIES

Prices, Post Paid—Each, \$1.10; 3 for \$3.00; 6 for \$5.50; 12 for \$10.00

- MRS. E. P. THOM**—Bright canary yellow. Slender, well-shaped buds open into full double flowers. One of the most popular yellow roses among rose fanciers.
- GOLDEN DAWN**—The pointed buds are bright yellow, often tinged with red, and the open blooms are clear lemon yellow that does not fade; exceedingly fragrant.
- MRS. PIERRE S. DU PONT**—Golden yellow. Bud is long pointed, rich reddish-gold, almost orange at petal base. Exceptional bloomer and disease resistant.
- ROSLYN**—The rich golden yellow blooms are shaded deeper on reverse side of petals—almost a deep orange. Its fragrant flowers are very large and are produced on strong, healthy plants.
- MARGARET McGREDY**—Brilliant oriental buds of marvelous orange vermillion color with gold base. A truly great rose.
- HINRICH GAEDE**—The most colorful of all roses. The long, pointed buds of a brilliant coppery red open vermillion shaded golden yellow. Fragrant.
- AUTUMN**—Unique coloring, gorgeous burnt orange, streaked and marked with red. Large handsome buds developing to full double, fragrant blooms.
- CONDESA DE SASTAGO**—Everyone likes this spectacular Rose with its cupped flowers of orange-scarlet on the inside and yellow on the reverse. Strong grower with heavy foliage; fragrant, free flowering.
- ROWENA THOM**—Enormous buds and flowers of glistening, satiny rose pink. Centers shaded orange-flame, profuse bloomer.
- EDEL**—Pure ivory-white. Extra large, well built, slightly fragrant, globular blooms, on erect stems. Vigorous grower.

POLYANTHA ROSES

Dwarf plants which bloom profusely throughout the growing season. They bear small flowers in immense, many flowered clusters. Ideal for bedding and edging.

GLORIA MUNDI—Orange-Scarlet. Fiery large flower-clusters. Vigorous, bushy plant with glossy leaves and a sensational color. Its orange tone lasts well, even in hottest weather.

IDEAL—Crimson. Striking dark flowers of medium size, delightful fragrance, spectacular effect. Immense compact bunches borne in profusion on vigorous plants throughout the season.

MARECHAL NIEL—Exquisite large buds and flowers of softest, rich yellow. Borne in great profusion. Very fragrant. Without doubt the finest and most beautiful yellow climber. Should have winter protection. Each, \$1.10; 3 for \$3.00.

CLIMBING ROSES

Prices, Post Paid—Each, \$1.10; 3 for \$3.00; 6 for \$5.50

CAUTION: Be sure to specify CLIMBING in your order.

- AMER. BEAUTY**.....Rosy-crimson, large, well-formed, fragrant flowers.
- PAUL'S SCARLET**.....Vivid scarlet. One of the most popular of all climbers.
- DR. W. VAN FLEET**.....Delicate flesh pink, rapid growth, entirely satisfactory.
- MARY WALLACE**.....Vivid, brilliant pink—very hardy.
- SILVER MOON**.....Silvery white, yellow stamens, very large.
- GARDENIA**.....Hardest, most dependable, yellow climber.
- PINK RADIANCE**.....The most satisfactory pink climber.
- RED RADIANCE**.....Blossom same as bush type. Unsurpassed red climber.
- TALISMAN**.....Similar to bush type. A real rose sensation.
- K. A. VICTORIA**.....Creamy white like the bush rose. Reliable and hardy.
- HOOVER**.....Same coloring as bush variety.

ACME KOPPER QUEEN (Mildew and Black Spot Spray)—For the control of mildew and black spot on roses, flowers, and many other kinds of foliage. Stainless, leaves no unsightly residue.

BUCHANAN'S GLADIOLUS BULBS

All Prices on this Page Post Paid

	6	12	25	100
960 MAID OF ORLEANS. The best creamy white to-day. It blooms extra early. The spikes are tall and straight with six to eight clear, large, florets open at once	.55	1.00	2.00	6.95
961 BETTY NUTHALL. Magnificent, light salmon-pink with pale orange throat and light feathering of carmine. Flowers very large, 6 to 8 open at one time, of splendid substance, and well placed on strong, tall spikes	.55	1.00	2.00	6.95
962 DREAM O'BEAUTY. Rich American Beauty Red. Many large florets open at a time borne on strong stiff stems. An outstanding variety	.55	1.00	2.00	6.95
963 MARGARET FULTON. A clear glistening coral pink. A good strong grower and early bloomer with six to eight florets of a really outstanding color	.55	1.00	2.00	6.95
964 W. H. PHIPPS. Enormous flowers of clear pink, overlaid with salmon-rose. Often 20 flowers open at one time, making this variety wonderful for cut-flower use. A consistent show winner	.55	1.00	2.00	6.95
965 DEBONAIR. La France pink shading to shrimp pink with creamy throat blotch. Six to eight medium large blooms open on a very tall, always straight spike. A dependable late variety	.55	1.00	2.00	6.95
966 GIANT NYMPH. Extra large flowers of exquisite rose-pink with pale gold throats. Vigorous grower and one of the finest varieties	.55	1.00	2.00	6.95
967 FLAMING SWORD. A brilliant, early flame colored glad. Large flowers borne on slender, tall spikes	.55	1.00	2.00	6.95
968 RED PHIPPS. An exquisite shade of soft red and one of the very best. Eight or more large florets open at one time. A most popular mid-season variety	.55	1.00	2.00	6.95
969 CADILLAC. Extra tall spikes: flowers well placed and of good form; many open at one time. Its golden apricot color shades to a soft warm apricot-rose toward edge of petals. No throat markings, stamens and pistils creamy white	.55	1.00	2.00	6.95
970 DR. F. E. BENNETT. An outstanding Gladiolus. Gorgeous peach-red overlaid with flame scarlet. Throat stippled with ruby and white. Tall spike with many well placed blooms open at one time	.55	1.00	2.00	6.95
971 GOLD EAGLE. A very early, rich golden yellow bearing slightly ruffled flowers on vigorous straight spikes	.55	1.00	2.00	6.95
972 PHYLLIS McQUISTON. A new, pure pink that blends perfectly to a soft light throat. It is thoroughly practical as well as gorgeously beautiful. The tall spikes are always straight, carrying as many as 22 buds	.55	1.00	2.00	6.95
973 GOLDEN DREAM. The richest, clearest, pure golden yellow. Large flowers with gracefully recurved petals well placed on tall straight stems. Very distinct and beautiful variety	.55	1.00	2.00	6.95
974 MINUET. Magnificent variety and a blue ribbon winner at every show. Without a doubt the finest clear lavender in existence. Five to six exquisite orchid-like flowers open at one time	.55	1.00	2.00	6.95
975 CHARLES DICKENS. A deep rich shade of royal purple with a deeper color in the throat. Tall vigorous growing plant	.55	1.00	2.00	6.95
976 PELEGRINA. Vivid, dark violet blue. Two lower petals a trifle darker. Very showy and the best in its class	.55	1.00	2.00	6.95
977 PICARDY. A most sensational flower of delicate apricot-pink. The exhibition blooms are extremely large, slightly ruffled and of heavy wax-like substance. Without doubt the most popular of all Glads	.55	1.00	2.00	6.95
978 WASAGA. Slightly ruffled petals of clear apricot shading to a golden buff throat. Flowers very large	.55	1.00	2.00	6.95
979 COMMANDER KOEHL. Huge, wide open blooms of richest, dark scarlet, almost black, no markings or blotches. Heavy substance. Vigorous	.55	1.00	2.00	6.95
GARDEN ASSORTMENT. Good mixture including early, medium and late varieties in all colors	.50	.95	1.75	6.40

Cadillac

GLADIOLUS

Hard rot, scab or pock, and several other diseases of gladiolus are carried on the corms. Thrips also live over winter on the corms. Liquid Semesan treatment of the corms helps to control the surface-borne hard rot and

scab, and to destroy the thrips and their eggs. Use 1/3 oz. to a qt. of water. Full directions on package. 1/3 oz., 10c; 2 oz., 45c, postpaid.

SPECIAL GLADIOLUS OFFER

12 Splendid Varieties for
90c, Post Paid

One each of the following: Betty Nuthall, Debonair, Gold Eagle, Flaming Sword, Pelegrina, Margaret Fulton, Dr. Bennett, Golden Dream, Chas. Dickens, Picardy, Maid of Orleans, Giant Nymph.

BUCHANAN'S
RAINBOW COLLECTION

20 No. 1 Select Bulbs,
Post Paid for \$1.50

This unsurpassed Gladiola collection includes one bulb of each variety in the 90c collection and also 2 bulbs of each of the following varieties: Minuet, Commander Koehl, Dream O'Beauty, Cadillac.

NOTICE

We ship only first quality, top size bulbs. It is clean, disease free, healthy and true to name. We have selected, in a wide range of color, the varieties that give maximum performance, as to blossom and growth in this area, out of the thousands on the market.

REMEMBER, we do not handle bulblets nor seconds.

CULTURE—They are not only showy in the garden, but, when cut with the first flower open, will last for days in the house. The new colorings defy the choicest orchids. Plant bulbs 3 to 4 inches deep, 6 inches apart, and stake when 2 feet high. Flowers appear from early July until late in the fall if several plantings are made.

BUCHANAN'S GIANT DAHLIAS

Dahlias ready for shipment about March 1. Order on separate order blank.
All Prices on This Page Post Paid

CULTURE—Plant bulbs in hills 3 feet apart any time after danger of frost. Soil must be fertile or heavy fertilization is necessary. Lay bulbs flat and cover with six inches of soil. Dahlias require a great deal of moisture and clean cultivation. VIGORO is the ideal Dahlia fertilizer.

990—SAN FRANCISCO (Decorative)—Color salmon pink. It is an outstanding variety with large blooms on strong stem. Strong grower with well proportioned and thrifty plant growth. Each, 60c; 3 for \$1.50.

982—JERSEY BEAUTY (Decorative)—Flowers of good size and substance on long stems. Exquisite, luminous pink. Excellent cut flower. Each, 30c; 3 for 75c.

983—MRS. IDE VER WARNER (Decorative)—A refined orchid pink, beautifully formed. Large blooms carried on long, strong stems. A free, continuous bloomer. Each, 20c; 3 for 50c.

984—PURITY (Decorative)—Resembling a pure white Camellia. Free bloomer producing exhibition blooms. Each, 20c; 3 for 50c.

981—MISS OAKLAND (Decorative)—Pure white. Perfect habit of growth, free flowering; unexcelled for cut flower or exhibition. Each, 50c; 3 for \$1.25.

985—JANE COWL (Decorative)—Huge flowers of bronze buff and old gold, blending to a bright apricot-rose at center. A superb dahlia. Vigorous grower. Each, 30c; 3 for 75c.

986—OMAR KHAYYAM (Decorative)—A Chinese red at the base of petals, shading to a bright orange with paler tips. A really superb color effect. Each, 40c; 3 for \$1.00.

987—MRS. GEO. L. BOUTILLIER (Decorative)—A rich velvety carmine, giant in size and outstanding in every respect. An exceptionally good cut flower. Each, 40c; 3 for \$1.00.

987A—PRIDE OF CALIFORNIA (Decorative)—Mammoth, rich American Beauty red. Vigorous, tall grower. Each, 20c; 3 for 50c.

988—CLARA CARDER (Decorative)—The largest of the pinks. Clear cyclamen-pink. Very strong grower with stiff stems. In a color class by itself. Profuse. Each, 40c; 3 for \$1.00.

989—JERSEY'S BEACON (Decorative)—The color is Chinese scarlet with a paler reverse, giving a two-toned effect. Flowers are very large and globular in form. It is a prolific bloomer and vigorous grower. Each, 30c; 3 for 75c.

1004—OAKLEIGH MONARCH (Decorative)—A clear, brilliant cerise red. Very large blooms of great depth which keep well when cut. Strong, rugged grower. Each, 75c; 3 for \$2.10.

990A—WM. G. WYLLIE (Decorative)—A huge dahlia of yellow, buff and pink with the yellow predominating. Each, 75c; 3 for \$2.10.

1000—E. T. BEDFORD (Decorative)—Rich, velvety purple. Vigorous grower with flowers borne in profusion on strong stems. Each, 20c; 3 for 50c.

1001—KENTUCKY (Decorative)—A brilliant salmon-orange shading to grenadine-pink on outer petals. A thrifty grower and prolific bloomer under all weather conditions. Each, 30c; 3 for 75c.

1002—CALIFORNIA IDOL (Decorative)—A giant clear yellow that is a consistent show winner. Vigorous grower. Each, 35c; 3 for 90c.

1003—HILCREST MANDARIN (Decorative)—Georgiously beautiful flowers of oriental red and gold coloring. Unusual variety, and strong grower. Each, 30c; 3 for 75c.

1005—ROSE GLORY (Decorative)—Massive deep rose pink borne on long stiff stems. Ideal for cut flower or exhibition purposes. One of the most popular Dahlias grown. Each, 25c; 3 for 60c.

Jersey Beauty, Ide Ver Warner, Purity, Jane Cowl, Jersey Beacon, and E. T. Bedford.

1007—EXHIBITION DAHLIA COLLECTION Six Superb Varieties in a Gorgeous Range of Colors.

A \$3.30 Value for Only \$2.50

San Francisco, Miss Oakland, Oakleigh Monarch, Wm. G. Wyllie, Hilcrest Mandarin, and Mrs. Boutillier.

Rose Glory

POMPON DAHLIAS

Miniature form of Ball or Show type. Small, round flowers, less than 2 inches across, borne in greatest profusion. Especially fine for cut flowers and garden decoration. Dwarf, compact, branching plants. 25c each; 3 for 60c; 12 for \$2.00.

1010—Catherine—Pure yellow.

1011—Sunbeam—Brilliant red.

1012—Snowlad—Glistening white.

1013—Little Beauty—Soft pink.

1014—Dee Dee—Clear lilac.

1006—POMPON DAHLIA COLLECTION

One tuber of each of the 5 separate colors listed above for only 90c, post paid.

VITAMIN B₁

Don't fail to use Vitamin B₁ in your flower gardens. Most flowering plants and shrubs respond unbelievably. Produces stronger, hardier plants and flowers of amazing size.

Post Paid—40 tablets, 10c; 100, 25c; 250, 50c;
1 oz. liquid, 25c; 2 ozs., 50c.

Oakleigh Monarch

Cannas

VOLCK

A Nursery & Garden oil spray for use on evergreens and shrub in foliage against mealybugs, scale insects, red spiders, white flies and certain other insects. Leaves no poisonous residue. 4 oz. bottle, 35c; 16 oz. bottle, 65c, postpaid.

ROTENONE GARDEN SPRAY (NNOR)

Containing Rotenone kills most common garden bugs of both sucking and leaf eating types. You've got to wet them—to get them. NNOR penetrates the waxy or hairy covering, brings the tremendous power of Rotenone into action.

Postpaid, 1 oz., 40c; 6 oz., \$1.10; 16 oz., \$2.25.

BLACK LEAF 40

BLACK LEAF 40—A nicotine solution for destroying aphids and lice, in orchards; on both garden and flowering plants. A teaspoonful makes three quarts of solution. This is one of the most effective preparations for general sucking insects. Kills by contact and fumes. A remarkable control for poultry lice, that does away with dusting, dipping or greasing, and yet absolutely effective. Simply paint the perches shortly before roosting time. Post paid—1 oz., 35c; 5 ozs., \$1.10; 1 lb., \$2.40; 2 lbs., \$3.50.

RED ARROW SPRAY

RED ARROW is a concentrated extract of pyrethrum flowers combined with spreader. Because it kills on contact, it is deadly to both chewing and sucking insects. Red Arrow is perfectly safe, non-poisonous to human beings; cannot discolor blossoms or injure plants. One-ounce bottle makes 8 gallons. Price, post paid—1 oz., 40c; 4 ozs., \$1.10.

BUCHANAN'S CANNA BULBS

No other bedding plant will give the same uniform good results in our varied and trying climate. They do well in all sections of the country and stand pre-eminently at the head of the list, succeeding in any sunny position in any kind of soil, but responding quickly to liberal treatment. For best results the beds should be spaded two feet deep and a generous amount of well-decayed manure of any kind thoroughly incorporated, and at all times supplying water freely. Plant in large masses of one color, setting out tubers two feet apart.

Early Harvest—May and June. Medium size; pale yellow slightly acid; good quality. Ripens at a season when no other Apple is in.

Yellow Transparent—One of the best early market Apples, of medium size; skin yellow; flesh crisp and sub-acid; almost immune to blight.

Red June—Early. Medium size; dark red; white flesh; juicy, sub-acid; ripens over a long period; bears well and is a heavy cropper.

Yellow Horse—Late summer. Large size; yellow, slightly red where exposed to sunshine. One of the best cooking Apples; fills in between seasons.

Grimes Golden—Early winter. Large; golden yellow; of high quality. Tree vigorous; a heavy bearer.

Yellow Delicious—Early fall. Medium size. Splendid keeping qualities and the excellent flavor of red Delicious. Prolific bearer.

Double Red Delicious—Late fall. Fruit large, dark red, fine grained flesh, crisp and juicy and of high quality. A splendid shipper and prolific bearer.

Stayman Winesap—Winter. Larger and more prolific than the old Winesap. Rich, dark red; firm; fine grained and juicy; adapted to a wide range of soils and climates.

Jonathan—Fall. Good size, bright red, with a spicy, rich acidity that has made it a favorite with all apple lovers. Long lived, bears young.

Transcendent Crab—Late, hardy, heavy bearing, yellow with red cheek.

PEACH TREES

2 to 3 feet: Each, 70c; 3 for \$2.00; 6 for \$3.75; 12 for \$7.00, prepaid.

4 to 5 feet: Each, \$1.00; 3 for \$2.75; 6 for \$5.00; 12 for \$9.50, prepaid.

Halehaven (Free)—New, early, yellow. Freestone. Fruit large, round like Hale with contrasting red and yellow color. Bears young and heavily.

Golden Jubilee (Free)—Fruit of Elberta shape and size, golden yellow, rich and syrupy. Ripens extra early. New Commercial variety.

Carman (Free)—Large; creamy white with deep blush; fine flavor; hardy in production; a good shipper; strong grower, and early bearer.

Indian Cling or Blood Cling—An old-time favorite wherever planted, and grows to a large size; dark red flesh; a deep red; highly flavored.

J. H. Hale (Free)—Larger than Elberta; ripens several days later; superior to Elberta in flavor; a beautiful golden yellow with deep carmine blush.

Heath Cling (White Heath, Cling)—Skin and flesh white, tinged with red; tender, juicy, and of high flavor. A wonderful Peach for canning and pickling.

Red Bird (Cling)—The best of the early peaches. Good size and flavor, white flesh, hardy, vigorous, productive. Excellent shipper.

Belle of Georgia (Free)—Very large; white with red cheek; firm and of excellent flavor.

Early Elberta (Free)—Very large; flesh yellow.

Elberta (Free)—A standard by which all other varieties are judged; very large; yellow with red cheek; flesh yellow, firm, juicy, of high quality.

PEARS

2 to 3 feet: Each, \$1.20; 3 for \$3.35; 6 for \$12.00, prepaid.

4 to 5 feet: Each, \$2.00; 3 for \$5.50; 6 for \$19.00, prepaid.

Seckle—Fruit is medium size, spicy, honeyed flavor and has been for generations the highest standard of quality.

Bartlett—Probably the most popular of all Pears. Large, juicy, yellow, sweet, and of high value for marketing or canning.

Kieffer—A money maker on account of its remarkably vigorous growth and early productiveness, its extraordinary size, splendid keeping and shipping qualities; excellent for canning and preserving.

CHERRIES

2 to 3 feet: Each, \$1.20; 3 for \$3.35; 6 for \$ 6.25, prepaid.

4 to 5 feet: Each, \$2.00; 3 for \$5.50; 6 for \$10.00, prepaid.

Black Tartarian (Sweet)—Large, heart-shaped; purplish black; flesh tender, juicy, and fine quality. Tree an erect, beautiful grower and heavy bearer.

Governor Wood (Sweet)—Light yellow, extremely sweet, juicy, and of rich flavor. Tree vigorous and productive.

Large Montmorency (Sour)—Larger and finer than Early Richmond and ripens ten days later. Tree of rapid growth and a heavy bearer.

Early Richmond (Sour)—Extra early; bright red, very valuable for canning. Tree extremely hardy and productive. The earliest pie cherry available.

PECANS

2 to 3 feet: Each, \$2.40; 3 for \$7.00; 6 for \$13.50, prepaid.

Stuart—Most popular variety. Nuts very large, shell medium thin. Heavy bearer.

Schley—Nuts large, shell very thin. Very best quality pecan. Kernels full, plump and rich flavored.

Success—Shell and partitions thin. Kernels large, sweet and of excellent quality. Heavy bearer.

Elberta Peach

APRICOTS

2 to 3 feet: Each, 80c; 3 for \$2.25, prepaid.

4 to 5 feet: Each, \$1.30; 3 for \$3.75, prepaid.

Royal—Medium to large; pale yellow, with orange cheek; for canning or drying.

Ea. Golden—Pale orange-yellow; juicy and highly flavored.

FIG BUSHES

18-24 inches: Each, \$1.00; 3 for \$2.75.

2 to 3 feet: Each, \$1.20; 3 for \$3.35, prepaid.

Brown Turkey—Fruit medium to large, pear-shaped, coppery brown skin with white or yellowish tinted flesh. Most popular variety.

Celestial—Small, violet colored. Very prolific, sweet and of excellent quality.

Stayman Winesap Apple

PLUMS

2 to 3 feet: Each, 80c; 3 for \$2.25, prepaid.

4 to 5 feet: Each, \$1.30; 3 for \$3.75, prepaid.

Abundance (Japanese)—Medium to large; bright red overlaying a yellow ground; cling. Strong, thrifty, upright grower, early and prolific.

Burbank (Japanese)—Large; mottled red and yellow; good quality; cling. Immense bearer.

Red June (Japanese)—Medium to large; deep red; handsome bloom; quality good; good shipper; ripens a week earlier than Abundance.

Wild Goose—One of the best known of all the Plums; large, deep red when ripe, good quality, very juicy. One of the best native varieties, ripening earlier than the Japanese sorts.

Shropshire Damson—Medium size; dark purple flesh; grown largely for preserving purposes.

R.B. BUCHANAN SEED CO.

MEMPHIS, TENNESSEE.

BUCK BRAND TESTED SEEDS

ALL PRICES ON THIS PAGE PREPAID

BUCHANAN'S RASPBERRIES

Set 5 feet apart each way. Plant 2 or 3 inches deeper than they were in the nursery. After fruiting, cut old canes and burn, leaving 5 to 6 vigorous new ones to grow for fruiting the following year. In the spring, cut off the top 12 inches or possibly more of the previous season's growth to strong, well-ripened wood.

Latham—Finest, most productive commercial red raspberry. Long season.
St. Regis—Sometimes called "Everbearing." Berries bright crimson, large; very prolific, and of excellent flavor.

Cumberland—The most desirable of the black raspberries.

Price, 5 for 75c; 10 for \$1.15; 25 for \$2.60.

LUCRETIA DEWBERRY

The berries are a deep glossy black, large in size, very firm, disease resistant and a fancy quality. As Lucretia fruits at the close of the strawberry season, and about two weeks before ordinary blackberries, there is always a demand for Dewberries on the market. Plant in rows 7 ft. apart, setting the plants 5 ft. apart in the row.

Price, 5 for 60c; 10 for \$1.00; 25 for \$2.25.

BOYSEN BERRIES

Plant 4 feet apart in rows 8 feet across. You can grow from 10 to 30 plants from each plant set. Many claim 50 to 65 plants.

Thornless—This great berry is without a thorn, which means much in handling. It ripens a week ahead of the thorny type which gets your berries on the market while prices are higher. The berries themselves are identical and their remarkable and delicious flavor is unsurpassed. They will average 1 inch in diameter and 1½ inches long. The plants are very sturdy and hardy.

Thornless, 5 for 90c; 10 for \$1.50; 25 for \$3.25.

GRAPE VINES

Two Year Vines, Each, 60c; 3 for \$1.50; 6 for \$2.75; 12 for \$5.00.

Fredonia—Earliest, finest black grape known; heavy fruiter.

Concord—Fruit dark purple, nearly black; extra large and very sweet.

Niagara—The most valuable white grape. Bunch and berry large.

Delaware—Red, rather small, juicy, sweet; best table grape.

Moore's Early—Desirable early black grape.

SCUPPERNONGS

The Scuppernong or Muscadine type grape is distinctly Southern.

TWO-YEAR VINES—post paid—each, \$1.00; 3 for \$2.75; 6 for \$5.00.

Scuppernong—Very large, bronze fruit; very sweet; grown in clusters.

James—Large, black Scuppernong; delicate flavor.

STRAWBERRY PLANTS

Set after frost in fall or before growth begins in spring; rows 3½ feet apart, 15 inches in rows, for field culture; 15 inches each way for garden. Cultivate clean, mulch late in fall. Remove mulch after fruiting and spade in light dressing of manure. About 7,000 plants an acre.

MAY TIME—Introduced as the highest quality extra early berry; is usually fruited 4 to 8 days earlier than the old early varieties, thus a large portion of the crop is harvested well ahead of the regular season. Berries are firm, bright red, very sweet and of fine texture.

100, \$2.25; 250, \$4.00; 500, \$7.50.

Yellow-Free Blakemore—Early—Solid—Productive—For shipping and home use. Grown more extensively than any other variety.

Improved Klondyke—The old standard shipping variety.

Aroma—Large late berry, bright red—fine for long distance shipping.

Price—100, \$1.75; 250, \$3.25; 500, \$6.00.

FLOWERING SHRUBS

All strong 18-24 in. plants—Each, 85c; 3 for \$2.25; 6 for \$4.00.

ABELIA—Foliage small, dark green; flowers pinkish-white.

ALMOND—Rose-like flowers of pink or white.

ALTHEA—White, red, blue or purple.

JAPANESE BARBERRY—Foliage turns red and bronze in the fall.

Red berries.

BEAUTY BUSH—Flowers deep pink, very ornamental.

BUTTERFLY BUSH—Lilac colored flowers.

CALYCANTHUS—Chocolate colored flowers, very fragrant.

CORALBERRY—Low growing, spreading shrub, red berries.

CREPE MYRTLE—White, red, pink or purple.

DEUTZIA, PRIDE OF ROCHESTER—Double white flowers, tinted pink.

FORSYTHIA—Golden yellow bell shaped flowers.

HONEYSUCKLE, BUSH—Pink or white.

HYDRANGEA, A. G.—Large, white flowers in early spring.

HYDRANGEA, P. G.—Pure white flowers borne in large panicles.

JASMINE, NAKED FLOWERING—Bright green, yellow flowers.

LILAC—Purple or white.

QUINCE, FLOWERING—Bright red flowers in early spring.

SNOWBALL, COMMON—Large ball-like flowers of pure white.

SPIREA, DWARF WHITE—White flowers borne in flat clusters.

SPIREA, PINK—Dwarf habit of growth, pink flowers.

SPIREA, CRIMSON—Dwarf shrub with crimson flowers.

SPIREA, BRIDAL WREATH—White flowers on graceful branches.

SNOWBERRY—Small shrub, arching branches. White flowers followed by clusters of white berries.

WEIGELA, ROSEA—Deep pink flowers on drooping branches.

HARDY CLIMBING VINES

BOSTON IVY—Greatest clinging vine. Fast grower..... Each

VIRGINIA CREEPER.....\$0.75

WISTERIA—Purple......75

CLEMATIS, JACKMANI—Purple......95

CLEMATIS, HENRY I—White, large......95

FUNK'S G HYBRID SEED CORN

Treated with Semesan Jr.

"Bred to Beat the Elements"

Increases Yields 15 to 40 per cent.

FUNK'S G HYBRIDS

due to their deeper
root system and
stronger stalks,
eliminate the loss
from blowing down
and rotting
after mature

Funk's G Hybrid

Open Pollinated Corn

These baskets of corn show the actual proportional yield per acre in a 3 year test on the same farm. Funk's G Hybrid produced an average of 52 Bu. per acre and the open pollinated yielded an average of only 38 Bu. per acre, an increase of over 35%. Grower's name furnished on request. Post Paid through 3rd zone only.

Any Yellow Hybrid— $\frac{1}{2}$ Gal. \$1.00; Gal. \$1.75; Pk. \$2.90; $\frac{1}{2}$ Bu. \$5.50; Bu. \$10.45.
G527W White Hybrid— $\frac{1}{2}$ Gal. \$1.00; Gal. \$1.85; Pk. \$3.00; $\frac{1}{2}$ Bu. \$5.75; Bu. \$10.95.

FUNK'S G HYBRIDS

lead open pollinated
corn in yields of
grain and fodder
and in resistance to
disease, insects and
adverse weather
conditions

G-244 Prolific, yellow, early maturity

A medium height hybrid that carries two ears of excellent grain qualities at waist height, on a good stalk that stands up well. This is one of the finest hybrids for use over a wide variety of soil types and fertility levels. You will find G-244 consistently in the upper bracket in a wide range of yield tests. G-244 has unusual resistance to insects which has contributed to its fine record during the past several years. Probably no other hybrid is so well adapted to early and late planting on all soils which afford adequate moisture.

G-46 Semi-prolific yellow, medium early

This medium tall Hybrid is Famous for large ears. Especially adapted for early planting and should be harvested as soon as mature on account of the unusual size and weight of ears. To the root system goes a large part of the credit for the outstanding drouth resistance of G46. Adapted to all good corn soils.

The seven Hybrids we offer have proven by actual farm test that they are adapted to the South.

Pay your taxes, like many progressive farmers are doing, with increased yields from Funk's G Hybrids.

Leave Hybrid Corn stand one-fourth to one-third thicker than open pollinated varieties. Cultivate Hybrid like any other corn. Although Hybrids increase yields on both poor and rich land, no corn will show a profit on poor land unless fertilized.

G-125 Semi-prolific yellow, medium late NOT FOR ARKANSAS

A good general purpose Hybrid equally desirable for grain, silage or fodder. It is a vigorous, strong-stalked, high yielding Hybrid of medium size ears. Drouth, chinch bug and root worm resistance contribute to its excellent performance record under varying conditions, and it is especially suited to the area east of the Mississippi River.

G-88 Semi-prolific, yellow, full season

Funk's G-88 is an established favorite of livestock feeders in the Southern Corn Belt. Funk's developed this strain especially for a long growing season. Medium-late maturing. Adapted to medium and high fertility soils. Plant as late as June 20.

Difference in Root Growth. Right, Funk's G Hybrid. Left, Open Pollinated

G-702 Yellow, single-eared, full season

This corn produces large single ears, medium-late maturing. One-half Southern corn parentage; plant as late as June 20.

G-711 Prolific Yellow full season

As the number states, a sure winner. Perfectly adapted to the Southern corn belt on most types of soil. Produces enormous ears with deep, wide kernels and 24 rows to the ear is not unusual. It has no superior for yield and quality.

G-527 W and G-515 W Single-eared, White

Both are adapted to the white corn producing area of the South. G-515W is slightly earlier than 527W, has a fine stalk quality and is especially well suited to milling.

Paymaster

Silvermine

Hickory King

BUCHANAN'S SEED CORN

All prices on this page post paid through Third Zone only. Prices not prepaid—see Yellow Price List enclosed. Many times you can save money by buying 100 pounds or more of corn and other field seed, shipping same by freight.

1125—NEAL PAYMASTER (About 100 days)—Originated in Middle Tennessee, where the natural fertility due to abundance of phosphate and other necessary elements makes it ideal for producing a more potent type of seed corn. Due to its natural vigor and heavy yields it has been a corn by which others were judged for years in tests over the South. Paymaster is suited for both lowlands and good uplands. Produces a medium tall stalk with usually two well filled ears 8 to 9 inches long, broad white grains on a bright red cob—Planted thick it will produce a heavy tonnage of ensilage. On good land it has been the heaviest yielding open pollinated corn for a quarter century.

Price— $\frac{1}{2}$ gal., 60c; 1 gal., \$1.00; peck, \$1.75; $\frac{1}{2}$ bu., \$3.15

1126—TENNESSEE RED COB (About 120 days)—An extra large white field corn; grains long, broad and evenly lined on large red cob. The ears are 9 to 12 inches long, stalks tall, making it an ideal ensilage corn. Rather late maturing, but for bottom land and main crop this corn cannot be excelled. This is one of the largest grain, greatest yielding and best milling corns for rich land.

Price— $\frac{1}{2}$ gal., 60c; 1 gal., \$1.00; peck, \$1.75; $\frac{1}{2}$ bu., \$3.15

1129—SILVERMINE (About 100 days)—Medium large, very uniform ears, 8 to 10 inches; deep grain and prolific. Stalk is sturdy and large, 8 to 10 feet tall; blades wide and vigorous, giving plenty of forage. The best early white cob, white corn adapted to Southern soils and climate. Excellent for feed and milling. Although usually considered 110 day corn, our seed, coming from further north, will frequently produce hard corn in 90 days if weather conditions are favorable.

Price— $\frac{1}{2}$ gal., 60c; 1 gal., \$1.00; peck, \$1.75; $\frac{1}{2}$ bu., \$3.15

1132—HICKORY KING (About 110 days)—This is an entirely distinct variety among the white corns, combining the largest grain with the smallest cob. Ears fill out well and will make more shelled corn to bulk of ears than any other variety. It is good for roasting ears to follow Early Surprise; makes splendid quality of corn meal.

Price— $\frac{1}{2}$ gal., 65c; 1 gal., \$1.10; peck, \$1.95; $\frac{1}{2}$ bu., \$3.35

1136—MOSBY'S PROLIFIC (About 120 days)—The most prolific white cob, white corn for the South when planted on rich land. The stalks are tall, bearing 3 to 5 fine ears. The grains are long, set close to a small white cob, very uniform in shape, well filled. It has strong roots and is considered the most storm and drouth resistant open pollinated corn.

Price— $\frac{1}{2}$ gal., 60c; 1 gal., \$1.00; peck, \$1.75; $\frac{1}{2}$ bu., \$3.15

1142—REID'S YELLOW DENT (About 110 days)—Has probably won more championships in the corn belt than any other variety. It is medium early, large eared and semi-prolific. It is well adapted to the Mid-South if planted on good, rich corn land. It has large, beautiful, show-type ears, 10 inches long; 18 to 20 straight rows of deep grain, closely wedged together on a medium sized red cob. Tip and butt completely filled out. The best early yellow dent.

Price— $\frac{1}{2}$ gal., 60c; 1 gal., \$1.00; peck, \$1.75; $\frac{1}{2}$ bu., \$3.15

1144—JARVIS GOLDEN PROLIFIC (About 90 days)—A yellow prolific corn with husk covering the ears so completely and tightly that it is practically impossible for any bird or weevil to get to the corn in the field. It produces firm ears always sound and the stalks are strong and storm resistant. Resists drouth remarkably well, produces two good, medium size ears to the stalk and is very desirable for a yellow roasting ear corn. The heaviest yielding corn on upland.

Price— $\frac{1}{2}$ gal., 60c; 1 gal., \$1.00; peck, \$1.75; $\frac{1}{2}$ bu., \$3.15

1139—LARGE YELLOW DENT LEAMING (About 115 days)—A most popular large-eared variety of yellow corn for rich bottom land; produces a medium tall stalk with ears of uniform size and shape, 10 to 12 inches long, with 14 to 18 straight rows of yellow kernels on a medium sized red cob, and ears are well filled out over tip. Is drouth resistant and an excellent main crop variety.

Price— $\frac{1}{2}$ gal., 60c; 1 gal., \$1.00; peck, \$1.75; $\frac{1}{2}$ bu., \$3.15

**R.B. BUCHANAN SEED CO.****MEMPHIS, TENNESSEE.****BUCK BRAND TESTED SEEDS**

BUCHANAN'S SEED CORN

All Prices on This Page Post Paid Through Third Zone Only
Prices Not Prepaid—See Yellow Price List Enclosed

1131—TENNESSEE YELLOW PAYMASTER (100 days)—In many tests over this state Tennessee Yellow Paymaster has consistently produced higher yields than any other yellow corn. It is probably no better than Jarvis for thin land, but on rich land, well adapted to producing corn, it is certainly a most desirable corn to plant. Stalks medium height, strong, nearly all bear 2 ears 7 to 8 inches long; not flinty, but medium soft with little or no faulty grains.

Price— $\frac{1}{2}$ gal., 65c; 1 gal., \$1.10; peck, \$1.95; $\frac{1}{2}$ bu., \$3.35

1134—MEXICAN JUNE, NATIVE GROWN (About 90 days)—It is a great drouth resister and usually, if there is enough moisture for it to get a fair start, a crop is assured. Early maturing and semi-prolific, averaging more than one ear to the stalk. Ears 8 to 9 inches long, grains short to medium, cobs medium in size, and while usually white, red cobs are often found. Ears have mostly white grains, but dark blue and red grains often appear.

Price— $\frac{1}{2}$ gal., 65c; 1 gal., \$1.10; peck, \$1.95; $\frac{1}{2}$ bu., \$3.35

141—EARLY SURPRISE (Hard corn in 90 days)—This Northern grown, early maturing white corn is perfect to plant for quick feed crop. It is prolific producing medium long ears ideal for roasting ears or stock feed. Planted early and cut green you can grow 2 crops a season on same ground.

Price— $\frac{1}{2}$ gal., 65c; 1 gal., \$1.10; peck, \$1.90; $\frac{1}{2}$ bu., \$3.35

137—TRUCKERS FAVORITE (Hard corn in 90 days)—While usually planted for roasting ears, it is used freely by dairymen and stock raisers for quick feed planted either early or late. This is a prolific, rather deep grained white corn; medium size ears.

Price— $\frac{1}{2}$ gal., 65c; 1 gal., \$1.10; peck, \$1.90; $\frac{1}{2}$ bu., \$3.35

127—WHITE DENT (100 days)—White grains, slightly dented, medium size white cob, ears good length, well filled. An old standby for late planting.

Price— $\frac{1}{2}$ gal., 60c; 1 gal., \$1.00; peck, \$1.75; $\frac{1}{2}$ bu., \$3.15

128—HASTINGS' PROLIFIC (120-130 days)—It will make 2 ears to the stalk on average land, and if planted 24 to 30 inches apart in the row on good strong land, 4 to 6 ears to the stalk can be had. The ears are well filled at both ends; the cob is small; the shuck is heavy and covers the ear tightly, protecting it from birds and insects.

Price— $\frac{1}{2}$ gal., 60c; 1 gal., \$1.00; peck, \$1.75; $\frac{1}{2}$ bu., \$3.15

STATE CERTIFIED SEED CORN

1140—CERTIFIED NEAL PAYMASTER (100 days)—Securing pure bred seed is the first step in producing a uniform heavy yielding corn crop. Since certified seed is a continual process of selection it results in constant improvement. Don't fail to plant your best corn land to our Certified Paymaster for maximum yields.

1141—CERTIFIED GOLDEN JARVIS PROLIFIC (90 days)—All of our Certified Jarvis is taken from stalks having 2 good ears or more to insure transmitting its prolific characteristic. Plant your medium rich and upland in this most carefully selected seed corn. Price, either variety— $\frac{1}{2}$ gal., 75c; 1 gal., \$1.25; peck, \$2.05; $\frac{1}{2}$ bu., \$3.50.

TENNESSEE PAYMASTER HYBRIDS

NOS. 10, 14, 15

The University of Tennessee Agricultural Experiment Station has been working on Paymaster Hybrids for a number of years and experiment station tests have shown them to be exceptionally good. These hybrids are made by combining inbreds from the high yielding prolific open pollinated variety Neal Paymaster. Thus they are all more or less similar to Neal Paymaster in having white grain, red cob, prolificacy, and high shelling per cent. These hybrids are more uniform and lower eared than Neal Paymaster. The difference in yielding ability of these three hybrids is small.

Price— $\frac{1}{2}$ gal., 95c; 1 gal., \$1.65; peck, \$3.00

CRO-TOX—Protects corn from Crows, blackbirds and moles. It aids and hastens germination, which means healthier stalks and larger yields per acre. Cro-Tox will not kill birds or animals. Saves seed loss. $\frac{1}{2}$ -pint can, treats 1 bushel seed corn.

Post paid— $\frac{1}{2}$ pt., 70c; 1 pt., \$1.10; quart, \$1.65

ALL SEED CORNS SHOULD BE TREATED WITH SEME-SAN, JR. This treatment hastens and increases germination, increases the yield, protects corn from rotting, allows earlier planting, produces sturdy plants, controls seeding blight and reduces root rot.

1131—Tennessee Yellow Paymaster

ACME CORN PLANTERS

311.—(One Hand.) Plants corn or beans. Operates automatically, easily and accurately. Adjustable for desired number of kernels. Also equipped with adjustable depth gauge.

Postpaid, each, \$2.95

306.—(Two Hand.) A hand corn planter that plants up to six acres per day. Operates automatically, easily and accurately.

Postpaid, each, \$1.90

1144—Jarvis Golden Prolific

POPCORN

CULTURE—For field planting rows should be about 3 feet apart. Thin to 1 stalk about every 8 inches in row.

34—DYNAMITE—A vigorous grower, 6 to 8 feet tall, producing 2 and often 3 ears, 8 to 9 inches long, with deep orange kernels, smooth and round, which pop double the size of others. When popped it is rich creamy yellow, crisp, tender deliciously flavored and no hard centers.

Pkt., 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50; 10 lbs., \$2.75.

BUCK BRAND TESTED SEEDS

DELTAPINE

14

A PROVEN STRAIN

OF THE

DELTAPINE COTTON

SLIGHTLY LONGER STAPLE

AND

DECIDEDLY BETTER GINNING QUALITY

THESE SEEDS ARE GRADE A, STATE CERTIFIED, CERESAN TREATED, DE-LINTED

TAKE NO RISK—PLANT CERTIFIED SEED ONLY

The Delta and Pine Land Company has never offered a new variety or strain of cotton to the public until it was thoroughly tested in most of the Cotton Belt under a wide variation of soils and climatic conditions. Before final approval it must produce a high percentage of lint, satisfactory staple, and show good spinning quality.

D & P L 14 was in limited production for experimental purposes from 1938 to 1942. Tests during those years were made over most of the cotton belt at experiment stations, and on average farms. Recorded results show **D & P L 14** a heavier producer of slightly longer staple and decidedly superior ginning quality than any of the older strains of Deltapine cotton. **D & P L 14** was sold by the Originator over all the cotton belt for the 1944 crop. Yields under favorable and unfavorable conditions has established **D & P L 14** as a leading profit producer.

Our Deltapine 14 is first year from the originator and was grown on one plantation, on which no other variety is produced and was ginned on his private gin.

Our grower secures his planting seed each year from the originator and by planting only one variety and ginning his cotton only, it is not mixed in any way. Since cotton cross pollinates very little if any, his seed are, from every standpoint, comparable to the originators.

The land this seed was grown on is heavy, delta soil which undeniably will produce a much stronger stalk, heavier yield of lint cotton and seed of a much stronger vitality that will express the dominant money making characteristics of **D & P L 14**.

All seed are sacked in 100-lb. sealed bags and **CERTIFIED BY THE STATE PLANT BOARD**. This insures purity and freedom from disease.

The seed we offer has been rigidly graded. It is treated with 2% Ceresan which means that it will not require as much seed to plant an acre and insures better stands.

All seed are machine de-linted, and treated with Ceresan, which means they will go much further in planting and give much improved stands.

1,250 pounds of seed cotton gins out on an average of a 500-lb. bale, a lint turnout of 40% or better. In the Delta, the staple is 1 1/16 to 1 3/32 inches with a considerable quantity of 1 1/8 inches in good staple years.

BUCK BRAND TESTED SEEDS

Field of Stoneville 2-B Cotton

THESE SEED ARE STATE CERTIFIED. TAKE NO RISK—PLANT CERTIFIED SEED ONLY.

STONEVILLE 2B COTTON SEED

WE ARE DISTRIBUTORS FOR STONEVILLE 2-B GROWN ON THE SHANNON PLANTATION

Several years ago when the cotton acreage was reduced it became necessary to produce a variety which would yield more on less acreage and at less expense in order for the farmer to realize a legitimate profit. One plant breeder's answer to the farmers prayer was Stoneville 2-B Cotton. It is an early maturing, big boll, easily picked cotton and there are no records available showing that any other variety or strain of cotton has ever so consistently ranked high in as many tests under as many different soil and climatic conditions as has Stoneville 2-B.

Our Stoneville 2B was grown on the Shannon Plantation at Lake Cormorant, Mississippi, and it is the only variety of cotton ginned on their private gin. **THEY DO NOT GIN FOR THE PUBLIC.** Every year since the Shannon plantation started growing Stoneville 2B on their plantation they have averaged a bale or more to the acre.

The entire acreage on which these seed were produced was carefully inspected for Wilt, Anthracnose, Varietal Purity, Trueness to Type by Mississippi State Crop Improvement Association and Mississippi State Plant Board, both of State College, Miss.

All seed are machine de-linted, and treated with Ceresan, which means they will go much further in planting and give much improved stands.

The plant is medium vigorous, spreading and prolific and produces large bolls, 60 to 70 per pound of seed cotton.

Stoneville 2-B is one of the few early maturing big boll cottons. The bolls open well and the percentage of five lock bolls is large.

In valley lands the staple runs $1\frac{1}{16}$ to $1\frac{1}{8}$ inch and on high land 1 to $1\frac{3}{32}$ inch. The lint percentage in valley lands is 34 to 36% and on high land 35 to 38%.

INCREASE cotton returns by planting seed treated with 2% CERESAN. Official tests show average yield increases ranging from \$6.30 to \$13.08 an acre! To give such results, 2% CERESAN reduces seed rotting and damping-off, makes stands more uniform, controls certain seed-borne diseases. Be sure your seed has this protection! If you do not buy our State Certified Ceresan treated cotton seed, then be sure to treat your own seed with profit producing Ceresan.

Post paid—1 lb., 85c; $4\frac{3}{4}$ lbs., \$3.34; 25 lbs., \$14.95. At Store—1 lb., 75c; $4\frac{3}{4}$ lbs., \$3.14; 25 lbs., \$14.50; 100-lb. drum, \$52.00.

R.B. BUCHANAN SEED CO.

MEMPHIS, TENNESSEE.

BUCK BRAND TESTED SEEDS

Mowing Alfalfa

ALFALFA SEED—VERIFIED ORIGIN

Post Paid Prices on This Page Through Third Zone Only. Quantity Prices on Yellow Price List Enclosed.

ALFALFA PRODUCES MORE FEED THAN ANY OTHER CROP

The yield should be more than three tons per acre where there is abundant rainfall and a long growing season.

Alfalfa and corn fed together make a good ration for all live stock—Alfalfa belongs on every farm—for hog pasture, hay for the dairy herd, family cow or chickens. For sheep and beef cattle, no other roughage is equal to alfalfa hay.

When comparing alfalfa with other crops, remember one sowing of alfalfa may last five years.

Alfalfa should be sown in the spring as soon as there is no danger of freezing weather or early enough in the fall to permit the plants to become well established before winter sets in. Sow 20 to 30 pounds per acre. Except under very favorable conditions, alfalfa should be sown without a nurse crop.

Alfalfa should be cut for hay when the plants are well in bloom.

Inoculate All Alfalfa with Nitragin

FERTILIZER AND SEED SOWER

The Combination Sower also broadcasts all kinds of seed, such as clover, timothy, millet, lespedeza, sudan grass, alfalfa, wheat, etc., perfectly in desired amounts per acre. Convenient for applying fertilizer or seed on fairways, greens, parks, lawns, etc. At Store, \$4.00; post paid, \$4.25.

"CYCLONE" SEED SOWER

Guaranteed to sow perfectly even all varieties of farm seeds such as clover, timothy, red top, alfalfa, lespedeza, sudan grass, oats, rye, millet, wheat, buckwheat, turnip, lawn grass, etc., and can be regulated to sow any amount per acre. This machine is strongly built and mechanically perfect. The bag holds about one-half bushel. It is easily operated.

At Store, \$2.75; post paid, \$3.00.

1050—KANSAS ALFALFA—Seed grown in Kansas has been for many years very popular and planted freely over the entire South. Kansas pioneered in alfalfa production and seed from this area, having withstood the extremely rigorous climate of this state, is certainly well adapted to planting in the Central South. Kansas grown seed yields an abundance of forage and if properly cared for will produce profitably for a number of years.

Postpaid—1 lb., 95c; 5 lbs., \$4.25

1068—OKLAHOMA ALFALFA—As compared to many other alfalfa seed producing sections Oklahoma is probably the most recently developed. Since this is the case these fields are practically disease free and there is an absence of weeds injurious to alfalfa production found in areas that have been planted in alfalfa for many years. The State of Oklahoma has a very varying climate—extreme cold in winter and intense heat in summer. Heavy rainfall is not uncommon and extreme drouth is experienced almost annually. Because the plants are subjected to such weather adversities they are extremely hardy. For these reasons Oklahoma seed has proven perfectly adapted to this area, and since it affords three to five abundant cuttings a year it is rapidly replacing seed from other sources.

Postpaid—1 lb., 95c; 5 lbs., \$4.25

1052—ARGENTINE—About ten years ago Alfalfa seed imported from Argentina were first planted in the South. It has proven entirely adapted to the South, producing heavy yields consistently and withstanding the adversities of our Southern climate unusually well. Many large planters have reported even heavier yields from their Argentine plantings than from any other types of Alfalfa. It grows rapidly affording 2 to 4 cuttings per year and resists being crowded out by grass and weeds as well as native grown seed. Ten per cent of these seed are stained red to comply with Federal Law.

Postpaid—1 lb., 75c; 5 lbs., \$3.25

THE HORN SEED SOWER

Will sow any fine seed like clover, lespedeza, timothy, alfalfa and grasses. Each, 95c; parcel post paid, \$1.05.

THOMPSON'S WHEELBARROW SEEDER

The fastest grass seeder on the market. Easy running, and light in weight, complete, only 50 pounds.

No. 13—DOUBLE HOPPER—14 feet in length, with an extra deep hopper holding much more seed than the average wheelbarrow seeder. Does not have to be refilled so often. Best for sowing lespedeza seed and alfalfa, clovers, millet, timothy, grasses, etc. Chain feed.

At Store—Each, \$19.75

Red Clover in Blossom

For Best Results with All Clovers Inoculate the Seed
All Prices on This Page Post Paid Through Third Zone Only
Prices Not Prepaid—See Yellow List Enclosed

1053—RED CLOVER (Medium Red Blossom)—Red Clover not only furnishes excellent pasturage and abundant hay crops, but enriches the land and adds humus to the soil. It is second in food value only to alfalfa. It makes two or more cuttings of hay each season, and can be sown alone or in combination with other clovers and grasses. Sow seed during the spring or fall at the rate of 12 to 20 pounds to the acre.

Price—1 lb., 70c; 5 lbs., \$3.00

1055—ALSYKE CLOVER (Delicate Pink Blossom)—This is one of the hardiest varieties known. It is perennial and does not winter kill. It will do better on moist land than any other variety of clover, and is suitable for either hay or pasture. When sown with grasses, it forms a thick undergrowth and greatly increases the yield. It is frequently sown both with Red Top Grass and Timothy, and the quality of hay thus produced is excellent. It is fine-stemmed and leafy, and thus is quickly cured. Sow alone for hay or pasture 5 to 8 lbs. per acre. An excellent hay or pasture mixture on low, wet land is Alsike 5 lbs., Red Top 5 lbs., Timothy 6 lbs.

Price—1 lb., 70c; 5 lbs., \$3.00

1057—SWEET CLOVER (White Blossom)—There is probably no crop that will improve soil fertility as fast as Sweet Clover and it will grow on any type of soil, provided it is well limed and inoculated. It grows two years from one seeding and no other plant will furnish as much nutritious grazing per acre as sweet clover; or, it will produce two heavy cuttings of hay the first year, one the second year and a seed crop. Sow 15 to 20 pounds to the acre.

Price—1 lb., 40c; 5 lbs., \$1.75

CROTALARIA

A legume that frequently produces 30,000 pounds of green manure per acre. When turned under the cash value of the nitrogen is estimated at \$20.00 per acre, besides the untold value of humus which prevents erosion, holds water in sandy soil and opens up heavy soil. Yields of following crops are frequently doubled. Completely smothers out summer weeds. Grows well on any soil. Crotalaria probably will make more growth on sandy and light poor soil than any other legume. Requires no lime, fertilization or cultivation, although early cultivation pays. Sow 15 to 20 pounds per acre broadcast or 5 pounds in rows after danger of frost. Our seed is scarified and germinates readily. **SHOULD BE INOCULATED. TAKES SAME INOCULATION AS COW PEAS.**

1270—EARLY CROTALARIA—Most desirable for planting in upper South since it grows more rapidly. Should be used more as a catch crop after oats or sown just before the last cultivation of corn, cane or cotton in the central and lower South.

Price—1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00

1271—LATE CROTALARIA—Although it makes about a foot more growth than any other Crotalaria, averaging 7 feet high, and will yield 15 or more tons of green manure per acre, does not make its maximum growth as quickly as the early type. This strain should be used in all cases where early planting is possible.

Price—1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00

1066—HOP CLOVER (Yellow Blossom)—Grows about 6 to 8 inches high. Its growing season is from very early spring until early summer. Especially valuable for pasture when sown very early with Japan Clover on Bermuda sod or with any grasses, clovers or mixtures which do not make a heavy early spring growth. It is the earliest and fastest growing clover adapted to Southern soils and climates. Sow 4 to 5 pounds alone or 2 pounds to acre in mixtures.

Price—1 lb., \$1.00; 5 lbs., \$4.50

1056—WHITE DUTCH CLOVER (White Blossom)—Will grow on almost any soil. Largely used for sowing on lawns, mixed with Kentucky Blue Grass and other grass seeds, and is very valuable because it supplies nitrogen to the soil, thereby aiding other plants in the sod and building up soil fertility. Furnishes abundant early and late fall grazing and should be used in all permanent pastures. Sow in fall or early spring.

Price—1 lb., \$1.60; 5 lbs., \$7.50

1060—CRIMSON CLOVER (Scarlet Blossom)—Succeeds on almost any good soil. Don't fail to sow your Lespedeza and Bermuda sod to this winter annual at the rate of 20 pounds per acre in October without any preparation. It will furnish an abundance of late winter and early spring grazing. Sown at the rate of 15 pounds per acre on a prepared seed bed any time after August 15th and up to October 1st, or can be sown in early corn, covering shallow, during August, using 15 pounds to the acre. Crimson Clover furnishes good hay and adds fertility to the soil.

1062—GIANT SOUTHERN BUR CLOVER—Seed should be sown broadcast on a prepared seed bed, 100 pounds per acre, or in cotton middles, using 50 to 60 pounds per acre. Cover shallow. Sow in July, August, September, or, in lower South, October. You will find this a splendid crop to grow for soil building. Bur Clover and Bermuda Grass make a splendid combination for permanent pasture which is excellent for all livestock. Bur Clover will grow on almost all types of soil and can be depended on to add humus and nitrogen to the soil annually without sacrificing the regular summer crop, and is one of the cheapest legumes that serve as a winter cover crop. If it is allowed to mature a crop of seed before plowing under it will reseed itself for a number of years. Unexcelled as a soil building legume.

PERSIAN CLOVER

Furnishes splendid grazing from early spring until June. Yields 2 to 3 tons of rich, palatable hay per acre. Cures very quickly. An excellent soil builder. Re-seeds itself even when closely grazed and spreads rapidly. Grows well in mixtures, and is often planted with White Dutch, Bermuda and Dallis Grass. It has a deeper root system than White Dutch and requires less moisture for its success. It grows equally well on clay or loamy soils, other conditions being favorable. Sow 6 to 8 pounds per acre.

Postpaid—1 lb., \$1.00; 5 lbs., \$4.50.

LADINO WHITE CLOVER

Sow it for a year 'round pasture. U. S. Department of Agriculture says: "Ladino is the largest growing form of white clover. It is similar to White Dutch, but grows twice as large." It is a long lived perennial, excellent for grazing, as well as producing a most nutritious and palatable hay crop. The stems run on the ground, taking root. It is not subject to alfalfa diseases and is ideal to plant after alfalfa. It does not bloat livestock as much as other clovers, but is safer to plant with paspalum, timothy, red top, meadow fescue, Kentucky blue, orchard, carpet and rye grass.

Postpaid—1 lb., \$3.00; 3 lbs., \$8.85; 5 lbs., \$14.50.

GRASS SEEDS FOR LAWN, PASTURE AND HAY

HINTS ON FORMATION OF LAWNS—Spade or plow ground to the depth of 8 inches. Afterwards harrow or rake carefully, pulverize all lumps. If the soil is poor, fertilize freely, working into the soil, then rake level and roll the soil well to make a solid bottom. Scatter the seed evenly over the surface. Rake seed in and roll, water regularly and carefully, as the soil is liable to dry out in the heat of the day, and if it does while the seed are germinating, a poor stand will be secured. Should bare spots appear, rake the surface and sow more seed.

QUANTITY TO SOW FOR LAWNS—You cannot sow too much; the more, the better; it means quicker, more satisfactory and lasting results. We recommend, on new ground, for average mixtures, to sow as follows: 2 pounds on 600 square feet (20 x 30); 5 pounds on 1,500 square feet (30 x 50).

All Prices on This Page Post Paid Through Third Zone Only. Prices Not Prepaid—See Yellow Price List Enclosed

1117—BUCK BRAND PERMANENT LAWN GRASS SEED—By far the best mixture of grasses offered for the purpose of quickly producing a permanent lawn. It is prepared from our own formula, and is a careful blending of varieties adapted to producing the thick growth and velvety appearance so much sought after. Each variety of grass in this mixture is there for a special purpose; some for making strong, fibrous roots, which take hold upon the soil and keep the turf in place; others of a creeping nature quickly fill up any bare spots which may develop; varieties which are useful for color value, and also kinds that withstand adversity. Sow in early spring or fall.

Price—1 lb., 60c; 5 lbs., \$2.75; 10 lbs., \$5.00

1118—BUCK BRAND SHADY LAWN GRASS SEED—Usually it is not difficult to obtain good turf under trees if the correct seed varieties are used. To make a new lawn in the shade spread lime at the rate of 1 pound to each 20 square feet; apply Vigoro or other complete fertilizer at the rate of 2 pounds per 100 square feet; rake smooth and sow Buck Brand Shady Lawn Grass Seed; rake again to cover the seed and either roll with a light roller or flatten with the back of a spade. Use 1 pound of seed for each 10 feet by 30 feet; sow at half these rates when renovating a lawn. Where shade is excessive it may be necessary to sow additional seed for one or two years. Late winter or very early spring seeding will give best results.

Price—1 lb., 60c; 5 lbs., \$2.75; 10 lbs., \$5.00

1103—KENTUCKY BLUE GRASS—A lawn and pasture grass, succeeding best on fertile, heavy soils which contain lime and phosphate, but does well on a variety of soils if lime is added. Kentucky Blue Grass should be included in all permanent pastures sown where it is adapted as no grass is more nutritious. It is one of the first to start up in the spring and gives excellent grazing in the fall. Sow for pasture about 15 pounds to the acre. A most beautiful lawn grass, especially adapted to shaded areas. It forms a close turf, is slightly creeping and quite hardy. Sow 1 pound to 300 square feet. Late winter or very early spring seeding is preferable.

Price—1 lb., 75c; 5 lbs., \$3.50; 10 lbs., \$6.50

1100—BERMUDA GRASS (Unhulled)—The most dependable grass for lawns, golf courses and pastures in the South, and when once established no amount of hot, dry weather will kill it out. It succeeds on nearly all soils; makes a tough, deep, smooth turf that recovers quickly after cutting and will endure more trampling and rough treatment than any other lawn grass. We recommend it as the foundation grass for almost all pastures since it combines to great advantage with White Dutch, Hop, Bur and Crimson Clover and Rye Grass, thus making an almost year round heavy producing pasture. For lawns sow 1 pound to 300 square feet; pastures 15 pounds per acre. April through June.

Price— $\frac{1}{2}$ lb., 50c; 1 lb., 85c; 5 lbs., \$3.75

1102—HULLED BERMUDA GRASS—Same as unhulled, but the hull is removed. This new process promotes quicker germination enabling you to sow from April through July. Our tests show that the hulled type will germinate fully within 10 to 12 days, while the regular unhulled types take from 21 to 30 days. This should revolutionize the planting of Bermuda lawns, the only objection to Bermuda seeding before, being the length of time necessary for germination. Sow half as much Hulled Bermuda as you would Unhulled. Bermuda will stand more hot sun than any grass known.

Price— $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00; 5 lbs., \$4.50

1107—WINTER RYE GRASS—Used extensively throughout the South for winter lawns. Merely sow Rye Grass on your permanent sod late September to early November and you will have a beautiful green velvety lawn throughout the winter. Sow your lespedeza fields and permanent pastures to Rye Grass in October and secure an extra three months grazing per year with little cost and no preparation. For lawns sow 1 pound to 10 feet by 10 feet, for pasture 35 pounds to acre.

Price—1 lb., 30c; 5 lbs., \$1.00; 10 lbs., \$1.75

1101—RED TOP OR HERD'S GRASS—Red Top or Herd's Grass is one of the most valuable and satisfactory grasses for the South. Succeeds well on any good upland and low-ground, and grows better on land that overflows than almost any other grass. It is one of the easiest grasses to get started, and once established it thickens and improves, increasing yield every year, and should be included in all mixtures for lawns and pastures. Sow 15 to 20 pounds per acre in early fall or spring.

Price—1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.50

1104—ORCHARD GRASS—Very vigorous and hardy, having special value as a pasture grass, furnishing abundant grazing in early spring and late fall. Also will yield a fair quantity of nutritious hay. Ideal for sowing with other grasses and clovers. Its growth is checked during hot weather. Does well on almost any type rather fertile soil, but prefers abundant moisture. Will stand much shade and is excellent for woodland pastures and for sowing in gullies to prevent erosion. Sow about 15 pounds to acre either in the early fall or early spring.

Price—1 lb., 65c; 5 lbs., \$3.00; 10 lbs., \$5.50

1111—SUDAN GRASS—Sudan Grass is used mainly as a hay crop, but is also an excellent annual pasture grass, especially for the dry, hot summer months when other pastures are short. If sown immediately after frost danger it will produce two or three heavy cuttings of hay very high in feeding value. Cut just as heads appear. After cutting it renews its growth promptly and in about 60 days another cutting is ready. Yields 2 to 4 tons per acre. Sow broadcast or with drill, 30 to 40 pounds per acre.

Price—1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.00; 25 lbs., \$3.75

BUCHANAN'S GRASS SEED

All Prices on This Page Post Paid Through Third Zone Only
Prices Not Prepaid—See Yellow Price List Enclosed

1105—DALLAS GRASS (*Paspalum Dilatatum*)—A perennial, especially popular in the South, starting growth in mid-spring and remaining green until frost. When well established it will afford more nutritious grazing, especially in hot, dry weather, than any other Southern pasture grass. Besides being a superior pasture grass Dallas is a fairly good hay plant. It is adapted to a wide variety of soils, but prefers heavy and somewhat moist land. When this unusual grass is combined with the late winter and very early spring pasture grasses and clovers as Hop and White Dutch Clover, Red Top, and Orchard Grass, a most excellent pasture will result which will afford heavy grazing about nine months per year. Sow in March and April, earlier in the lower South, on well prepared land. Cover little or none. Plant 10 pounds per acre.

Price—1 lb., 75c; 5 lbs., \$3.50; 10 lbs., \$6.50

1106—CARPET GRASS—Carpet Grass is one of the most valuable pasture grasses for the lower South. It grows on poor sandy soils better than Bermuda and does well on most any soil with a fair amount of moisture. It spreads rapidly, stands closest grazing and heavy trampling. For lawns and golf courses it will make a heavy sod and the closer it is cut the better it grows. It also does well in pastures with Bur Clover, thus giving all year grazing. Sow 15 pounds per acre for pasture, twice this for lawns, from March until June.

Price—1 lb., 50c; 5 lbs., \$2.25; 10 lbs., \$4.00

1108—TIMOTHY—Timothy requires good land for heavy yield. If sown with Red Clover the clover will help to supply nitrogen. Red Top or Herd's Grass and Red or Alsike Clover all mature at the same season as Timothy and are excellent to sow with it for hay or grazing, increasing the yield of hay and pasturage. A good mixture is 6 pounds Timothy, 5 pounds Red Top or Herd's Grass, and 5 pounds Alsike Clover; this mixture will furnish an excellent hay and fine pasturage on good loamy soils or on low ground. If Timothy and Alsike Clover are sown together, mix 8 pounds Timothy and 6 pounds Alsike. Sow in early fall or early spring alone or in mixtures.

Price—1 lb., 30c; 5 lbs., \$1.00

Field Of Annual Lespedeza

LESPEDEZAS

1061—COMMON LESPEDEZA—Sow all Lespedezas February through April. Lespedeza is the salvation of Southern impoverished lands, and it produces a good hay crop on more fertile soil. Common Lespedeza has never failed to grow on any soil in the Middle or Southern States, and while it will grow year after year on hard, compact, uncultivated soil, it will respond in a marked degree to proper preparation. When sowing Lespedeza in a pasture mixture always sow Common since it withstands more adversity and closer grazing than any other. Sow 20 or 25 pounds per acre in winter or early spring.

Price—1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50

1080—KOBE LESPEDEZA—A taller, improved type of Lespedeza which grows much ranker and has larger leaves. It has been known to grow 38 inches tall, but usually about 2 to 2½ feet. Possibly due to its rank growth, completely shading the ground and thus retaining moisture, it is much more resistant to dry weather than other Lespedezas. Excellent for pasture and a leading hay variety. Sow 20 to 25 pounds per acre.

Price—1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.25

1079—KOREAN LESPEDEZA—The earliest of the annual Lespedezas. It comes up early in the spring and grows rapidly, furnishing much earlier pasture than any other variety and more nutritious grazing at a time when other grasses and clovers are not at their best. It is the only variety that can be cut for hay in August and if sufficient moisture is available will produce a seed crop before frost. Sow 20 to 25 pounds per acre.

Price—1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75

1077—SERICEA LESPEDEZA—A Perennial Lespedeza, sending up new shoots from the crown after cutting or grazing. It will grow, thrive and thicken on poor, thin lands and on sour soils. We have never known it to be killed by drouth. It should not be cut more than twice in a year and will produce about four tons per acre of hay almost equal in feeding value to Alfalfa. Or, a hay crop may be made from the first cutting and later an abundant seed crop can be harvested. For the best quality hay, Sericea should be thick and must be cut before the stems become too coarse and woody. It also furnishes proportionately more grazing than any other Lespedeza. If not cut more than twice a year nor grazed too late in the fall it will continue profitable production indefinitely. It is most valuable to plant on soil that is too poor and eroded to produce any other profitable crop. Sow 15 to 20 pounds per acre.

Price—1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50

Sericea Lespedeza

NITRAGIN

Pays On All Legumes

Inoculated plants make more growth and furnish more nutritious food.

DWARF ESSEX RAPE

Prices on This Page Post Paid Through Third Zone Only. Quantity Prices on Yellow Price List Enclosed.

Dwarf Essex Rape

1063—DWARF ESSEX RAPE—Is one of the most valuable green forage crops, furnishing an abundance of quick, cheap pasturage for poultry, hogs and sheep. Makes a profitable crop on fertile soil only and can be grazed 6 to 8 weeks after planting. Sow broadcast alone or with grain, either spring or fall; it will afford more grazing per acre at a time when most needed than any other plant. One of the most nutritious of all green feed. Sow 8 to 10 pounds per acre broadcast. $\frac{1}{4}$ lb., 15c; $\frac{1}{2}$ lb., 25c; 1 lb., 45c; 5 lbs., \$2.00; 10 lbs., \$3.75; 25 lbs., \$7.50.

COW PEAS

1235—THE WHIPPOORWILL—Also known as speckled. The seeds are buff, brown, or gray, depending on type, and are speckled; they are spoken of as bush peas, but will make vines when planted on rich land; on poor soil they produce few vines and many peas. The Whippoorwill is the most popular general purpose stock pea for either seed or hay. Sow broadcast 1 to $1\frac{1}{2}$ bushels per acre for hay or drill 15 pounds in rows 2 to 3 feet apart. They mature in about 90 days.

1 lb., 35c; 2 lbs., 60c; 1 gal., \$1.75; 1 pk., \$3.25

1238—NEW ERA—The seed have a blue cast with many black specks—an early maturing upright growing variety, very prolific producer of peas, small vines cure quickly, splendid for hay. Seed are smaller than Whippoorwills and it does not require as many to plant an acre. Sow broadcast about 1 bushel to an acre for hay. They mature in about 80 days.

1 lb., 35c; 2 lbs., 60c; 1 gal., \$1.75; 1 pk., \$3.25

1239—BLACK—Seeds jet black. Viny or running, making a fine growth of vines and leaves—shy seeder, splendid land improver, most valuable as a forage crop. Plant in rows of corn 8 pounds to acre. If broadcast for hay mix some upright-growing pea with them to hold vines off the ground when cutting. Mature in about 120 days.

1 lb., 35c; 2 lbs., 60c; 1 gal., \$1.75; 1 pk., \$3.25

1236—CLAY—The seed are buff colored, medium size; the plant is large, vigorous growing and of vining or running habit. The Clay pea is used mostly for hay. Sow broadcast a bushel to an acre, for hay or turning under—drill 12 pounds to the acre in 2 to 3 foot rows on poor soil for seed. They mature in about 110 days.

1 lb., 35c; 2 lbs., 60c; 1 gal., \$1.75; 1 pk., \$3.25

1240—RED RIPPER—Seed are red. It is a vigorous growing vining pea. And on account of this it is ideal to plant on thin land to turn under. Planted mostly for soil improving and in mixtures for hay. Sow broadcast bushel to acre. They mature in about 110 days.

1 lb., 35c; 2 lbs., 60c; 1 gal., \$1.75; 1 pk., \$3.25

1237—MIXED PEAS—For hay and soil improving, our mixtures consist of upright and vining peas—the upright growing peas, such as Whippoorwill or New Era hold the vining or running peas such as Black Clay and Red Rippers, off the ground, which makes it much easier to cut for hay. We sell more mixed peas for hay than all other varieties combined. Broadcast from 1 to 2 bushels to an acre; ready to cut for hay in about 90 days.

1 lb., 35c; 2 lbs., 60c; 1 gal., \$1.65; 1 pk., \$3.00

PEANUTS

CULTURE—Plant in late April to early June in loose, loamy soil, dropping the nuts 12 to 15 inches apart in $2\frac{1}{2}$ to 3 foot rows and cover 1 to 2 inches deep. Cultivate thoroughly until the nuts begin to form. When harvesting, loosen the roots with a plow, pull the vines with the nuts attached, allow them to dry, stack around a stake, turning the nuts inward.

1177—PEANUTS (Spanish)—Bush type so they can be grown closer than most varieties; are more easily cultivated and gathered, as the nuts, which are clustered around the base of the plant, cling firmly to the roots. The vines furnish a superior hay and the nuts combined with corn make a perfect hog food. Early maturing; heavy bearer.

Price—1 lb., 35c; 5 lbs., \$1.25; 10 lbs., \$2.25

1178—PEANUTS (Tenn. Long Red)—The finest large variety grown. The long, large pods usually contain from three to four nuts, which are very rich and highly flavored. The heaviest bearer of nuts and hay of any of the large types. Excellent for home use and brings a premium on the market.

Price—1 lb., 35c; 5 lbs., \$1.25; 10 lbs., \$2.25

Red Triumph

BUCHANAN'S State Certified POTATOES

Certified potatoes must pass through field inspection by the Department of Agriculture and must be true to variety, type and free from apparent diseases. It pays to plant Certified Seed Potatoes. Treat your Potatoes with Semesan Bel—see page 68.

CERTIFIED CHIPPEWA (75 days)—Has general features of the Cobbler. Extra early, shallow eyes, resistant to disease, very white, round, smooth, heavy yielder.

CERTIFIED RED WARBA (72 days)—A new variety, skin red, flesh white and of fine quality. Tubers are oval, large size and is a very heavy cropper. The Warba potato is a two-crop variety, producing a crop in the spring, also for fall.

CERTIFIED RED TRIUMPH (75 days)—A popular early variety. Tubers are nearly round, with red, smooth skin, small, shallow eyes, very uniform in size and shape. One of the prettiest potatoes grown.

CERTIFIED IRISH COBBLER (80 days)—The eyes are strong, well-developed, and slightly indented. The flesh is creamy white and of fine quality and flavor.

Nancy Hall

STATE CERTIFIED SEED SWEET POTATOES

One bushel produces about 3,000 slips
Nancy Hall (90 days)—Color, yellow; early maturing; keeps extremely well. Most popular variety for local market and shipping.

Porto Rica (100 days)—Color, golden red; fine grained, sweet and of best flavor. Keeps well; the ideal potato for home use.

Sweet Potato Slips—See Page 5

See Prices on Potatoes on Yellow Price List Enclosed.

CANE SEED AND FORAGE CROPS

CULTURE—Plant cane seed on rich land during April, May and June in 3½-foot rows at the rate of 8 to 10 pounds per acre. Cultivate like corn, leaving plants about 3 to 4 inches apart in the row. Grain Sorghums usually produce 30 to 50 bushels of seed per acre, and Syrup varieties 125 to 200 gallons of syrup per acre. Cut for making syrup just as seeds ripen.

1195—TEXAS SEEDED RIBBON—The tallest and heaviest producing silage and fodder cane frequently yielding 18 to 20 tons per acre. The unusually large, strong stalks are supported by a vigorous, deep root system that prevents blowing down.

Price—1 lb., 35c; 5 lbs., \$1.25; 10 lbs., \$2.25

1198—EARLY AMBER—Furnishes a large yield of most nutritious forage which may be fed green or cured. If planted early it will yield 2 cuttings a season.

1197—EARLY ORANGE—Yields immense crops of leafy, sweet forage. Slightly later than amber but higher in food value.

1199—RED TOP—Very leafy, sweeter; has high feeding value and is very drouth resistant. Especially desirable to plant with corn which matures at the same time for silage.

Price, 3 above varieties—1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75

1212—SAGRAIN—(303-37)—We offer the most improved strain, selected for its uniformity, heavy grain production and strong, stocky stalks. It does well on heavy soil; thrives under the same adverse conditions as sorghum, and produces 8 to 12 tons per acre, one to two tons of which is grain, which has nine-tenths the feeding value of corn. Fine for forage and ensilage, as it is quite juicy and grows an abundance of broad, long leaves. Sagrain is relished by mules, cows, hogs and chickens.

Price—1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.75

1217—GROHOMA—A very desirable fodder cane producing heavy crops of grain and an abundant supply of fodder that is very rich in protein. Stalks and fodder contain much more sugar than most grain sorghums and on account of this the stock eat every particle. Since it stools and branches freely it requires only 5 lbs. of seed to plant an acre. Very drouth resistant.

Price—1 lb., 35c; 5 lbs., \$1.25; 10 lbs., \$2.25

1210—WHITE KAFFIR—This variety has become more valuable every year because of its drouth-resisting qualities. Grows 4 to 5 feet high, is very stocky and leafy; valuable for forage and grain. Plant from April to July, in rows 3 feet apart, drilling seed thinly. It adapts itself to a wide variety of soils. A long drouth may stop its growth but it starts again with the first rain, seldom failing to produce an abundant crop.

Price—1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75

1213—YELLOW MILO MAIZE—Drouth resistant, very productive and makes an enormous amount of nutritious grain relished by all kinds of stock. Has immense, compact heads and the seeds are large. May be cut two or three times if desired for green forage. Early maturing and adapted to most soils.

Price—1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75

1215—HEGARI—It makes an enormous yield of grain even with little moisture. Especially desirable for forage or silage since the stalks are sweet and juicy, leaves broad, long and numerous. It is dwarf, producing large heads that do not shatter. Plant 8 to 10 pounds per acre. Stands dry weather extremely well and is one of the best grain and forage crops.

Price—1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75

1214—ATLAS SORGO—A large, drouth resistant, heavy yielding, semi-sweet forage sorghum. Since it produces an unbelievable amount of grain and a tremendous tonnage of leaves and stalk of above the average in food value, we recommend this cane without reservation for silage. It is earlier maturing than our best native silage canes and corn.

Price—1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75

Sapling Syrup Cane

SPECIAL ATTENTION—Owing to the peculiar hybridization of all cane varieties, it is impossible to guarantee that they will come true. All orders for cane varieties are therefore accepted only on these conditions.

1194—SAPLING SYRUP CANE—Deservedly the most popular syrup cane in the South. Medium height, strong stalks which do not blow down easily. A heavy yielding type frequently producing 125 to 200 gallons per acre of medium amber colored syrup of mild, delicious flavor. Because of its true, pronounced molasses flavor, this syrup easily finds a ready market and since pure Syrup Cane seed commands a premium, you will find this an excellent cash crop.

Price—1 lb., 40c; 5 lbs., \$1.50; 10 lbs., \$2.75

BROOM CORN

Easily grown on any land adapted to corn. Plant 6 lbs. per acre, on a fine seed bed, 1½ inches deep in 3½-foot rows, when ground is warm. Thin out to 2 to 4 inches.

1273—STANDARD EVERGREEN—Grows 8 to 10 feet tall. Yields a long, heavy brush, free from heavy center stems and crooked straws. Ready to cut in about 100 days.

Price—1 lb., 45c; 5 lbs., \$1.75; 10 lbs., \$3.25

1272—SCARBOROUGH (Dwarf Type)—It is earlier and has somewhat longer brush than Evergreen. Bears fewer seeds and easier thrashed than many other varieties.

Price—1 lb., 50c; 5 lbs., \$2.00; 10 lbs., \$3.75

MILLET

1185—TENNESSEE GROWN GERMAN MILLET (Big Headed Type)—Broadcast 50 pounds to acre. German Millet makes a quickly grown, easily cured and large yielding, nutritious hay crop. It comes so quickly that it can be sown after wheat, oats or other early crops are harvested and leaves the land clean. Millet should be cut while in bloom. As a summer catch-crop, it has few equals, for it makes a crop in about sixty days.

Price—1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75

1188—PEARL OR CAT-TAIL MILLET—Will grow 10 to 12 feet high, but for the greatest amount of green feed it should be cut when 3 to 4 feet high. It will then stool out enormously. Gives three or four cuttings a season, and keeps on growing until frost. It is highly nutritious. Should not be planted until the ground is thoroughly warm and does well even on poor soil and in dry seasons. Plant 5 pounds to the acre, in drills 3 feet apart.

Price—1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.25

1268—MAMMOTH RUSSIAN SUNFLOWER

Every Southern farm should plant some of this large headed variety of Sunflower for their poultry. Will produce more grain on medium to thin land than corn. Sow 10 lbs. per acre in drills 3 feet apart and cultivate as you would corn.

Postpaid—Pkt., ¼ lb., 15c; 1 lb., 40c; 5 lbs., \$1.50; 10 lbs., \$2.75

Atlas Sorgho

SOY BEANS for OIL, SOIL, HAY

Ralsoy Soy Beans

1225—LAREDO SOUTHERN (Hay, 110 days; Seed, 135 days)—Recognized as one of the best hay and soil building beans for the Central South. Seed small, bushel plants 4 to 6 acres in 2 foot rows; 1 acre broadcast. Cover about 1 inch. Since it will endure more cold, adverse weather than any other variety, it can be planted much earlier. Can be drilled in fall planted oats about April 1 with no injury to oats and by cutting oats high secure two crops on same land in one year. Growth is upright, branching freely; hay quality excellent.

Price 5 lbs., 90c; 10 lbs., \$1.60; 1 pk. (15 lbs.), \$2.25

1224—BILOXI (Hay, 135 days; Seed, 165 days)—An upright variety, growing 4 to 5 feet high, covered with a dense mass of foliage that does not shed easily. A heavy yielder of beans; feeding value excellent because high in protein; a fine bean for hogging down, for planting with corn or sorghum. The pods are less liable to pop than most varieties; in fact, they hardly shatter at all. They require a long season to mature, but make a tremendous yield of hay or beans.

Price 5 lbs., 90c; 10 lbs., \$1.60; 1 pk. (15 lbs.), \$2.25

1226—OTOOTAN (Hay, 140 days, Seed, 170 days)—Few Soy Beans can equal Ootootan as a hay maker. Its late maturity is more than overcome by the abundant growth, its fine stems and abundant foliage, and the fine texture of its hay, which cures quickly. It differs from most varieties in having many leafy branches instead of a coarse central stem, making it easy to cut and easy to cure. Planted in 3-foot rows, they will cover the land with a mass of foliage.

Price—5 lbs., \$1.25; 10 lbs., \$2.10; 1 pk. (15 lbs.), \$3.00

1219—TANNER (Hay, 115 days; Seed, 140 days)—A comparatively new bean, but it gives more promise as a hay bean than any introduced since the Southern Laredo. Produces as much or more hay than Laredo, of even superior quality. Stock seem to relish some soy bean hay more than others and they will leave hay of other beans to get the Red Tanner, cleaning up stems and all. Truly it seems good to the last drop. Don't fail to try some of this unusual bean.

Price 5 lbs., 90c; 10 lbs., \$1.60; 1 pk. (15 lbs.), \$2.25

1230—VIRGINIA (Hay, 100 days; Seed, 125 days)—On account of its abundant growth and early maturity the Virginia makes a most excellent hay bean. The vines make a fine growth, are filled with pods, stand about 3 feet high, are easy to cut and easy to cure. The stems being fine and the leafage profuse, adapts it particularly well for hay making.

Price—5 lbs., 75c; 10 lbs., \$1.35; 1 pk. (15 lbs.), \$1.75

All Prices Below Post Paid Through Third Zone

CULTURE—Soy Beans may be planted either broadcast or in rows. Usually a better crop is had when planted in drills and cultivated, and few crops leave the land cleaner and in better condition for the following crop. They grow equally well on light and heavy soils, but on heavy soils they should not be planted more than 1 to 1½ inches deep except in dry seasons. On light sandy soils plant deeper, but not more than 3 inches deep. When sown broadcast sow 1 to 1½ bushels to the acre, in rows ¾ to ½ bushel per acre. Plant in April, May, June or July.

1218—OGDEN (Hay, 110 days; Seed 135 days)—The most desirable full season non-shattering oil bean developed to date. In many tests it has produced almost phenomenal yields. The beans are yellow with a slight greenish cast; oil content high and the mills pay top prices for Ogdens. It branches freely and produces sufficient foliage to make an excellent hay bean. Its heavy production of large beans make it most desirable for hogging off.

Price—5 lbs., 75c; 10 lbs., \$1.30; 1 pk. (15 lbs.), \$1.65

1221—RALSOY (Hay, 100 days; seed 120 days)—A pure line strain of the very popular Arksoy. This bean has the necessary characteristics of the perfect oil bean, high percentage of oil, earliness, heavy yields (frequently 40 bu. per acre). It sets the first beans at the right height for combining and all plants mature at the same time. It is almost shatter proof thus prolonging the harvest season until mid-winter with little loss of beans.

Price—5 lbs., 75c; 10 lbs., \$1.30; 1 pk. (15 lbs.), \$1.65

1220—ARKSOY 2913 (Hay, 100 days; seed, 120 days). An improved selection of the original Arksoy, being more uniform in growth and maturity. A prolific bearer which holds its beans well and is still a most desirable oil bean.

Price—5 lbs., 75c; 10 lbs., \$1.30; 1 pk. (15 lbs.), \$1.65

1233—MACOUPIN (Hay, 80 days; Seed, 100 days)—No doubt the finest early maturing oil mill bean developed to date. Harvest frequently starts last of August if planted early. Seed yield very heavy, 25 to 35 bushels per acre. Extremely non-shattering and ranks first in oil percentage. Will mature a full crop of beans when planted after early oats are harvested. Produces hay of fair quality.

Price—5 lbs., 75c; 10 lbs., \$1.30; 1 pk. (15 lbs.), \$1.65

1223—MAMMOTH BROWN (Hay, 115 days; Seed, 140 days)—Makes a large upright growth, with plenty of foliage and an abundance of pods. Is a prolific yielder of beans, robust and is more disease-resistant than most varieties. Does not shatter badly. They are especially fine for late hog pasture.

Price 5 lbs., 90c; 10 lbs., \$1.60; 1 pk. (15 lbs.), \$2.25

1231—MAMLOXI (Hay, 120 days; Seed, 145 days)—Is upright in growth and produces excellent hay if planted thick. A very prolific yielder of beans which shatter little and the best late maturing oil bean. Probably the best all purpose soy bean.

Price—5 lbs., 75c; 10 lbs., \$1.30; 1 pk. (15 lbs.), \$1.65

1234—AVOYELLES—Developed in Louisiana and found to be very resistant to cutworms, or destructive pests on other varieties there. Seeds are black, larger than Ootootan. Makes a splendid hay variety. Also a prolific bean yielder.

Post paid—5 lbs., \$1.00; 10 lbs., \$1.75; 1 pk. (15 lbs.), \$2.50

1232—VOLSTATE—A high yielding yellow soybean. This is a later development by Prof. H. H. Ogden of the University of Tennessee. A little later in maturity than Ogden, but a week earlier than Tokio. Non-shattering qualities and excellent for forage.

Post paid—5 lbs., 75c; 10 lbs., \$1.30; 1 pk. (15 lbs.), \$1.65

1229—MUNG BEANS—Should be planted in May for hay or turning under. Mung Beans are great soil builders and produce a large quantity of excellent hay. They are very hardy and disease resistant. The seed are small and it takes 5 to 8 pounds to drill an acre in 3-foot rows. Broadcast, 25 to 35 pounds an acre. Beans mature in 90 to 100 days, depending on the season.

Price—5 lbs., \$1.25; 10 lbs., \$2.00; 1 pk. (15 lbs.), \$2.75

1228—90-DAY OR SPECKLED VELVET BEANS—It is very prolific and can be planted later than other sorts on account of its early maturity. Velvet Beans make a greater growth of vines and beans than any other known forage plant in the same length of time, therefore, one of the best soil building legumes. Excellent for grazing off green and cattle will fatten on them even after frost has killed vines.

Price—5 lbs., \$1.25; 10 lbs., \$2.30; 1 pk. (15 lbs.), \$3.15

MISCELLANEOUS FARM SEEDS

O A T S

CULTURE—For spring planting sow $1\frac{1}{2}$ to $2\frac{1}{2}$ bushels per acre on a well prepared seed bed as soon as possible after danger of hard freeze. In fall sow in early October, later in the lower South, $1\frac{1}{2}$ to $2\frac{1}{2}$ bushels per acre. Cover about 8 inches.

1276—COLUMBIA SPRING OATS—A very desirable, extremely early spring oat, very similar, but, in our opinion, superior to the long popular Early Burt variety. Even when planted a little late, will mature before hot weather. Produces large, heavy, well filled heads of plump grain on stiff, strong stems which do not blow down easily. Sown alone or with rape on rich land will furnish more pasture in less time than any other spring crop.

1275—FERGUSON 922—THE BEST STRAIN OF RED RUST RESISTANT OATS. Planted in spring or fall. When planted in fall this oat heads the list in average yield per acre in a ten year test at the Rice Branch Experiment Station tests, Stuttgart, Ark. Also an excellent oat for early spring planting to cut when beginning to head for hay or harvesting when mature for grain. Rust and smut resistant; furnishing much grazing when planted early in fall. Withstands cold and sudden changes unusually well.

1278—STANTON OATS—A new oat which has already established itself in production and cold resistance. The grain is very compact, heavy, carrying little husk; very resistant to smut and rust. Stools freely, making it excellent for winter grazing. Heads very long, borne on stiff, storm resistant straw. Matures in the same length of time as Ferguson, planted either spring or fall.

1274—VICTORGRAIN OATS—This oat is similar but far superior to the long popular Fulgrain because it is much more resistant to cold and consistently produces a much heavier yield of grain per acre. This has been proven in tests over the entire cotton belt. It is earlier maturing than red oat strains, rust and smut resistant. Straw very stiff, medium height, making it one of the most storm resistant oats. The grain is plump, has low per cent of hulls, therefore, has a high feeding value. Plant either fall or spring.

1277—FULGRAIN OATS—Coker's Fulgrain Oats are the earliest maturing oats known, the heaviest producing that we know of anywhere. They are very cold resistant. Yields of 60 to 90 bushels are common and one record crop of 138 bushels per acre was recorded. Sow $1\frac{1}{2}$ bushels per acre. This is ample because Fulgrain stools profusely. It is about the best grazing oat known.

VETCH AND AUSTRIAN WINTER PEAS

1176—SAND OR HAIRY VETCH—A very desirable winter legume used principally for soil building. Well adapted to all types of soil except extremely poor. Plant in cotton or corn middles, 20 pounds per acre, before November 1 either with a vetch planter or by sowing broadcast and covering with small harrow or middle buster. Can be turned under the next spring in time to plant cotton, corn, etc. Never winter kills when properly planted, and frequently doubles the yield of the succeeding crop if properly inoculated. A fair grazing and hay crop when planted with oats, beardless barley, etc.

1250—AUSTRIAN WINTER PEAS—Plant just as described for Hairy Vetch above, except use 30 to 35 pounds per acre. Like Vetch, it adds nitrogen equal to about 500 pounds Nitrate of Soda per acre when turned under at the proper time. Will grow on poorer soil than Vetch, but is not as winter hardy. Will be ready to turn under about two weeks earlier than Vetch. Makes a very nutritious hay when sown with oats.

WILD WINTER PEAS—Also known as Caley and Singletary. A valuable soil improving winter legume and furnishes abundant green matter for turning under. They reseed themselves so do not have to be planted every year unless overgrazed. Do not graze after seed pods mature. Plant 40 lbs. per acre; in oats 20 to 30 lbs. Inoculate with Nitragin C.

WHEAT

1257—HARDIRED WHEAT—Results of tests over most of the South show this to be the highest producing wheat yet introduced in this area. This is due to its early maturity and resistance to rust and smut.

1259—COKER RED HART—A very early maturing wheat developed in the South for grazing and grain production. In many tests over the Central South this heavy stooling variety has consistently been the leading grain producer. Has long, heavy compact heads with plump grains, excellent for milling.

R Y E

1265—ABRUZZI RYE—If sown on good land in late August or early September it will be ready for grazing in about six weeks, and will furnish abundant grazing for several months if not grazed too close. Unless wanted for grazing, do not sow before late September, as it may go to seed during the fall; late October or early November is early enough to sow for a grain crop.

1267—COMMON RYE—It is cheaper in price and can be sown from August 15 to December 15 for grazing and erosion control. Can be sown with no preparation in corn and other row crops in late August for winter and spring grazing.

BALBO RYE—Balbo Rye is characterized by a rapid, upright habit of growth. In this respect it is very much like Abruzzi. The upright habit, coupled with the rapidity of growth, makes Balbo of outstanding value for early pasturage. Sow 1 to $1\frac{1}{4}$ bushels per acre.

B A R L E Y

1263—BEARDLESS BARLEY—It makes a quick growing, excellent fall and winter pasture, controlling erosion unusually well. Also a heavy yielding grain crop especially desirable for hogging off since it has no beards. Barley is almost exactly equal to corn in food value and will give practically the same yields of grain as corn on any medium to good soil. Sow $1\frac{1}{2}$ to 2 bushels per acre.

1264—WINTEX BEARDED BARLEY—A comparatively new selection which has consistently yielded more grain and grazing than any other barley since it was released to the public in 1939. Exceptionally desirable for grazing since its winter growth is more upright; has very large leaves and stools heavily. Mature plants are medium tall with very strong straw, large heads and the grain is noticeably large and very heavy.

**BUCK BRAND TESTED SEEDS****PEACH AND PLUM SPRAY SCHEDULE**

Time of Application	Disease or Insect	Material to Use for 50 Gallons
Dormant—After leaves are shed in the fall and before buds swell in the spring when temperature is above 40	Scales and leaf curl	No. 34 Copper 1½ pounds or Bordeaux 4-4-50 with Buchanan's Oil Emulsion 2½ gals. or Kleenup Ready-Mix 1¾ gals. Or use alone. Dry lime sulphur 12½ lbs. or liquid lime sulphur 4 gal.
Shuck stage—when the last of the blossoms have fallen	Curculio Leaf spot Brown rot	Sulfuron 3 pounds. Zinc sulfate 2 pounds. Lead Arsenate 1 pound. Lime 3 pounds. Fluxit Ortho Spreader or Soy Bean Flour ¼ pound.
First cover—about 10 days later	Curculio Scab Leaf spot	Same materials as previous spray.
Second cover—12 days later	Brown rot Scab Leaf spot	Same materials as previous spray, except poison may be omitted on fruit about ripe.
Third cover—12 days later	Curculio Leaf spot Brown rot	Same materials as previous spray, except poison may be omitted on fruit about ripe.
Later Sprays	Brown rot in rainy seasons	Sulfuron 3 pounds.

APPLE SPRAY SCHEDULE

Time of Application	Disease or Insect	Material to Use for 50 Gallons
Dormant—After leaves are shed in the fall and before buds swell in the spring when temperature is above 40	Scale	Buchanan's Oil Emulsion 2½ gallons or Kleenup Ready-Mix 1¾ gallons.
Delayed - dormant — when young leaves are not more than ¼ inch long	Scale Scab Aphids	Lime-sulfur (32°) 8 gallons. Nicotine sulfate ½ pint (only when aphids are present).
Prepink—Before bud clusters separate	Scab Aphids	Lime-sulfur (32°) 1¼ gallon. Nicotine sulfate sulfate ½ pint (only when aphids are present).
Pink-bud—when bud clusters are separate and showing pink	Scab Aphids	Lime-sulfur (32°) 1¼ gallon, same as prepink. Nicotine sulfate ½ pint (only when aphids are present).
Full-bloom—When two-thirds of blooms are open	Blossom blight Scab	No. 34 Copper ¾ pound, or Bordeaux 1-3-50.
Calyx or Petal Fall—When most of blossoms have fallen	Codling moth Scab	Lime-sulfur (32°) 1 gallon and Hydrated lime 5 pounds, or 4 pounds Sulfuron. Use ¼ pound Fluxit Ortho Spreader or Soy Bean Flour with either of the above. Lead Arsenate 1½ pounds.
First cover—7-10 days after the calyx spray	Blotch Scab Codling moth	No. 34 Copper 1½ pounds or Bordeaux 2-4-50. Spreader as previous spray. Lead Arsenate 1½ pounds. Add Lime 2½ pounds when using No. 34 Copper.
Second cover—10 days later	Blotch Scab Codling moth Leafhoppers	No. 34 Copper 1½ pounds, or Bordeaux 2-4-50. Half gallon Orthol-K Summer Oil. Spreader as previous spray. Add Lime as previous spray. Lead Arsenate 1½ pounds. Nicotine sulfate (only if leafhoppers are numerous).
Third cover	Blotch Sooty mold Bitter rot	No. 34 Copper 1½ pounds, or Bordeaux 2-6-50. Half gallons Orthol-K Summer Oil. Spreader as previous spray. Lead Arsenate 1½ pounds. Add Lime as previous spray.
Fourth cover	Bitter rot, Blotch Codling moth	Same as third cover.
Later Sprays	Bitter rot Blotch	No. 34 Copper 2 pounds, or Bordeaux 4-6-50. Use arsenate of lead if worms are present, omitting summer oil.

GRAPE SPRAY SCHEDULE

Time of Application	Disease or Insect	Material to Use for 50 Gallons
Pre-bloom—when shoots are 4-6 inches long	Mildew Black rot	No. 34 Copper 1½ pounds, or Bordeaux 4-6-50.
Immediately after grapes set	Mildew Black rot	No. 34 Copper 1½ pounds, or Bordeaux 4-6-50. Fluxit Ortho Spreader or Soy Bean Flour ¼ pound.
Two weeks later	Mildew Black rot	No. 34 Copper 2 pounds, or Bordeaux 4-6-50. Lime 2½ pounds. Lead Arsenate 1½ pounds. Spreader as above ¼ pound.
When nearly grown	Mildew Black rot	No. 34 Copper 2 pounds, or Bordeaux 4-6-50. Fluxit Ortho Spreader or Soy Bean Flour ¼ pound.

FRUIT GROWERS' SUPPLIES

EVERMARK—For writing on all plant labels. Will not rub off, will not wash off. Don't take chances—use **EVERMARK** exclusively. Made especially for growers. **Post paid—Each, 15c; 2 for 25c.**

WHITE WOOD LABELS

These labels made of White Wood, need no paint and will last for many months—used by professional market gardeners, orchardists, nurserymen for labeling trees, plants, shrubs, etc.

Dahlia or Tree Labels with copper wire, 3½-inch. **Post paid, 50, 30c; 100, 50c; 500, \$1.35; 1,000, \$2.50. At Store, 50, 25c; 100, 40c; 500, \$1.20; 1,000, \$2.25.**

Pot Labels, 5-in., **post paid, 50, 35c; 100, 55c; 500, \$1.50. At Store, 50, 25c; 100, 40c; 500, \$1.25; 1,000, \$2.30.**

Pot Labels, 8-in., **post paid, 50, 40c; 100, 75c; 500, \$2.00. At Store, 50, 30c; 100, 50c; 500, \$1.75; 1,000, \$3.00.**

JUTE TWINE—2-PLY

For bunching vegetables, tying plants for food to stakes and trellises.

EEZY WEAR

Garden Gloves

Have Every Feature You Want
 in a Garden Glove

All-Leather—Dirt Proof—Durable—Soft
 Comfortable—Washable

Easy on the hands and easy to wear!

Economical, too—outwear 6 pairs of ordinary fabric gloves, are washable and can be used the year round for garden, housework, yard, painting, furnace, garage, etc. You'll like them. Sizes for Women (small, medium, large) for Men (small, medium, large). Price, 75 cents a pair. **Post paid, (2 pr. \$1.40.)**

No. 230—California pattern, flat spring, ratchet nut, 9 in. Post paid, \$1.45. At Store, \$1.35.

Snap-Cut Pruner

119—SNAP-CUT PRUNER—The snap-cut design makes an extremely easy and fine cutting tool. It is proclaimed by fruit growers, gardeners, etc., as the finest shear ever produced. **Each, post paid, \$2.10. At Store, \$2.00.**

118—LADIES' SNAP CUT—Post paid, \$1.35. **At Store, \$1.25.**

No. 750—FLOWER SHEAR—Cuts and holds flowers. A perfect one-hand flower picker. **Post paid, 70c. At Store, 60c.**

No. 2219—A low priced but efficient pruner, 8 inches. Post paid, \$1.35. At Store, \$1.25.

No. 1312S

No. 1312S—For general home or orchard, use the Tip-Top Tree Trimmer; is an easy cutting, easy to operate tool whose 12-foot handle is furnished in three sections. The 12-inch saw blade is a valuable addition, as it makes the tool a pole saw as well as a trimmer. **At Store, \$3.35.**

No. 149HH—A long-handled pruner using the famous Snap Cut Action. Ash handles pinned to the shank. This shear will cut large limbs with unbelievable ease. 27 inches. Post paid, \$3.75. At Store, \$3.50.

"TWIST-EMS"

"Twist-ems"—strong, dark-green "invisible" tapes with wire reinforcing—protect stems, permanently support annuals, perennials, vines, shrubs and vegetables. Eliminates unsightly twine, raffia and needless work with shears. Grand for flower arrangement. Millions used. **Buy today.**

Post paid At Store
 125 8 inch size 30c 25c

No. 20—California Pruning Saw, made of genuine silver steel. Has a very narrow blade with rip teeth. Blade tapers from ¼ inch wide at point. Length 12 inches. **Post paid, \$1.65. At Store, \$1.50.**

No. 16 "AAA" POLE TREE PRUNER

No. 16 Pole Pruner—Made of genuine SILVER STEEL fitted with peg teeth and fastened to casting with 5/16 inch bolt and wing nut. The blade is adjustable to cut at any angle. Casting is hollowed and bored for slipping on to a pole of any desired length so that it may be operated to reach high limbs from the ground, avoiding the use of ladders. A hook on this casting for dislodging cut limbs. Pole not furnished. Length inches—16. **Post paid, \$2.90. At Store, \$2.75.**

GRAFTING WAX

It is used for grafting, budding, top working, etc., of all kinds of fruit, ornamental trees, shrubs and vines. It is unexcelled for use in painting cuts, bruises and after trimming. **Post paid, ¼ lb., 25c; ½ lb., 40c; 1 lb., 60c.**

No. 055—Lopping Shears

No. 055—Light weight but strong enough for heavy work; blade and hook are of hardened and tempered steel. 28 inches. **Post paid, \$2.95. At Store, \$2.75.**

No. 056—Same as above. except 36 inches long. **Post paid, \$3.50. At Store, \$3.25.**

No. 44 10 ft. with stop cock, each..... 4.75
No. 46 12 ft. with stop cock, each..... 5.50

F.O.B. MEMPHIS

No. 666—MAJOR DUSTER

Pump 13/4-in. diameter, 13-in. stroke. Powder reservoir 4½-in. diameter, 4½-in. long. Filler cap 2¾-in. diameter, for easy filling. A break up screen prevents clogging. Post paid, \$1.10; at Store, 95c.

No. 435—CARDINAL CONTINUOUS

Sprays efficiently fly oils in the dairy barn, milk house, creamery, etc. Handles most oil base solutions and insecticides, breaking them up into a fine vapor. Adjustable nozzle takes care of solutions of varying consistency and delivers any type spray from finest fog to solid stream. Holds 3 quarts.

No. 435—Post paid, \$1.50; at Store, \$1.30.

No. 432—CONTINUOUS

Handles fly oils, liquid insecticides, disinfectants, in fact all solutions without sediment. The adjustable nozzle permits the operator to vary the spray from a generous volume of fine fog to a solid stream.

No. 432—Heavy tin, post paid, 95c; at Store, 80c.

No. 612—PATROL—An effective pattern for truck gardens, field crops, etc. The two 12-inch extensions and reversible angle

nozzle permit the operator to reach all parts of the plant easily. Pump—1¾x14 inches. Powder Reservoir—Glass, specially designed. Contents always visible. Wide mouth, permits easy filling. Any standard fruit jar can be used.

No. 612—Patrol, with Jar, post paid, \$1.20; at Store, \$1.00.

No. 766—ADMIRAL DUSTER—The best hand duster ever developed. It will effectively apply any insecticide dust in any quantity desired. Its special plunger develops a powerful air blast. An efficient method of agitation is provided by forcing air through the dust, thus making a more positive and uniform discharge. Has 24 in. extension rod with nozzle adjustable for either straight or angle discharge.

No. 765 — Post paid, \$1.35; at Store, \$1.20.

MEMPHIS, TENNESSEE.

BUCK BRAND TESTED SEEDS

247GA

No. 247GA—DU-MORE — Galvanized tank, cap. 4 gal. open top; 36 in. high pressure spray hose; Perfection automatic shut-off valve which locks open for continuous spraying; 6-in. tubular intake strainer; 2-ft. extension; all purpose spray nozzle. Weight 18 lbs.

Post paid, \$18.90; at Store, \$18.50.

No. 133—TROMBONE—High pressure spray pump for handling all solutions. Continuous in operation, maintaining a steady discharge without undue exertion on the part of the operator. All parts are brass with bronze ball valve, easily accessible.

No. 133 — Trombone, post paid, \$5.15; at Store, \$5.00.

No. 122—MODOC BUCKET SPRAYER—Double action delivering a continuous spray. All working parts are brass. Foot rest is adjustable for various heights. Comes equipped with 3 feet of hose, 2 foot brass extension and brass nozzle with variable discs.

No. 122—Modock, post paid, \$5.45; at Store, \$5.25.

No. 36
SUNSHINE
SPRAYER

Hudson 4A Barrel Pump

No. 4A—HUDSON BARREL PUMP—It is a powerful all purpose sprayer; develops up to 200 lbs. pressure. Complete with 10 ft. $\frac{3}{8}$ in. spray hose, 3 ft. extension rod, perfection automatic shut-off valve and angle spray nozzle. Pump cylinder $1\frac{1}{4} \times 6$ in., air chamber 2x27 in.

At Store, \$13.25.

No. 610—HUDSON DUSTER—Exactly like 608 below except discharge equipment can be adjusted to apply dust in front or behind the operator. By dusting behind avoids the possibility of inhaling the dust.

Post paid, \$16.45; at Store, \$16.00.

No. 608—HUDSON DUSTER—Develops an unusually powerful air blast. It delivers more than enough air at the nozzle to prevent clogging and to break the powder into a fine floating dust. It has two agitators, one oscillating, one rotary. Will handle any powder, light or heavy.

Gears are steel, running in oil bath, enclosed in dust proof housing.

Post paid, \$14.15; at Store, \$13.75.

IDEAL
PORTABLE
SPRAYER
34

No. 34—IDEAL PORTABLE SPRAYER—The perfect two-man sprayer for orchard, vineyard, truck garden, dairy barn or poultry house. It has a non-clogging tubular brass screen, which is cleaned by a special dasher agitator and handles white wash and cold water paints. Has a 4A barrel pump which will maintain 200 lbs. pressure, securely mounted in an 18 gallon heavy galvanized corrugated tank. Has 10 feet $\frac{3}{8}$ -inch spray hose, 3-foot extension rod and automatic shut-off.

Price—At Store, \$22.25

No. 36—SUNSHINE—Fits the needs of the florist or nursery man, because its width permits its use between the narrow rows; also adapted for orchards, vineyards and truck gardens, for whitewashing poultry houses and dairy barns. Valves are bronze balls mounted in a brass cage. Cylinder is seamless brass. Air chamber has ample capacity for high pressure and steady discharge. Tank is heavy gauge copper bearing galvanized steel; capacity $12\frac{1}{2}$ gallons. Discharge equipment consists of 6 feet of $\frac{3}{8}$ -inch spray hose, 3-foot brass rod extension, angle spray nozzle and perfection automatic shut off which can be locked open for continuous spraying. Fitted with non-clogging tubular brass screen and special dasher agitator which cleans it thoroughly at each stroke of the pump plunger.

R.B. BUCHANAN SEED CO. MEMPHIS, TENNESSEE.

BUCK BRAND TESTED SEEDS

BUCHANAN'S INSECTICIDES

Insecticides are for controlling insects and diseases of fruits and vegetables and should be handled with care. When not in use put out of the reach of children and pets.

Post Paid Prices on This Page Through Third Zone Only.

We will refund full value for Oil-Emulsion and Lime Sulphur containers prepaid Memphis.

An Emulsion can be made of any oil from coal oil up to the extremely heavy oils, but Oil Emulsion made of light and low grade oils will not control scale and will frequently injure fruit trees. Buchanan's Oil Emulsion is made exactly according to U. S. D. A. Formula, using heavy oil.

BUCHANAN'S OIL EMULSION—For a dormant spray, Buchanan's Oil Emulsion provides the cheapest, most effective and complete control of scale insects, aphids and thrips that winter over on trees. For scale control on all fruit trees, use at the rate of 1 gallon Oil Emulsion to 20 gallons water, slightly more if scale infestation is heavy. To get best results, every part of the tree must be completely covered. Spray in fall, after leaves and fruit are off, or in spring before buds swell. To control peach leaf curl and scale, combine Buchanan's Oil-Emulsion with prepared Bordeaux Mixture or home-made Bordeaux as follows:

In each 20 gallons of water dissolve 10 ozs. No. 34 Copper Fungicide or dissolve 3¼ pounds Commercial Bordeaux Mixture, then, add 1 gallon of Buchanan's Oil-Emulsion to the 20 gallons of solution and mixture is ready to use for leaf curl and scale control. NEVER add Oil-Emulsion to concentrated copper solutions, as this would produce Curdling. Always add the Oil-Emulsion when the spray tank is almost filled with water. Do this when using No. 34 copper or any strength Bordeaux.

Price—Post paid—1 qt., 50c; ½ gal., 65c; 1 gal., 85c. At Store—qt., 35c; ½ gal., 50c; gal., 65c; 5 gals., \$2.25; 10 gals., \$4.00; 15 gals., \$5.25; 50 gal. bbl., \$11.00, plus \$3.00 for container.

LIME SULPHUR SOLUTION—Is an insecticide as well as a fungicide, free from sediment and works through the nozzle easily. Used as an insecticide to control San Jose scale, blister mite and similar sucking or scale insects, at a dilution of 1 gallon to 8 gallons of water and applied either after the leaves drop in the fall or before the buds open in the spring. For small quantities, use 1 pint Lime Sulphur Solution to 1 gallon of water. Never use at this strength when trees are in foliage. The spring application, just before the buds swell, will assist in controlling leaf blister mite, plant lice and peach leaf curl and is advisable in orchards when the scale is already under control. For early spring and summer spraying to control scab, leaf spot and similar fungus diseases on apples and pears, 1 gallon to 50 gallons water.

Price—Post paid—1 qt., 45c; ½ gal., 60c; 1 gal., 80c. At Store—1 qt., 30c; ½ gal., 45c; 1 gal., 60c; 5 gal., \$2.15; 10 gal., \$4.00; 15 gal., \$5.60; 50 gal. Bbl., \$9.50, plus \$3.00 for container.

BLUESTONE-COPPER SULPHATE—(Formula for Making Home Made Bordeaux.) In case you wish to use Bluestone and Lime to make your Bordeaux, proceed as follows: Dissolve our Snowform (Powdered) Bluestone at the rate of 4 pounds to 50 gallons of water. It will require only a few minutes stirring to dissolve Snowform Powdered Bluestone. Then while stirring add 6 pounds hydrated lime to the above mixture. If the above directions are correctly followed you will have 50 gallons of standard strength 4-4-50 Bordeaux. In case you need a 3-4-50 strength, use only 3 pounds of the Snowform Bluestone, and if you wish a 5-4-50 strength, use 5 pounds of the Snowform Bluestone, but do not change the other ingredients. By combining the Bluestone and the Lime at different proportions, one can make any strength Bordeaux Mixture desired. Bluestone is also used in spraying potato storage houses—use 1 pound to 5 gallons water.

SNOWFORM (Powdered)—Post paid—1 lb., 25c; 5 lbs., 70c; 10 lbs., \$1.15; 25 lbs., \$2.70. At Store—1 lb., 15c; 5 lbs., 60c; 10 lbs., \$1.00; 25 lbs., \$2.35; 50 lbs., \$4.35.

SCALECIDE controls scale aphids, red mite and many other pests of apples, peaches, pears, etc. Scalecide kills many overwintering codling moth larvae, and aids in cleaning up cankers. The year after year use of Scalecide invigorates the trees. The most complete dormant spray for fruit trees, shrubs and vines. Full directions on each container.

Price—Post paid—1 qt., 90c; 1 gal., \$2.00. At Store, 1 qt., 75c; 1 gal., \$1.75; 5 gals., \$6.35; 15-gal. drum, \$14.95.

ACME STOP—A sticky barrier used to band trees, shrubs and vines to prevent insects from crawling up the foliage. Its principal use is on apple trees, shade trees, as well as grape vines.

Postpaid—6 oz., 45c; 1 lb., 75c; 5 lbs., \$3.20; 10 lbs., \$5.30.

ORTHO DRY SPREADER (A Spray Depositor)—Is a distinct improvement over the old type spreading agents. Small amounts of Ortho Spreader give quick wetting, and most important of all, small amounts provide an even, thick protective coverage which greatly enhances the effectiveness of the spray. Due to quicker wetting, less spray material is required to get good coverage. Use at the rate of ¼ pound to 50 gallons of water.

Post paid—1 lb., 36c; 5 lbs., \$1.40; 10 lbs., \$2.60; 25 lbs., \$5.85. At Store—1 lb., 26c; 5 lbs., \$1.20; 10 lbs., \$2.30; 25 lbs., \$5.25.

SOY BEAN FLOUR SPREADER—A most excellent spreader and sticker produced by the farmer. Compatible with all summer sprays. Being a vegetable product it does not change the spray material chemically in the least. The most economical spreader and sticker developed to date and has no superior. Orchardists have not used a spreader consistently in the past, but now there is no reason to leave out this valuable asset to the spray program. It prevents excessive run off of the material you want to remain on the fruit and leaves, giving a uniform, even, heavy film of the fungicides and insecticides at almost no cost. Use ¼ pound per 50 gallons of spray.

Price—Post paid—1 lb., 30c; 5 lbs., 80c; 10 lbs., \$1.30; 25 lbs., \$2.75. At Store—1 lb., 20c; 5 lbs., 65c; 10 lbs., \$1.10; 25 lbs., \$2.25; 50 lbs., \$4.25.

LEFT
Apple sprayed with Lead Arsenate, no Spreader. Note blotchy, uneven distribution of the Lead. This means poor control.

RIGHT
Apple sprayed with Lead Arsenate-Spreader combination. Note even Lead coverage. Better protection from worm attack.

DRITOMIC SULPHUR—(Peach Dritomic or Apple Dritomic)—It is a spring and summer spray, safe to apply to fruit and foliage where older type materials would develop caustic tendencies. The universality of its use, right through the growing season, is ample evidence. Its fineness enables it to go into suspension easily, and without sediment. You have no annoying loss of time to clean clogged spray nozzles. Dritomic Sulphur is an excellent preventive for all fungus troubles, bitter brown rot, scab, etc. We can furnish Peach Dritomic or Apple Dritomic. When ordering specify the one desired.

Apple Dritomic—Post paid—4 lbs., 75c; 12 lbs., \$1.80; 24 lbs., \$3.10. At Store—4 lbs., 60c; 12 lbs., \$1.50; 24 lbs., \$2.65.
Peach Dritomic—Post paid—5 lbs., 75c; 15 lbs., \$1.85; 25 lbs., \$2.75. At Store—5 lbs., 60c; 15 lbs., \$1.50; 25 lbs., \$2.25

BUCK BRAND TESTED SEEDS

BUCHANAN'S DEPENDABLE INSECTICIDES

Most insecticides are poison, for the control of insects. Handle with care.

Post Paid Prices on This Page Through Third Zone Only

ZINC SULPHATE—Peach Bacterial Spot has become destructive in practically all sections of the South. Zinc Sulphate is the best control for this disease. Use it in each of the

summer sprays on peaches, beginning with the petal fall spray. Combine our Zinc Sulphate with whatever summer spray you are using on your peaches, at the rate of 2 pounds to each 50 gallons. If you are using as much as 4 pounds lime to 50 gallons water in your regular material, additional lime is not necessary; otherwise add 2 pounds lime to each 50 gallons. Price, post paid—1 lb., 25c; 5 lbs., 75c; 10 lbs., \$1.20; 25 lbs., \$2.75. At Store—1 lb., 15c; 5 lbs., 55c; 10 lbs., 95c; 25 lbs., \$2.25; 50 lbs., \$3.10.

ACME KOPPER SHIELD PRUNING PAINT—A specially prepared liquid paint containing 2% copper for treating wounds left by pruning, storms, or accident, to prevent such diseases as European Canker Fungus, Hard Rot, and certain other fungi. Copper has no equal as a fungus preventative. Forms a protective shield while the tree is naturally overcoming the shock. Covers twice as much surface as the ordinary pruning compound.

Post paid— $\frac{1}{2}$ pt., 40c; pt., 55c; qt., 90c; gal., \$2.65. At Store— $\frac{1}{2}$ pt., 30c; pt., 45c; qt., 75c; gal., \$2.35.

SLUG SHOT (POISON) — Is most effective when used as a powder and applied lightly over the infested parts with a good duster, taking care to thoroughly dust underneath the leaves as well as on top, preferably in early morning when the dew is on the plants. When used as a spray Slug Shot should be diluted one pound to five gallons of water.

Post paid—1 lb., 40c; 5 lbs., \$1.40. At Store, 1 lb., 30c; 5 lbs., \$1.20.

CORROSIVE SUBLIMATE

Used for treating sweet potatoes before bedding to prevent black rot. One ounce will make 8 to 10 gallons of solution.

Post paid— $\frac{1}{4}$ lb., \$1.15; 1 lb., \$3.85; 5 lbs., \$17.75. At Store— $\frac{1}{4}$ lb., \$1.10; 1 lb., \$3.75; 5 lbs., \$17.50.

NICOTINE PYROX—A combined insecticide and fungicide, prepared for use on vegetable plants against insect pests and fungous diseases. A soft, creamy paste, ready to use. Just dilute with water. Sticks to the foliage. Postpaid—20 oz. jar, 70c; 5 lb. can, \$1.95. At Store—20-oz. jar 60c; 5 lb. can, \$1.75

CRYOLITE

Results from its application on **PEACHES, tobacco, beans, melons, cucumbers, cabbage and potatoes**, show it to be safe, economical and superior to most insecticides for control of beetles and worms which attack these plants.

We recommend Alorco Cryolite above any other material for control of Mexican Bean Beetle, either as a spray or dust.

For dusting Cryolite may be used alone or it may be mixed with three to five parts of flour, sulphur, talc or road dust and applied with any suitable dusting apparatus.

For spraying, $1\frac{1}{2}$ pounds of Cryolite are mixed with fifty gallons of water. Sulphur may be added to the spray mixture if a

fungicide is needed.

Cryolite should not be mixed with lime.

NO INJURY TO FOLIAGE — Severe tests with Alorco Cryolite show that it does not injure delicate foliage.

Price—Post paid, 1 lb., 45c; 6 lbs., \$1.30; 24 lbs., \$4.50. At Store, 1 lb., 35c; 6 lbs., \$1.05; 24 lbs., \$4.00; 48 lbs., \$7.44.

MOLOGEN—Non-poisonous to humans or pets. Does not injure soil or grass. With a teaspoon or small trowel, carefully make a small opening in the side of ridge, keeping it free of earth. Now put in the mole's underground passage or runway a teaspoonful of Mologen. Carefully cover the opening with the original sod or earth. This should be repeated several feet apart.

Prices—Post paid, $\frac{1}{2}$ lb., 60c; $1\frac{1}{2}$ lbs., \$1.40; 5 lbs., \$4.15. At Store, $\frac{1}{2}$ lb., 50c; $1\frac{1}{2}$ lbs., \$1.25; 5 lbs., \$4.00.

ATLACIDE — Chlorate Weed Killer represents the most effective method for killing weeds, Johnson grass, poison ivy and all undesirable vegetation when properly applied. It is non-poisonous to human, animal or bird life. It has no odor and is harmless to the hands. It is ideal for killing weeds in driveways, paths, brick walks, cobble gutters, tennis courts, playgrounds, athletic fields and along fence lines. If you want to rid your farm of patches of Johnson grass, we urge you to use Atlacide Chlorate Weed Killer. Circulars mailed on request.

ATLACIDE
CHLORATE WEED KILLER

Price at Store, 100 lbs., \$10.00. No small packages available this year.

AMMATE WEED KILLER—Ammate generally gives permanent kill of certain weeds such as Poison Ivy, Poison Oak, Poison Sumac, and is helpful in the control of others. Ammate is non-inflammable and non-hazardous to live stock. Complete directions for use on each package. 2 lb. package, 90c; 6 lb. package, \$2.05 postpaid. At Store, 2 lb. package, 75c; 6 lb. package, \$1.80.

WEEDONE

TRADE MARK

It kills the plant under ground as well as above ground. Does not irritate skin and does not corrode metal or spray equipment. Will not leave residue on plants that is hazardous to livestock or pets. Does not sterilize the soil. Mix one part to sixty parts of water. Will kill Poison Ivy, Bindweed (Morning Glory), Ragweed, Burdock, Dandelion. Plantain. Quart, \$4.00; gal., \$12.00; 5 gals., \$55.00.

CHAMPION TREE KILLER—Kills Trees, Shrubs, Sprouts in 3 to 10 Days—Rid your fields of useless plants and trees that shade growing crops. **A POISON.** Full directions on container. Post paid—Qt., 65c. At Store—Qt., 50c; gal. \$1.25.

ACME WEED KILLER destroys weeds and all vegetation. The kind to use on driveways, clay courts, paths, etc. Also widely used in spotting out dandelions, plantain, and other noxious lawn weeds by application undiluted, using a weed cane or squirt-bottom oil can.

Post paid—Pint, 45c; Quart, 65c; Gallon, \$1.75. At Store—Pint, 35c; Quart, 50c; Gallon, \$1.50.

ACME SPRAY SOAP

A refined fish oil soap now made on Potash Base, which is much less liable to give injury to foliage than ordinary soap. Can be used alone in the control of aphids and certain other sucking insects, or combined with nicotine sulphate or as the emulsifying agent in oil sprays.

Post paid—1 lb., 45c. At Store—1 lb., 35c. Write for price on larger sizes.

CARBON DISULPHIDE

Used for controlling weevil in peas, beans, grains, etc. **Method of Treating**—Put seeds to be treated in an air-tight container, as a water barrel, strong goods box or metal container. For treating small lots, 2 ozs. of Carbon Disulphide per bushel is sufficient. Full directions on package. **Caution** Keep open fire, such as lanterns, matches, etc., away from Carbon Disulphide. Price—1 lb., 45c; 5 lbs., \$1.65; 50 lbs., \$7.00, F.O.B. Memphis. Cannot be mailed.

BUCK BRAND TESTED SEEDS

Post Paid Prices on This Page Through Third Zone Only—See Quantity Prices on Yellow Sheet

BORDEAUX MIXTURE—A spray for fungous diseases of fruit trees, shrubs, and flowers, especially black spot on roses. Fungous troubles must be prevented by spraying at regular intervals. Frequently apples and pears bloom beautifully and do not set any fruit due to blight.

To prevent fire blight or blossom blight of apples or pears spray with a 1-3-50 strength Bordeaux when about one-third the blossoms are open and again when approximately all the blossoms are open.

Price—post paid—1 lb. bag, 40c; 4 lbs., 95c; 12 lbs., \$2.25; 24 lbs., \$4.00. At Store—1 lb. bag, 30c; 4 lbs., 75c; 12 lbs., \$1.95; 24 lbs., \$3.60.

SULFORON (Micro-fine Wettable Sulphur)—Sulphur is a specific for the control of many diseases such as apple and peach scab, the brown rot of peaches, plums and other stone fruits, the powdery mildew of various plants, carnation and snapdragon rust, and the black spot of roses. It is also used in the control of such mites as the common red spider which attacks many kinds of plants. Sulforon is a specially prepared, finely divided product. It is instantly wettable and disperses uniformly in water. May be dusted or sprayed. Full directions on each package. Packed in 6-lb. pkgs. only. Post paid—6 lbs., 85c; 12 lbs., \$1.45; 24 lbs., \$2.45. At Store—6 lbs., 65c; 12 lbs., \$1.20; 24 lbs., \$2.00; 48 lbs., \$3.84.

ACME WETTABLE DUSTING SULPHUR—An improved dusting sulphur for home use which can also be used as a liquid spray. Recommended to control mildew, leaf spot, black spot and rust on rose bushes, chrysanthemums, snapdragons, carnation and certain other foliage; also red spiders on evergreen. 98 per cent passes through 325 mesh screen. Postpaid—2-lb. carton, 43c.

SUPERFINE SULPHUR—325 Mesh—For dusting cotton hoppers, red spider, mildew on roses and for use with lime in making self-boiled lime sulphur solution. Price, post paid—1 lb., 20c; 5 lbs., 55c; 10 lbs., 95c; 25 lbs., \$1.90. At Store—1 lb., 10c; 5 lbs., 40c; 10 lbs., 75c; 25 lbs., \$1.40; 50 lbs., \$2.30; 100 lbs., \$4.10.

VELVET DRY MIX—A complete summer spray in one package for peaches, plums and apricots. Ideal for the care of a few trees in the backyard or a small orchard. Relieves the necessity of mixing many ingredients. Just dissolve thoroughly 1 lb. Velvet Dry Mix in 4 gals. water and spray is ready.

Postpaid—1 lb., 35c; 5 lbs., 95c; 12½ lbs., \$1.85. At Store—1 lb., 25c; 5 lbs., 75c; 12½ lbs., \$1.50, 100 lbs., \$9.00.

"34" COPPER FUNGICIDE—(Sold for agricultural purposes only). Is highly efficient and yet very safe. It will remain toxic over longer periods of time than bluestone, bordeaux and other copper fungicides, and therefore, more effective. Can be used as a dust or spray. As a spray "34" Copper Fungicide is used for the same purposes as bordeaux and bluestone, but in smaller quantities. Use 3 lbs. per 100 gals. of oil emulsion spray for control of peach leaf curl. We recommend 3 lbs. per hundred gals. of spray for control of bitter rot and blotch of apples and black rot and mildews of grapes. If fungus troubles are not severe, 2 to 2½ lbs. may be used per 100 gals. of spray. No lime is necessary when "34" Copper Fungicide is used without arsenicals. When arsenicals are used 4 lbs. lime per 100 gals. spray must be added. As a dust it is used on beans, tomatoes, potatoes, cucumbers, and other truck crop vegetables. Post paid—6 lbs., \$1.45; 12 lbs., \$2.60; 24 lbs., \$4.80. At Store—6 lbs., \$1.30; 12 lbs., \$2.35; 24 lbs., \$4.35; 48 lbs., \$8.15.

TRI-OGEN—The complete spray treatment for roses. Kills chewing insects, aphids, plant lice, thrips, leaf hoppers, beetles, rose chafer, white fly, lace wing fly and in addition, controls diseases such as black spot, rust, mildew, blight. Stimulates growth. Harmless to foliage and blooms.

Economy Kit, makes 8 qts.—90c.....	Post paid	\$1.05
Small Kit, makes 16 qts.—\$1.50.....	Post paid	1.70
Medium Kit, makes 64 qts.—\$4.00.....	Post paid	4.25
Large Kit, makes 32 gals.—\$6.00.....	Post paid	6.35

DUTOX (for Chewing Insects)

It can be applied as a dust alone (six pounds per acre) or diluted with four or five times its weight of lime, road dust or some other inert material, and the gun set so as to deliver enough of the mixture to give six pounds of Dutox to the acre. As a spray use 2 pounds of Dutox to 50 gallons of water. Dusting can be done on beans when leaves are wet without danger of burning foliage. Dutox is recommended for use against Mexican bean beetle, striped and spotted cucumber beetle, Colorado potato beetle, egg-plant beetle, blister beetle, cabbage worm and tomato worm. Price—post paid—1 lb., 45c; 6 lbs., \$1.45; 36 lbs., \$7.80. At Store—1 lb., 35c; 6 lbs., \$1.25; 1 case, 36 lbs., \$7.20.

ARSENATE OF LEAD NuREXFORM—for all chewing insect control—so different and superior it is patented. Spraying at best is a hard job. But when arsenate of lead won't spray uniformly—light and watery on one tree and heavy on another—settles in the tank, clogs screens and nozzles—it's simply impossible to do a good job of controlling insect pests. Perfect suspension in NuREXFORM goes much further than merely insuring a spray of uniform strength. It is also a factor in insuring an even spread over the foliage and fruit. Lead

arsenate, as every grower knows, is used primarily against leaf-eating insects. If a spray is used that does not spread and cover evenly and uniformly, there are bound to be unprotected areas and such unprotected surfaces are open doors to the ravages of chewing insects. Price—post paid—1 lb. bag, 40c; 4 lbs., 90c; 12 lbs., \$2.35; 24 lbs., \$4.34. At Store—1 lb. bag, 30c; 4 lbs., 75c; 12 lbs., \$2.10; 24 lbs., \$3.84.

CALCIUM ARSENATE—Recommended by all experimental stations for cotton boll weevil also a sure control for army worms. Kills effectively potato bugs, tomato worms and other chewing insects. Dust or spray. Price—post paid—1 lb. bag, 30c; 4 lbs., 65c; 12 lbs., \$1.70; 24 lbs., \$3.15. At Store—1 lb. bag, 20c; 4 lbs., 50c; 12 lbs., \$1.45; 24 lbs., \$2.70.

ACME KOPPER QUEEN (Mildew and Black Spot Spray)

—A strong liquid copper spray for the control of mildew and black spot on rose bushes, flowers, and many other kinds of foliage. Stainless, leaves no unsightly residue which detracts so much from the appearance of flowers and ornamentals in your yard. Being a liquid concentrate it is more easily diluted and sprayed than Sulphur and Bordeaux. Post paid—½ pt., 45c; pt., 70c; qt., \$1.00; gal., \$2.50. At Store—½ pt., 35c; pt., 60c; qt., 90c; gal., \$2.25.

FRUITONE, the hormone spray for stopping premature drop of fruit, flowers and leaves. When sprayed on flowers of tomatoes or beans it produces better set and larger crop. Prevents premature drop of apples and pears. Post paid—2/5-oz. packet, 25c; 2-oz. package, \$1.05; 12-oz. can, \$5.10.

PARIS GREEN (Poison)—Effective against the potato bug and tobacco and cotton worms and most leaf-eating insects. Not to be used on tender foliage such as the peach and the Japanese plum. Post paid—¼ lb., 20c; 1 lb., 62c; 5 lbs., \$2.35; 14 lbs., \$5.50. At Store—¼ lb., 15c; 1 lb., 52c; 5 lbs., \$2.15; 14 lbs., \$5.15.

Most insecticides are poison and should be kept locked when not in use

NEW EVER GREEN SPRAY

New Ever Green contains spreader, therefore you simply dilute with water and spray. This is a Pyrethrum insecticide, for killing plant lice, cabbage worms, cutworms, cucumber beetle, thrips, rose slugs, rose chafer, squash beetles, leaf hoppers, potato bugs or beetles, bean beetle, Japanese beetle. Full directions on each package. Post paid—1 oz. (makes 6 gallons of spray), 40c; 6-oz. bottle, \$1.10; 1-pt. bottles, \$2.25. At Store—1 oz., 35c; 6 ozs., \$1.00; 1 pt., \$2.15.

BLACK LEAF 40—A nicotine solution for destroying aphids and lice, in orchards; on both garden and flowering plants. A teaspoonful makes three quarts of solution. This is one of the most effective preparations for general sucking insects. Kills by contact and fumes. A remarkable control for poultry lice, that does away with dusting, dipping or greasing, and yet absolutely effective. Simply paint the perches shortly before roosting time. Post paid—1 oz., 35c; 5 ozs., \$1.10; 1 lb., \$2.40; 2 lbs., \$3.50; 5 lbs., \$6.85; 10 lbs., \$11.95. At Store—1 oz., 32c; 5 ozs., \$1.00; 1 lb., \$2.27; 2 lbs., \$3.30; 5 lbs., \$6.60; 10-lb. tin, \$11.65.

TOBACCO DUST—Convenient, inexpensive, control for most plant lice and aphids. Dust when there is no wind. Our tobacco dust is of extra fine quality, very strong in nicotine content. Post paid—1 lb., 20c; 3 lbs., 40c; 5 lbs., 50c; 10 lbs., 85c; 25 lbs., \$1.45. At Store—1 lb., 10c; 3 lbs., 25c; 5 lbs., 35c; 10 lbs., 60c; 25 lbs., \$1.00.

CRO-TOX—Protects corn from Crows, blackbirds and moles. It aids and hastens germination, which means healthier stalks and larger yields per acre. Cro-Tox will not kill birds or animals. Saves seed loss. ½-pint can, treats 1 bushel seed corn. Postpaid—½ pt., 70c; 1 pt., \$1.10; quart, \$1.65. At Store—½ pt., 60c; pt., \$1.00; quart, \$1.50.

VOLCK—A nursery and garden oil spray for use on evergreens and shrubs in foliage against mealybugs, scale insects, red spiders, white flies and certain other insects. Kills by contact action. Leaves no poisonous residue.

Postpaid—4 oz., 35c; 16 oz., 65c; 1 gal., \$2.75. At Store—4 oz., 25c; 16 oz., 50c; 1 gal., \$2.25.

GRAFTING WAX—Used for grafting scions on trees, healing cuts around the graft. Full directions on each package. Postpaid—¼ lb., 30c; ½ lb., 45c; 1 lb., 70c. At Store—¼ lb., 25c; ½ lb., 35c; 1 lb., 60c.

Applying Paradichlorobenzene

4 years old use one ounce and for abnormally large trees use 1½ to 2 ounces. Post paid—1 lb., 45c; 5 lbs., \$1.45; 10 lbs., \$2.50; 25 lbs., \$4.75. At Store—1 lb., 35c; 5 lbs., \$1.25; 10 lbs., \$2.25; 25 lbs., \$4.25; 50 lbs., \$8.00.

DERRIS DUST MIXTURE—An economical combination of Derris and sulphur which acts as a fungicide and insecticide. It controls the majority of sucking and chewing insects which do the most damage to your vegetables. One of the surest and safest controls for Mexican Bean Beetle. Apply with dust gun underside of leaves. It is deadly to all forms of insect life yet perfectly safe to use on vegetables when applied according to directions as it contains no arsenic or other poisons dangerous to humans or animals. Post paid—1 lb., 30c; 5 lbs., \$1.00; 25 lbs., \$4.00. At Store, 1 lb., 20c; 5 lbs., 80c; 25 lbs., \$3.40; 50 lbs., \$6.25.

GARDEN GUARD (Rotenone Dust)—Not poisonous; highly effective against both chewing and sucking insects but leaves no poisonous residue. Women, especially, prefer using this dust on their flowers. Dust plants thoroughly, covering both upper and lower sides of foliage, hitting all insects to be controlled. Especially recommended for use on beans, peas, cabbage, cauliflower, greens, etc.

Price—Post paid, 1 lb., 45c. Store, 1 lb., 35c.

DRY LIME-SULPHUR—For dormant spraying against San Jose scale and peach leaf curl use 15 pounds of Dry Lime Sulphur to each 50 gallons of water. For summer spraying against apple scab, pear scab, apple powdery mildew and red spider use 3 to 4 pounds of Dry Lime Sulphur to 50 gallons. Post paid—1 lb., 45c; 5 lbs., \$1.50; 12½ lbs., \$1.80; 25 lbs., \$3.25. At Store—1 lb., 35c; 5 lbs., \$1.35; 12½ lbs., \$1.50; 25 lbs., \$2.75; 50 lbs., \$5.25.

RED ARROW is a concentrated extract of pyrethrum flowers combined with spreader. Because it kills on contact, it is deadly to both chewing and sucking insects. Red Arrow is perfectly safe, nonpoisonous to human beings; cannot discolor blossoms or injure plants. One-ounce bottle makes 8 gallons. Price, post paid—1 oz., 40c; 4 ozs., \$1.10. At Store—1 oz., 35c; 4 ozs., \$1.00.

PARA-SCALECIDE—For Use Against the Peach Tree Borer—Dilute 1 part of Para-Scalecide with 7 parts of water. Apply directly to the trunk, circling the tree 4 to 6 inches above ground, allowing it to run down to the ground. Promptly throw several shovelfuls of earth against the base of the tree, lightly mounding to hold the fumes. On young trees, break down the mounds in 3 or 4 weeks. Apply ½ pt. on 1 and 2 year old trees. 1 pt. on 3 and 4 year old trees. 1½ pts. on older trees. One gal. of Para-Scalecide treats approximately: 128 1 and 2 year old trees. 64 3 and 4 year old trees. 42 older trees. Apply in early Fall or in the Spring when ground temperatures are not colder than 60 degrees F. Do not apply when the soil is water soaked. For most effective control apply when the soil temperature is likely to average 60 degrees F. for the first two weeks after application.

Post paid—qt., \$1.00; gal., \$2.45. At Store—qt. 85c; gal., \$2.00; 5 gals., \$7.03.

ETHYLENE DICHLORIDE EMULSION FOR PEACH TREE BORERS—You dilute our emulsion with equal amount of water or more depending on age of trees to be treated. Applications are made by wetting the soil immediately surrounding the tree. Do not let the material come in contact with the tree. Ethylene Dichloride Emulsion has two distinct advantages over Paradichlorobenzene. It may be used with little or no preparation of the soil before treatment and it is not necessary to mound up afterwards, but it is advisable to throw a few shovels of dirt around the tree trunk. It may be applied in fall, winter or spring but by all means apply it in fall if possible. Gallon treats 40 four- to five-year trees or 55 three-year trees. Full directions on each package. Price, post paid—Pt., 45c; qt., 80c; ½ gal., \$1.20; 1 gal., \$1.85. At Store—Pt., 30c; qt., 60c; ½ gal., 95c; gal., \$1.50; 5 gals., \$6.00.

PARADICHLOROBENZENE—An effective peach and plum tree borer control. Apply in Upper South September 15 to October 1; Middle South October 1 to October 15; Lower South October 15 to November 15. Can also be used in the spring. Use only ¼ ounce on two-year old trees; ¾ ounce for three-year old trees. For trees

BUILD UP YOUR SOIL Inoculate Your Legumes With NITRAGIN

Many believe once a field has been planted with inoculated Legume seeds that any future similar Legumes planted on the same field need not be inoculated. Field tests have shown that better crops are harvested when Legume seeds are inoculated even when planted on fields where inoculated seeds of the same Legume crops had grown the previous year. It seldom pays to depend upon natural inoculation. The safest method is to inoculate legume seed each time the seed is planted.

NITRAGIN—the Oldest and Most Widely Used Inoculator in America

HOME GARDENER'S SOIL TEST KIT

The ideal introductory kit. Easy to use. Tests for nitrogen, phosphorus, potash and acidity. Gives all essential information for successful lawn or garden. Helps the gardener grow more beautiful flowers and more delicious vegetables.

Post paid, \$1.95; at Store, \$1.75.

CLUB MODEL SOIL TEST KIT

Larger; makes more tests than above kit; cased in handsome sturdy imitation leather. Ideal for Agricultural Teachers classroom demonstrations.

FIRST, the Sudbury Soil Test Kit measures the acidity of the soil—showing how much lime is required by your plants and grasses.

SECOND, it tests for the three essential plant food elements—nitrogen, phosphorus, potash—showing the kind and amount of fertilizer to apply.

Simple instructions and data on plant needs accompany each kit.

Club Model Kit—at Store, \$4.75.

Young ALFALFA root with nodules produced by NITRAGIN inoculation. NITRAGIN bacteria within the nodules aid in producing higher protein hay, increased yields, and richer soil.

RED CLOVER root with nodules produced by NITRAGIN inoculation. NITRAGIN bacteria within the nodules aid in producing higher protein hay, increased yields, and richer soil.

For Growing Healthier Plants

VITAMIN B₁

(Pure Crystalline Powder)

For example, tea rose buds 5 inches long; snapdragons 6 1/2 feet tall have been produced by using Vitamin B₁. It does not replace fertilizer, but is strictly a root re-invalidator which enables the plant to gain the greatest possible benefit from the soil. Most plants need this essential growth factor, so important to the health and vigor of garden and house plants, roses, shrubs, trees and lawns.

Sold in three popular forms—tablets, liquid or powder. Simply mix with water as directed and apply with a sprinkling can. Complete directions give new facts on how to get results with Vitamin B₁.

40 Tablets (makes 40 gals.)	10c
100 Tablets (makes 100 gals.)	25c
250 Tablets (makes 250 gals.)	50c
1-oz. Liquid (makes 140 gals.)	25c

BUCK BRAND TESTED SEEDS

FERTILIZERS

Fifty to seventy-five pounds of 4-8-8 Garden Fertilizer is sufficient for a garden 40 x 50 ft.

Fertilizer can always be used to good advantage by opening up the row, sprinkling thinly the fertilizer; cover same with a little soil and sow your seed. Or it can be used by working into the soil along the rows after the plant is up, care being taken not to let it come in contact with the leaves or stem of the plant. For plants that are transplanted, work the fertilizer into the soil thoroughly before transplanting, using from a teaspoonful to a small handful, according to the size and nature of the plant.

PLANTABBS

Fulton's Plantabbs in tablet form are a complete, balanced plant food plus Vitamin B₁ in a form simple to use. This complete concentrated fertilizer and Vitamin B₁ root stimulant will work wonders on your house and garden plants.

Post paid—10 tablets, 10c; 30, 25c; 75, 50c; 200, \$1.00

SHEEP MANURE

The natural fertilizer, finely pulverized. Fine for lawns, gardens and shrubbery. Improves the mechanical condition of the soil. Excellent for mulching or as a liquid manure. A splendid fertilizer for making new lawns or top dressing old lawns. Use 10 pounds to 100 square feet for mixing soil and half that quantity for top dressing.

Prices, post paid—5 lbs., 45c; 10 lbs., 75c; 25 lbs., \$1.25. F.O.B. Memphis: 100 lbs., \$2.50.

RAW BONE MEAL

Especially fine for roses and peonies. For best results use twice a year (early spring and late summer). Use about a teacupful each time, sprinkle around the bush or plant about one inch away. For other purposes and over larger areas use 8 to 10 pounds to 100 square feet.

Prices, post paid—5 lbs., 45c; 10 lbs., 80c; 25 lbs., \$1.40. Price, F.O.B. Memphis, 100 lbs., \$3.10.

PEAT MOSS HORTICULTURAL

Peat Moss is especially adapted to loosen up tight, clay soil, thereby making the soil retain moisture which will liberate plant food and holds it over long periods of time for the constant use of plant roots. Neither water nor food leach away.

Prices, at Store—Bale (about 100 lbs.), \$3.95.

NITRATE OF SODA

The most readily available source of nitrogen. When used on cotton and corn, it is not unusual for the yield to be doubled. On field crops use about 150 lbs. to acre.

Prices, post paid—5 lbs., 45c; 10 lbs., 70c; 25 lbs., \$1.25. Not prepaid—5 lbs., 25c; 10 lbs., 45c; 25 lbs., 80c; 50 lbs., \$1.40.

4-8-8 FERTILIZER

Analysis: 4% Nitrogen, 8% Phosphate, 8% Potash

Especially good for fertilizing Irish potatoes, sweet potatoes, tomatoes and all root crops. If properly applied it produces smoothness and firmness in the tubers and fruit, also giving earlier maturity. It is an excellent fertilizer for general crops on soils deficient in potash, especially sandy soils.

Price, post paid—5 lbs., 45c; 10 lbs., 65c; Price, not prepaid—5 lbs., 25c; 10 lbs., 40c; 25 lbs., 75c; 50 lbs., \$1.15.

ACID PHOSPHATE 18%

Is recommended for all legume, grain and pastures and for applying to all land deficient in phosphoric acid. A liberal supply of phosphate is necessary for plants to set and develop fruit and grain in large quantities.

Price, post paid—5 lbs., 35c; 10 lbs., 60c; 25 lbs., \$1.10. Not prepaid—5 lbs., 20c; 10 lbs., 35c; 25 lbs., 60c; 50 lbs., 90c.

ALUMINUM SULPHATE—When applied 2 pounds per 20 square feet will make soil more acid, giving acid-loving plants like azaleas vigor and profuse blossom.

Prices, post paid—1 lb., 20c; 5 lbs., 60c; 10 lbs., 95c. Not prepaid—1 lb., 10c; 5 lbs., 40c; 10 lbs., 70c; 15 lbs., 90c.

FEED LAWNS and FLOWERS to grow them successfully experts agree!

The millions of grass plants that together make up a lawn are living things. They need food to grow into sturdy, weed-free turf. They must get their food from the soil but it is poor economy to let them struggle for it. Make sure your lawn,

flowers, shrubs and trees have all the nourishment they need. FEED THEM with VIGORO, complete plant food. It is economical to use. Four pounds completely feeds 100 square feet of lawn or garden area.

FEED VEGETABLE GARDENS, TOO!

Victory Gardens proved the advantage of feeding all vegetables with this complete plant food. It helps increase yields, hastens maturity, improves flavor and assures you a harvest of vegetables rich in minerals. Clean, odorless and easy to use. It is made by Swift & Company.

BUCK BRAND TESTED SEEDS

DU PONT SEMESAN DISINFECTANTS

2% CERESAN FOR COTTON AND PEAS

Improves Stands and Yields—2% Ceresan treated cotton seed in forty tests on farms in the south produced almost 60% better stand before chopping than untreated seed; 30% more plants after chopping and 16.2% greater yield at picking time. Treated seed can be planted earlier as it reduces damping off, prevents rotting in cold, wet, soil and controls such diseases as anthracnose and angular leaf spot. 9 oz. treats 100 lbs. seed.

Prices—Post Paid—1 lb., 85c; 4 1/4 lbs., \$3.34; 25 lbs., \$14.95. At Store—1 lb., 75c; 4 1/4 lbs., \$3.14; 25 lbs., \$14.50; 100 lb. drum, \$52.00.

SEMESAN—For Bulbs, Flower and Vegetable Seeds

Hastens and increases germination; produces stronger, more vigorous plants, arrests or destroys most of the diseases carried on the surface of seeds and bulbs. By treating bulbs and seeds you can have earlier flowers and vegetables. 1 oz. treats 15 to 30 lbs. of seed.

Prices—Post Paid—1/3 oz., 10c; 2 ozs., 45c; 12 oz., \$1.98; 4 lbs., \$9.30. At Store—1/3 oz., 10c; 2 ozs., 40c; 12 oz., \$1.88; 4 lbs., \$9.10.

NEW SEMESAN BEL—For Potatoes

Seed potato treatment with New Improved Semesan Bel gave an average increase in yield of 35.4 bushels per acre, by controlling seed borne and soil borne diseases, reducing seed rotting and improving stands. Costs 1 1/2c to 3c per bushel, as one pound treats 60-80 bushels of seed. **Prices**—Post Paid—2 oz., 35c; 1 lb., \$1.75; 5 lbs., \$7.35; 25 lbs., \$33.70. At Store—2 ozs., 30c; 1 lb., \$1.65; 5 lbs., \$7.15; 25 lbs., \$33.25.

NEW IMPROVED SEMESAN JR.—For Corn

Protects seed corn from rotting, allows earlier planting, hastens and increases germination and produces sturdier plants; controls seedling blight, reduces root and stalk rots, makes the stalk stand up better, improves the ear and increases the yield. 1 1/2 ounces treat a bushel of shelled corn.

Prices—Post Paid—1 1/2 oz., 15c; 12 oz., 66c; 6 1/4 lbs., \$3.95; 25 lbs., \$12.95. At Store—1 1/2 oz., 15c; 12 oz., 56c; 6 1/4 lbs., \$3.75; 25 lbs., \$12.50.

NEW IMPROVED CERESAN

For small grains, sorghum, millet and cotton. Controls nearly all types of smut which is so destructive to oats, barley and wheat thereby frequently increasing yields from 6 to 18%—adding a real profit to your crops. 1 oz. treats bushel of grain.

It is widely used on cotton as it is so economical. 1 1/2 oz. treats bushel.

Prices—Post Paid—4 oz., 35c; 1 lb., 90c; 4 lbs., \$2.90; 8 lbs., \$5.65; 25 lbs., \$15.45. At Store—4 oz., 30c; 1 lb., 80c; 4 lbs., \$2.70; 8 lbs., \$5.40; 25 lbs., \$15.00; 100 lbs., \$55.00.

"ARASAN"

An effective dry seed disinfectant and protectant for destroying many surface seed-borne organisms and protecting the seed against certain soil-borne organisms responsible for seed decay. Usually improves stands of seedlings and frequently increases yield of quality crops. University of Illinois tests show 8.5 bushels per acre increased yield of corn. Excellent reports on use of "Arasan" for peanuts and many vegetables. 1 1/2 to 4 oz. per 100 pounds of seed, depending on the crop.

Post paid—1 oz., 18c; 8 ozs., 90c; 5 lbs., \$6.65. At Store—1 oz., 16c; 8 ozs., 80c; 5 lbs., \$6.45; 25 lbs., \$30.00.

ETHYLENE CHLORHYDRIN

Causes Spring-Grown Irish Potatoes to Sprout for LATE Crop. This unusual, quick method (in use many years) has the effect of waking the potato or bringing it out of the rest period.

BUCK BRAND TESTED SEEDS

Buchanan's Quantity Price List, Jan. 1, 1946

All prices quoted in this list are present values and subject to change without notice. We do not, however, expect many changes, and our customers may rely upon receiving the very lowest prices current at the time their orders are received.

TERMS—As the prices are NET CASH, a remittance must accompany all orders. These prices are F. O. B. Memphis, sacks included. Freight or express charges must be paid by the purchaser. Read page 2 regarding Parcel Post Rates—it is easy to figure parcel post with our map.

PARCEL POST—When any items ordered from these prices are to be sent by parcel post, sufficient money must be added to the following prices to pay postage. If more money is sent than the amount of postage, we will return same. Parcel post is easy to figure. You will find a map on page 2, also the amount of postage figured, 1 pound to 70 pounds through the eighth zone from Memphis. Use this map. It will save you money.

NON-WARRANTY—R. B. Buchanan Seed Company, Inc., gives no warranty, express or implied, as to the productiveness or efficiency of any seeds, bulbs, plants, fertilizers, insecticides or other goods it sends out, and will not in any way be responsible for the crop or results. Its liability in all instances is limited to the purchase price of such goods. This condition forms part of the contract of sale when the goods are delivered and accepted, and if not accepted on these terms they are to be returned at once and the purchase price will be refunded.

PRATT'S POULTRY REMEDIES

PRATT'S ZENE-A-TROL (Pheno-thi-azine)

This product is tasteless and nontoxic when used as directed, and it is not necessary to starve the animals or fowls before treatment. Pratt's Zene-A-Trol contains the exact form of phenothiazine found most effective by the U. S. Department of Agriculture for worming hogs, sheep, horses and chickens. The ease of treatment combined with its low cost makes this product superior to any other herd or flock treatment worm medicine thus far developed. Pheno-Thi-Azine will remove more types of worms in more different animals and fowls than any other worm medicine. It is a powder which is mixed with the feed and given to the entire herd or flock at one time.

The 1 lb. pkg. treats approximately: Hogs—40, weighing 50 to 100 lbs. each. Sheep—20 Lambs or 14 Ewes. Horses—7. Chickens—1700 full grown, 3500 half grown. Other size pkgs. will treat a proportional number of animals or fowls.
Price, Postpaid, ½-lb. size, \$1.10; 1-lb., \$1.60; 5-lb., \$7.15.
At store, ½-lb., \$1.00; 1-lb., \$1.50; 5-lb., \$7.00.

PRATT'S CHICK TABLETS

This remarkable product is both a bowel astringent and an antiseptic. It is floated on top of the water by a special ingenious float. From this float the drugs are fed constantly into the water from the top of the fountain. One tablet to quart water makes the most perfect diarrhea preventative.
Postpaid—(About 22 tablets), 30c. (About 55 tablets), 65c.

PRATT'S ANIMAL REGULATOR (A General Stock Tonic)

Supplies most necessary minerals and trace elements—those rare important minerals that help all livestock to build health, growth and big strong frames so necessary for profitable livestock production. Feed a little each day.
Price—Postpaid—2½ lbs., 65c; 6 lbs., \$1.20; 25 lbs., \$3.45.
At Store—2½ lbs., 50c; 6 lbs., \$1.00; 25 lbs., \$3.00.

PRATT'S R-P TABLETS

A treatment for Roup and other types of colds. At the first signs of roup separate diseased birds and give each adult one R-P Tablet daily. Younger fowls portion of tablets. For flock treatment as a roup preventive dissolve one R-P Tablet in each quart of drinking water.
Postpaid—Small Size (1½ oz.), 30c; Large Size (3½ oz.), 65c. At Store—Small Size (1½ oz.), 30c; Large Size (3½ oz.), 60c.

PRATT'S POULTRY REGULATOR

Gives layers better appetites, digestion and health, enabling them to turn more feed into eggs. Less feed is wasted and this alone pays for the Regulator used.
Postpaid—2¼ lbs., 60c; 6 lbs., \$1.20; 25 lbs., \$3.45. At Store—2¼ lbs., 50c; 6 lbs., \$1.00; 25 lbs., \$3.00.

PRATT'S WORM POWDER with Phenothiazine

A flock treatment, no handling of fowls necessary. Just mix thoroughly the correct amount of Pratt's Worm Powder with a given amount of mash as directed on the package. This new worm powder combines the best known poultry worm controls.
Price, Postpaid, 50-bird size, 65c; 100-bird size, \$1.10; at store, 50-bird size, 60c; 100-bird size, \$1.00.

PRATT'S SPLIT ACTION WORM CAPSULE

An Exclusive Patented Feature. It takes different drugs to eradicate different worms. Each worm treatment in Split Action Capsules acts separately and hours apart. More effective, less shocking to the bird.
Postpaid—Adult Size—Doz., 25c; 56, 60c; 100, \$1.00; 500, \$4.45; 1,000, \$8.50. Chick Size—Doz., 20c; 50, 50c; 100, 75c; 500, \$3.00; 1,000, \$5.75.

PRATT'S ROOST PAINT

It kills lice by contact and with nicotine fumes which remain deadly to lice for days. Simply apply a thin strip of Pratt's Roost Paint on top of roosts. Has an oil base which is readily soaked up and spread through the feathers.
Postpaid—½ pt., \$1.10; 1 pt., \$1.85. At Store—½ pt., \$1.00; 1 pt., \$1.75.

PRATT'S INHALANT

A new water soluble inhalant which gives better control of simple colds that often develop into deadly ravaging outbreaks of roup, bronchitis and pneumonia. Ready to use. Simply spray over the fowls. Its germ killing medicines mix readily with watery secretions of respiratory tract and coats the tissues with germ-killing medication.
Postpaid—Pt. 85c; Qt. \$1.50. At Store—Pt. 70c; Qt. \$1.25.

PRATT'S C-KA-GENE

Builds immunity to Bloody Coccidiosis. This new compound fed 1¼ lbs. to each 100 lbs. mash for one week before the chicks are allowed outside on the ground until 4 to 8 weeks thereafter builds up an effective protection against Bloody Coccidiosis.
Postpaid—50 Chick Size, 85c; 100 Chick Size, \$1.35. At Store—50 Chick Size, 75c; 100 Chick Size, \$1.25.

All items on this page except chicks postpaid through 3rd zone only.
